2019 Planner: Save Money, Travel The World, Be World

This book explores the role of the insurance industry in contributing to, and responding to, the harms that climate change has brought and will bring either directly or indirectly.

The Anthropocene signifies a new role for humankind: we are the only species that has become a driving force in the planetary system. What might criminology be in the Anthropocene? What does the Anthropocene suggest for future theory and practice of criminology? Criminology and

Climate, as part of Routledge's Criminology at the Edge Series, seeks to contribute to this research agenda by exploring differing vantage points relevant to thinking within criminology. Contemporary societies are presented with myriad intersecting and interacting climate-related harms at multiple scales. Criminology and Climate brings attention to the finance sector, with a particular focus on the insurance industry as one of its most significant components, in both generating and responding to new climate 'harmscapes'. Bringing together thought leaders from a variety of disciplines, this book considers what finance and insurance have done and might still do, as 'fulcrum institutions', to contribute to the realisation of safe and just planetary spaces. An accessible and compelling read, this book will appeal to

students and scholars of criminology, sociology, law and environmental studies and provides readers with a basis to analyse the challenges and opportunities for the finance sector, and in particular the insurance industry, in the regulation of climate harms.

This volume offers insights into contemporary trends and perspectives in psychobiographical research. It applies new theoretical and methodological frameworks and presents discourses on psychobiography from transdisciplinary backgrounds and various socio-cultural contexts, displaying the new state-of-the-art, new trends and themes in psychobiography. The book outlines psychobiography's outstanding contribution to psychology from 36 internationally reputable authors. It also presents the ideas of five

This book analyses how an increasing number of new Chinese migrants have integrated into Australian society and added a new dimension to Australian domestic politics as a result of Australia's merit-based immigration system and its shift towards Asia. These policies have helped Australia sustain its growth without a recession for decades, but have also slowly changed established patterns in the distribution of job opportunities, wealth, and political influence in the country. These transformations have recently triggered a strong Sinophobic campaign in Australia, the most disturbing aspect of which is the denial of the successful integration of Chinese migrants into Australian society. Based on evidence gathered through a longitudinal study of Chinese migrants in Australia, this

book examines the misconceptions troubling Australia's current China debate from six important but overlooked perspectives, ranging from migration policy changes, economic factors, grassroots responses, the role of major political parties, community activism, to knowledge issues. TERI Energy & Environment Data Diary and Yearbook (TEDDY) is an annual publication brought out by TERI since 1986. It is the only comprehensive energy and environment yearbook in India that provides updated information on the energy supply sectors (coal and lignite, petroleum and natural gas, power, and renewable energy sources), energy demand sectors (agriculture, industry, transport, household, buildings), and environment (local and global). Additionally, the publication reviews

government policies and analyses latest policy discourses that have implications on India's energy and environment sector. TEDDY 2018/19 gives an account of India's commercial energy balances, extensively covering energy flows within different sectors of the economy and how they have been changing over time. These energy balances and conversion factors are a valuable reference for researchers, scholars, and organizations engaged in energy and related sectors. After the introductory chapter, TEDDY 2018/19 is divided into three sections—Energy Supply, Energy Demand, and Local and Global Environment. One of the main highlights of TEDDY 2018/19 is the addition of a new chapter—Buildings—under Energy Demand section. This chapter gives an in-depth analysis of India's energy

consumption by the buildings sector, and highlights the role of energy efficiency in buildings from the perspectives of both economy and environment. The thirty-fourth edition of TEDDY continues to remain less prose intensive with inclusion of more data, represented with the help of infographics, thus making the publication an authentic and interesting read. TEDDY 2018/19 also features a section on interlinkages of SDGs with energy and environment. Key Features:

- Provides a review of government policies, programmes and initiatives that have implications for the petroleum and natural gas sector and the Indian economy
- New chapters on Air Pollution, Solid Waste Management, Water Resource Management, and Land and Forest Resource Management
- Exhaustive data from energy

environment and the human-centered development of the modern global economic system have been explored. The features of training of personnel for the modern global economic system through the development of vocational education and training have been studied. Sustainable development, energy and food security have been identified as significant milestones of the progress of the modern global economic system. Innovations and digital technologies have been suggested as the drivers of growth and development of the modern global economic system. Consideration has been given to the institutional framework and legal groundwork for the development of the modern global economic system. The fundamentals have been identified and recommendations have been put

Digital financial services are starting to become increasingly popular with consumers, thereby fostering a favorable climate for digital entrepreneurship: mobile payment, Blockchain, etc. Research trying to understand and explain this phenomenon focuses on FinTech. Some scholars regard “FinTech” as financial innovations that upset the market while others view them as startups, based on financial innovations, that have changed the ecosystem. There are many open-ended questions about FinTech’s business models, how it relates to blockchain, and whether this is a collaborative relationship between traditional financial players or a competitive relationship. Noting the lack of research work on these themes, this book attempts

to shed light on this area to bridge the gap between the discourse of practitioners and the literature. Influence of FinTech on Management Transformation is an innovative reference book that defines FinTech and its ecosystem as well as concepts in relation to management transformations caused by FinTech and shares new theoretical and empirical frameworks, useful experiences, and best practices to deal with new technological changes. The chapters are divided into three interrelated sections: “Insights From the Blockchain Technology”; “Managerial and Cultural Transformations in the Era of FinTech”; and “Empirical Experiences and Applications.” This book is a valuable reference tool for financial planners/advisors, managers, accountants, financial analysts, compliance

This book examines the early years of the Claims Conference, the organization which lobbies for and distributes reparations to Holocaust survivors, and its operations as a nongovernmental actor promoting reparative justice in global politics. Rachel Blumenthal traces the founding of the organization by one person, and its continued campaign for the payment of compensation to survivors after Israel left the negotiations. This book explores the degree to which the leadership entity served individual victims of the Third Reich, the Jewish public, or member organizations.

Holocaust memory is often formed and dictated by governments and others with an agenda to fulfil, or by deniers who seek to rewrite the past due to vested interests and avowed prejudices. Legislation can be used to prosecute hate crime and genocide denial, but it has also been created to protect the reputation of nation states and the inhabitants of countries previously occupied and oppressed by the regime of Nazi Germany. The crimes of the Holocaust are, of course, rightly seen mainly as the work of the Nazi regime, but there is a reality that some citizens of subjugated lands participated in, colluded and collaborated with those crimes, and on occasion committed crimes and atrocities against Jews independently of the Nazis. Others facilitated and enabled the Nazis by allowing industries to work with the Germans; some showed hostility,

indifference and reluctance to assist Jewish refugees, or, due to antipathy, apathy, greed, self-interest or out-and-out anti-Semitism they allowed or even encouraged barbaric and cruel crimes to take place. Survivors of the Holocaust often express a primary desire that lessons of the past must be learned in order to reduce the risk of similar crimes reoccurring. Yet anti-Semitism is still a toxin in the modern world, and racism and hostility to other communities – including those who suffer in or have fled war and oppression – can at times appear normalised and socially acceptable. This book seeks to explore aspects of the Holocaust as it is remembered and reflect ultimately on parallels with the world we live in today.

in Africa. Contributors show how distinctive forms of technological innovation can impact critical development processes. For example, disruptive technologies can deepen the ongoing democratic and governance waves in Africa, specifically in the area of contested elections. Similarly, innovations in agriculture, the environment and energy promote changes in value chain agriculture, and the use of sensors to manage e-waste and sustainable energy conservation are also transforming established practices.

Furthermore, the role of disruptive technologies and innovation in education, health, financial services and the nature of paid work cannot be ignored. Individually and collectively, the authors discuss and highlight the mechanisms and initiatives that can contribute to the realization of the development goals of African countries, especially in a period where disruptive technologies are rapidly changing how things are done. As a result, this book, which represents one of the most recent systematic

efforts to bring together dialogue on disruptive technologies in Africa, will be of particular use and benefit to a wide and an eclectic audience.

For more than sixty years, Bob Steele was the radio voice of Southern New England, entertaining listeners of WTIC AM with his wit and humor and an inimitable style that kept listeners faithfully tuning in to his morning show. Capturing the nation's highest market share, the National Radio Hall of Fame inductee maintained an unparalleled popularity through the latter half of the twentieth century. This first ever biography of Bob Steele details both the home life and the award-winning broadcasting career of this Connecticut media legend, from his humble Midwestern roots to the pinnacle of radio fame. PPP (public-private partnership) is a buzzword, especially in growing economies like India where it takes a partnership between the government and a private entity to establish successful infrastructural projects. However, PPPs in India face many hurdles that lead to either long delays or surprisingly, sometimes early completion of PPP projects, but with quality getting compromised. This book will take readers inside the world of PPPs and show how the

legal, regulatory and political environments have facilitated or obstructed the speedy enforcement of plans for the creation of requisite infrastructure in India. With the help of various case studies, the book discusses the legal and regulatory issues in different sectors of infrastructure in India such as power, telecom, rail, air, road and sea. In addition to discussing challenges faced by them, the book emphasizes that a proper legal framework with effective regulations is necessary to

monitor and regulate the creation and management of public goods. From funding to legal issues, Infrastructure, PPP and Law for Executives shows what it takes for the safe sailing for PPPs in India.

Written primarily from a managerial perspective, the book will be of interest to business managers, lawyers, government executives and anyone with serious interest in infrastructure development in India.

adaptation of children and adolescents to adverse and risky contexts in four Latin American countries: Argentina, Brazil, Chile and Mexico. The experience of growing up in contexts of poverty and social vulnerability is a risk factor for child and adolescent development which may produce a series of negative effects in their adulthood, including mental disorders. This is a global concern, but so far the majority of literature about the topic has focused on developed countries. This volume aims to enrich the

international literature by presenting results of research carried out in developing countries, showing how children and adolescents deal with adverse and risky contexts and analyzing both negative outcomes and the development of resilience and coping strategies. The studies gathered in this volume are theoretically grounded on systemic and ecological models which analyze developmental trajectories and outcomes taking into account the interaction of different ecological systems, such as the individual, the

family, the school and the wider society. Departing from this theoretical framework, the chapters in this volume analyze the risk factors posed to child and adolescent development by adverse and risky social contexts and present evidence-based interventions aimed at both preventing negative outcomes and helping children and adolescents develop coping strategies to deal with adverse situations, such as poverty and social marginalization. analysing its causes and the risks for the future of the global economy. This book takes an alternative approach which focuses on the legacy of the global financial crisis, what is remembered and what lessons have been drawn from it. This volume provides perspectives on this legacy from a variety of contributors including central bankers, regulators, politicians, academics, and journalists. They offer insight into what remains of the crisis in terms of public and industry awareness, changes to the post-2008 financial architecture, lessons from the national experiences of highly exposed small economies, and considers this legacy in terms of oversight and regulatory regimes. These diverse perspectives are drawn together here to ask how we can ensure that these lessons
