

## 12 Core 23 101 12 Core 1 866 Xcel Power

By 2020, half of the world's population and most university students will have a supercomputer in their pockets. This revolution will affect the way students respond to higher education. The university classroom must henceforth engage students, and the classic lecture format alone might not be enough to do so. This book answers the question how university students can learn in the classroom what they cannot learn in any other way. The answer is inspired by options that are not available to political scientists - in the way that they are in the laboratories for the sciences, in the performances for the live arts, and in the studios for visual arts - as well as ideas that are already present, but not widespread in the discipline: problem-solving and case studies, as in the professional schools, and simulation exercises in many other disciplines. This book proposes therefore an active pedagogy for political science, at a time when active pedagogy is more important than ever. Prof. Laure Paquette, PhD, has been a visiting researcher or professor in 23 countries. She has advised several foreign governments as well as her own, Canada, and has published extensively in four languages. This is her

sixteenth book.

This edited volume presents fresh empirical research on the emerging outcomes of China's law reforms. The chapters examine China's 'going out' policy by addressing the ways in which the underpinning legal reforms enable China to pursue its core interests and broad international responsibilities as a rising power. The contributors consider China's civil and commercial law reforms against the economic backdrop of an outflow of Chinese capital into strategic assets outside her own borders. This movement of capital has become an intriguing phenomenon for both ongoing economic reform and its largely unheralded underpinning law reforms. The contributors ask probing questions about doing business with China and highlight the astonishing escalation of China's outbound foreign direct investment (OFDI). Law and Policy for China's Market Socialism includes contributions from leading China-law scholars and specialist practitioners from the People's Republic of China, Hong Kong, the United States, the United Kingdom and other countries who all extend the examination of powerful influences on China's law reforms into new areas. Given the forecast for the growth of China's domestic market, those wishing to gain a better understanding and seeking success in the world's most dynamic marketplace will benefit greatly from reading this book. This book is essential reading for anyone interested in Chinese economics and business, Chinese Law, Chinese politics and commercial law.
