First published in 1937. The Book of Songs is a collection of ancient Chinese songs, dating from 800 to 600 B.C. Until this was published in 1937 it had not been translated into English since the middle of nineteenth century, when sinology was still in its infancy. For the first time the original meaning of 290 out of the 305 songs is given, use being made of the advances in the study of old Chinese. The result is not merely a clear picture of early Chinese life, but also the restoration to its proper place in world literature of one of the finest collection of traditional songs.

It's a Little Baby

100 Favorites

Twenty-five Favorites to Sing and Play

Preface: The numerous collections of American verse share, I think, one fault in common: they include too much. Whether this has been a bid for popularity, a concession to Philistia, I cannot say; but the fact remains that all anthologies of American Poetry are, so far as I know, more or less uncritical. The aim of the present book is different. In no case has a poem been included because it is widely known. The purpose of this compilation is solely that of preserving, in attractive and permanent form, about one hundred and fifty of the best lyrics of America.... This early work is an absorbing collection and still an interesting read today. Many of the earliest books, particularly those dating back to the 1900's and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.
