

AAT Elements Of Costing: Question Bank

The Synoptic Assessment Question Banks cover the assessable units for Level 2, providing short summaries to aid and test students before their synoptic assessments. Features include: assessment standard practice questions and answers, revision technique, hints and tips. Our materials and online equivalents will help ensure you are ready for your assessment and prepared for your career in accounting

Just as Jack Kerouac captured the beat of the '50s, his daughter captured the rhythm of the generation that followed: graceful, often disturbing detachment and a spellbinding gift for descriptive imagery, Jan Kerouac explores the tortured, freewheeling soul of a woman on her own road. From an adolescence of LSD, detention homes, probation, pregnancy, stillbirth in the Mexican tropics at age 15; to the peace movement in Haight-Ashbury and Washington state; to traveling through Central America with a madman for a lover, Baby Driver moves with the force of a tropical storm.

Strategic Management Accounting

Passcards

Cost Accounting For Dummies

Passcards provide all the knowledge required for the Financial Statements of Limited Companies unit. Passcards are A6, spiral bound revision aids which students can carry to revise wherever, whenever. Features include: topics presented in the same order as the Course Book, ability to focus on tricky syllabus areas, aid revision by giving clear, visual emphasis to key points, suitable for both paper and computer based exams. Our materials and online equivalents will help ensure you are ready for your assessments and prepared for your career in accounting.

* Challenging and provocative book * Shows how management accounting techniques can be integrated into the strategic decision making process * Extensive use of practical examples from a variety of contexts. An introduction to business strategy for management accountants, financial accountants or managers with an accounting orientation. The book places management accounting clearly within the context of strategic management of the business. Offers qualified accountants a sound introduction to strategic management, and with practical examples and mini-cases provided throughout, this book is comprehensive yet concise. Keith Ward addresses strategic

management accounting as a continuous process of analysis, planning and control. Management accounting is about supplying the right information to the right people at the right time, and this can only be expressed in the context of the business strategy and strategic plan. The implementation of appropriate management accounting systems to complement different strategies is discussed in detail. Applications and examples include multinational organizations, non-profit organizations and varying organizational structures. Finally the author covers methods of using management accounting for strategic advantage.

"This book has been written specifically to cover the Unit 'Using Accounting Software' which is mandatory for the following qualifications: AAT Foundation Certificate in Accounting - Level 2, AAT Foundation Diploma in Accounting and Business - Level 2, AAT Foundation Certificate in Accounting at SCQF Level 5. This book contains Chapter Activities which provide extra practice material in addition to the activities included in the Osborne Books Tutorial text, and Practice Assessments to prepare the student for the computer based assessments."--Front matter.

MANAGEMENT ACCOUNTING: COSTING

The Question Bank provides all the knowledge required for the Management Accounting: Costing unit. Question Banks allow students to test knowledge by putting theory into practice and refine exam technique. Features include: assessment standard practice questions and answers, guidance of revision technique, hints and tips. Our materials and online equivalents will help ensure you are ready for your assessments and prepared for your career in accounting.

This book deals comprehensively with the elements of cost accounting, their application to costing methods, and their significance for management through budgetary control, short term decision-making, and capital budgeting. It is an extensive revision of the author's well-known costing text, and provides the student with a complete introduction to cost accounting. Relevant exercises are included at the end of each chapter, with solutions at the end of the book. These include many from recent examinations of the major professional accountancy bodies. Teachers are thus able to use their own favourite examples in lecture or class, and to refer students to other exercises for further practice. Students who are unable to attend a regular course will be able to check their work against the solutions. A series of multiple choice questions throughout the book provides a further opportunity for the student to check personal progress. Other features of the book include: a complete introduction to cost accounting; new material on capital budgeting and cost accounting for service activities; an explanation of budgetary control including behavioural aspects; and graded questions and MCQs throughout (definitions follow CIMA terminology).

Having trouble getting the backing you need for your business plan? Waiting for calls to be returned that never are? Are the people you need

to talk to always "in meetings"? You're not alone. Too many business owners have been sold the myth that business plans are all about finance. But if you're not getting the cash you need, odds are it's nothing to do with your financial numbers. Any halfway competent accountant will have made sure those pass muster. Here's what's really happening - either investors and lenders don't believe your plan, or it isn't compelling enough to get to the top of their approval pile. Numbers alone do a poor job of fixing either of those problems. Rather, you need to convey your enthusiasm better and provide solid evidence you'll deliver on your business plan. How To Build A Better Business Plan is not about numbers or financial models. Instead, it focuses on exactly how to create a compelling and evidence-backed business plan which gives investors and lenders the confidence they need to say "yes". Inside this easy-to-follow, step-by-step action guide, you'll discover: -How investors and lenders really read a business plan...page 31 (spoiler: it's not how you think) -The real value of preparing a business plan - and this has nothing to do with raising finance...page 13 -How to handle the "awkward questions" you'd rather gloss over...page 36 -The one question on the mind of every potential investor or lender...page 156 -If you don't have enough of this you can kiss your business plan goodbye...page 83 -This is the biggest source of competition for most businesses...yet very few business plans set out what they're going to do about it...page 111 -And much, much more. You also get a free, downloadable "fill-in-the-blanks" business plan template, making sure you cover all the bases and don't miss any opportunities to secure the support you need. Get that right and you give investors and lenders the confidence they need to back you. Instead of you having to chase them, they'll be chasing you. People will come out their meetings to take your calls. You'll have them on your side right out of the starting gate. To achieve your dreams and ambitions you need a business plan which makes it easy for investors and lenders to say "yes". Why not start yours today? About the author Alastair Thomson started out as an accountant, but has since worked in CEO, Chairman and Independent Non-Executive Director roles, giving him a rare perspective from all sides of the business planning process. He has compiled, reviewed, advised on, presented or approved business plans for over 25 years as a senior executive and advisor for small and medium-sized businesses and multinational organisations.

The easy way to get a grip on cost accounting
Critical in supporting strategic business decisions and improving profitability, cost accounting is arguably one of the most important functions in the accounting field. For business students, cost accounting is a required course for those seeking an accounting degree and is a popular elective among other business majors. Cost Accounting For Dummies tracks to a typical cost accounting course and provides in-depth explanations and reviews of the essential concepts you'll encounter in your studies: how to define costs as direct materials, direct labor, fixed overhead, variable overhead, or period costs; how to use allocation methodology to assign costs to products and services; how to evaluate the need for capital expenditures; how to design a budget model that forecast changes in costs based on expected activity levels; and much more. Tracks to a typical cost accounting course
Includes practical, real-world examples
Walks you through homework problems with detailed, easy-to-understand answers
If you're currently enrolled in a cost accounting course, this hands-on, friendly guide gives you everything you need to master this critical aspect of accounting.

"This book has been written specifically to cover the Unit 'Elements of costing' which is mandatory for the following qualifications: AAT Foundation Certificate in Accounting - Level 2, AAT Foundation Diploma in Accounting and Business - Level 2, AAT Foundation Certificate in Accounting at SCQF Level 5, Certificate: Accounting Technician (Level 3 AATSA). The book contains a clear text with worked examples and case studies, chapter summaries and key terms to help with revision. Each chapter concludes with a wide range of activities, many in the style of AAT computer based assessments."--Page 1.
