**Peter Bornealprovides an interpretation of Nietzsche s philosophy as a whole in the context of 19th century philosophy of mind and cognition. Thestudy explains Nietzsche s notion of truth; his epistemology; his notions of the split and fragmented subject, ofmaster, slave, and priest; furthermore, it offers a new interpretation of the enigmatic eternal recurrence . It also suggests how important aspects of Nietzsche s thinking can be read as a sophisticated critique of ideology. "**

Everyman and Mankind are morality plays which mark the turn of the medieval period to the early modern, with their focus on the individual. Everyman follows a man's journey towards death and his efforts to secure himself a life thereafter, whilst Mankind shows a man battling with temptation and sin, often with great humour. Both texts are modernised here and edited to the highest standards of scholarship, with full on-page commentaries giving the depth of information and plays sign the birth of the early modern consciousness and puts them in their historic and religious contexts. An account is also given of the staging and performance history of the plays and their critical history and significance. With a wealth of helpful and incisive commentary this is the finest edition of the plays available.

**1. Atman is the Universal Self, the One Self in All, the Real Self. All else are reflections on heaving seas. 2. Atman is the soul of the spiritual man lit by its own light, the Nous Augoeides of the Neo-Platonists. 3. Woe for the living Dead, their glorious Augoeides have left them forever. 4. Atman is one with Paramatman. Buddhi, Atman’s vehicle, is part and parcel of the Dhyani-Chohanian Essence. 5. Contrary to current materialistic views, evolution proceeds along triple lines: Spiritual, Psychic, and Physical. 6. The key to the mystery of marriage is the union of Atman-Buddhi with Manas. Profane marriage is unholy and unworthy of the name. 7. Semitic Cosmogony materialises the mysteries of nature; the Aryan, spiritualizes matter while its physiology is always subservient to metaphysics. 8. No single rung of the ladder leading to Inner Wisdom can be skipped. No personality can ever reach or bring herself into communication with Atman, except through Buddhi-Manas. 9. Atman, our Lord and Protector, will show his full power only to those who can hear the “still small voice.” 10. When the bud of personality is crushed out, and the worm of sense destroyed past resurrection, the Lernaean Hydra of Separateness will vanish into thin air.**

*"Rome and the Literature of Gardens" explores the garden as a powerful locus of transformation and transgression in the "De Re Rustica" of Columella, the "Satires" of Horace, the "Annals" of Tacitus, and the "Confessions" of Saint Augustine. In keeping with the approach of this series, a concluding chapter examines the reincarnation of these expressions in the contemporary plays "Arcadia" and "The Invention of Love" by Tom Stoppard. Many books on gardens in ancient Rome concentrate on either technical agricultural manuals, or pastoral poetry, or the physical remains of Roman gardens. Instead, this book considers images of gardens from a kaleidoscope of genres, especially those that the Romans made their own: satire, annalistc history, and autobiography. This atypical approach makes a unique contribution to the field of Latin literature and garden history, bridging the gap between material culture and cultural history.*

*Does Descartes belong to metaphysics? What do we mean when we say "metaphysics"? These questions form the point of departure for Jean-Luc Marion's groundbreaking study of Cartesian thought. Analyses of Descartes' notion of the ego and his idea of God show that if Descartes represents the fullest example of metaphysics, he no less transgresses its limits. Writing as philosopher and historian of philosophy, Marion uses Heidegger's concept of metaphysics to interpret the Cartesian corpus—an interpretation strangely omitted from Heidegger's own history of philosophy. This interpretation complicates and deepens the Heideggerian concept of metaphysics, a concept that has dominated twentieth-century philosophy. Examinations of Descartes' predecessors (Aristotle, Augustine, Aquinas, and Suarez) and his successors (Leibnz, Spinoza, and Hegel) clarify the meaning of the Cartesian revolution in philosophy. Expertly translated by Jeffrey Kosky, this work will appeal to historians of philosophy, students of religion, and anyone interested in the genealogy of contemporary thought and its contradictions.*

**This book proposes an alternate theory of media evolution that accounts for the appearance of a new medium in the malpractice of older media. Smallest Mimes addresses complex issues of media transition, the inherent confusion of media definition by use of metaphor instead of phenomenological description, and the impact of individual media function and structure on both textual and imagistic content. Bringing together Majkut's past speculations on media, Smallest Mimes interweaves a general theory of media, a theory of historical media change and transmission, and a theory of media genesis in technological adequacy/inadequacy.**
