* From the writer and executive producer of the award-winning Netflix series *The Good Place* that made moral philosophy fun: a foolproof guide to making the correct moral decision in every situation you ever encounter, anywhere on earth, forever * 'An absolute breeze to read; funny and enlightening and revealing' - Guardian 'Enormously enjoyable, useful and readable' - The Times How can we live a more ethical life? This question has plagued people for thousands of years, but it's never been tougher to answer than it is now, thanks to challenges great and small that flood our day-to-day lives and threaten to overwhelm us with impossible decisions and complicated results with unintended consequences. Plus, being anything close to an 'ethical person' requires daily thought and introspection and hard work; we have to think about how we can be good not, you know, once a month, but literally all the time. To make it a little less overwhelming, this fascinating, accessible and funny book by one of our generation's best writers and adept minds in television comedy, Michael Schur, boils down the whole confusing morass with real life dilemmas (from 'should I punch my friend in the face for no reason?' to 'can I still enjoy great art if it was created by terrible people?'), so that we know how to deal with ethical dilemmas. Much as Chidi used humour and philosophy to make Eleanor a less selfish person, Schur takes us on a journey through the 2,500-year discussion of ethics, sketching a roadmap for how we ought to act along the way. By the time the book is done, we'll know exactly how to act in every conceivable situation, so as to produce a verifiably maximal amount of moral good. We will be perfect, and all our friends will be jealous. OK, not quite. Instead, we'll gain fresh, funny, inspiring wisdom on the toughest issues we face every day With contributions from Professor Todd May of Clemson University, who served as an advisor on *The Good Place*, this is a brilliant, clever and hugely entertaining book about one of the most important topics in the world. 'The problem is, if all you care about in the world is the velvet rope, you will always be unhappy, no matter which side you're on.' - Tahani Al-Jamil, *The Good Place*

Early Christian writers preferred to speak of the coming resurrection in the most bodily way possible: the resurrection of the flesh. Twentieth-century theologian Karl Barth took the same avenue, daring to speak of humans' eternal life in rather striking corporeal terms. In this study, Nathan Hitchcock pulls together Barth's doctrine of the resurrection of the flesh, anticipating what the great thinker might have said more systematically in volume V of his Church Dogmatics. Provocatively, Hitchcock goes on to argue that Barth's description of the resurrection--as eternalization, as manifestation, as incorporation--bears much in common with some unlikely programs and, contrary to its intention, jeopardizes the very contours of human life it hopes to preserve. In addition to contributing to Barth studies, this book offers a sober warning to theologians pursuing eschatology through notions of participation.

Holocaust movies have become an important segment of world cinema and the de-facto Holocaust education for many. One quarter of all American-produced Holocaust-related feature films have won or been nominated for at least one Oscar. In fact, from 1945 through 1991, half of all American Holocaust features were nominated. Yet most Holocaust movies have fallen through the cracks and few have been commercially successful. This book explores these trends--and many others--with a comprehensive guide to hundreds of films and made-for-television movies. From Anne Frank to Schindler's List to Jojo Rabbit, more than 400 films are examined from a range of perspectives--historical, chronological, thematic, sociological, geographical and individual. The filmmakers are contextualized, including Charlie Chaplin, Sidney Lumet, Steven Spielberg and Roman Polanski. Recommendations and reviews of the 50 best Holocaust films are included, along with an educational guide, a detailed listing of all films covered and a four-part index-glossary.

With the exception of the United States, all developed nations provide their citizens with quality, affordable health care. And, despite its having expanded access through such programs as Medicare, Medicaid, SCHIP, and the Affordable Care Act, nearly 20 million Americans still do not have health insurance. The cost of providing care in the United States will soon be unsustainable. It surely makes sense to consider an option that ensures

health care is accessible to all its citizens and is fully funded regardless of vicissitudes in the national economy. This book is a must read for anyone concerned with the failure of the current system and looking for an alternative. Colton's proposal for universal health care is thoroughly explained including: a description of services provided how we'll pay for it how it is organized for delivery why it will save consumers money, and how it will ensure standards for quality and clinical effectiveness. In this incisive and comprehensive book, David Colton take on the formidable task of explaining how America's health care system works, why it fails in terms of cost, efficiency and quality of care and why it must be reformed... an invaluable resource ... JILL QUADAGNO, Author, One Nation Uninsured: Why the US Has No National Health Insurance ...an excellent book, making a most unwieldy subject accessible and interesting to read. He deftly brings in pop culture, personal stories, and history in a way that brings this important public policy question come alive... JULIE SALAMON, author, Hospital A must read for anyone concerned about America's health care system, especially those advocating for single-payor and Medicare for All... Highly recommended. STEVEN A. This volume explains the inadequacy of the sources and methods used to establish Jesus' historicity, and how agnosticism can reasonably be upgraded to theorising about historicity when reconsidering Christian origins.

This is the first critical study of feminist practices of 'speaking out' in response to rape. This book argues that feminist anti-rape politics are characterised by a belief in the transformative potential of women's personal narratives of sexual violence. The political mobilisation of these narratives has been an incredibly successful strategy, but one with unresolved ethical questions and political limitations. The book explores both

the successes and the unresolved questions through feminist archival materials, published narratives of sexual violence, and mass media and internet sources. It argues that that a rethinking of the role and place of women's stories and the politics of speaking out is vital for a rethinking of feminist politics around sexual violence and key to fresh approaches to combating this violence.

This comprehensive study of probability considers the approaches of Pascal, Laplace, Poisson, and others. It also discusses Laws of Large Numbers, the theory of errors, and other relevant topics.

This book critically examines the last few decades of discussion around sex and violence in the media, on social media, in the courtroom and through legislation. The discursive struggles over what constitutes "sexual violence", "victims" and "offenders" is normally determined through narratives: a selective ordering of events and participants. Centrally, the book investigates the social processes involved in the telling of stories of rape and its political implications. From a multidisciplinary feminist perspective, this volume explores what narratives about sexual violence are deemed legitimate at this historical juncture. This volume brings together feminist scholars working in a wide variety of disciplines including law, legal studies, history, gender studies, ethnology, media, criminology and social work from across the globe. Through situated empirical work, these scholars seek to understand currents movements between the criminal justice system and the cultural imagination.

JFK. Analysis of a Shooting, is an expert, detailed and comprehensive analysis of the assassination of President Kennedy. The work takes into account all the elemental factors that lead to a complete understanding of the shooting, and which will eventually serve to establish the undisclosed facts behind the tragic event. In its process of discovery the writing scrutinizes each shot taken at the

motorcade. Additionally, it considers the caliber of the rifle used in the shooting. It takes into account the relative speed (in feet per second), and the inherent power of the bullets fired at the President. It analyzes the position of the alleged gunman and its relationship to his target. It also explores the extent of every bullet wound, as it relates to the shot that caused it. In addition, the work probes the Zapruder film, as a visual record of the event, to denote the crucial frames that expose previously unrevealed facts of the shooting. And finally, the work reviews the trajectory of every single shot taken at the motorcade, from point of impact back towards the suspected point of origin, and their angles of entry into their targets. The book denotes, through conclusive interpretation of the evidence gathered, logical reasoning, and concrete ballistic principles that a total of five shots were fired at President Kennedy. Additionally, it also explains why it can be concluded that none of the shots fired at the President actually originated from the Texas School Book Depository Building, Oswald's alleged sniper position.

Orlando Martin joined active-duty military service in the U.S. Navy in December of 1976. After completing basic training in San Diego, California, his first duty assignment in 1977 was overseas in the Philippines. He returned stateside in 1980, and continued his military career. Among his most memorable assignments during his service was a three-year tenure as a Drill Instructor at Recruit Training Command, Great Lakes, Illinois. One of his recruit companies graduated as Color Company ahead of the other divisional companies. The company achieved higher compiled drill and inspection scores than any other company in its graduating group. He was awarded the Navy / Marine Corp Achievement Medal for his commendable effort. Mr. Martin qualified as a rifle expert during his military service, and was consequently awarded the Expert Rifle Medal. He retired honorably from active duty in 1996, after twenty years of continuous service. He is an active member of the Illinois State Rifle Association (ISRA), and the National Rifle Association (NRA).
