All-Trac was a proprietary full-time four-wheel drive system used on a variety of Toyota badged models from 1988 to 2000. It was considered a revolutionary advance for four wheel drive automobiles into the mainstream consumer market and its electronic/vacuum controlled locking center differential was rare in a passenger car. The system originated in Japan under the GT-Four name in 1986, but was not released in the U.S. until 1988 under the All-Trac name.

In the Philippines, the sixth generation Corolla was initially introduced in 1989 with 3 versions: XL and XE, both of which came with the 1.3 liter SOHC 2E engine, and GL, which is the top-of-the-line model with a more powerful 1.6 liter DOHC 4A-F engine. Earlier XL variants came with 4-speed manual transmissions, while later models would come with 5-speed manual transmissions, hence the XL4 (4-speed) and XL5 (5-Speed) designations.
