Tony 10 was the online betting username of Tony O'Reilly, the postman who became front-page news in 2011 after he stole €1.75 million from An Post while he was a branch manager in Gorey. He used the money to fund a gambling addiction that began with a bet of €1 and eventually rose to €10 million, leading to the loss of his job, his family, his home - and winning him a prison sentence. From the heart-stopping moments in a hotel room in Cyprus with his wedding money riding on the Epsom Derby, to the euphoria of winning half a million over a weekend, to the late goals and the horses falling at the last fence, Tony 10 is the story of an ordinary man's journey from normality to catastrophe. At times, he vowed to get out while he was ahead, only to be taken by another surge of adrenaline, falling deeper and deeper into a compulsion that consumed his life. His disappearance on the morning the fraud was discovered led to a surreal three days on the run in Northern Ireland, and ultimately his arrest, conviction and sentencing to four years in jail. Tony 10 is the mesmerising story of the secret life of a pathological gambler - as well as the most compelling account yet of the damage wrought by the online gambling industry.

Holistic Aromatherapy for Animals

It is only in recent years that aromatherapy, or essential oil therapy, has gained substantial acceptance; this is primarily due to French veterinarians who have begun using essential oils and hydrosols in their practices. Laypeople, of course, have been enjoying great success treating animals with the very same substances for many years; for it is not just the medical professionals who can safely and effectively administer these aromatic oils. Anyone enabled with quality essential oils or hydrosols and adequate knowledge can use a plant's most concentrated and energetic byproducts to improve the health of their animals, and treat and prevent various illnesses and common ailments. Aromatherapy is actually a science that has a much larger archive of supported scientific data than most other holistic care methods. However, most of these studies were originally published in French or German. Aromatherapy was the first natural, holistic therapy the author began using, and she relies on it as my primary form of healthcare to treat and balance all sorts of minor ailments and discomforts in the lives of her family and their pets. She has rarely needed to use any other sort of remedy to achieve the desired result. These powerful substances are the most fascinating, sensual and complex of all natural therapies -- a combination that proves to be so enthralling it eventually develops into a grand passion for many.

A mysterious legend, a locket, and the enchanted Scottish island of Kell become the thread that ties three haunting romance stories that span more than one thousand years. Reissue.

Dryland degradation and desertification now affect almost a billion people around the world. Tragically, the biological resources and productivity of millions of acres of land are lost to desertification each year because people remain unaware of strategies and techniques that could improve yields, reduce risk, and begin healing the world's deserts. A Guide for Desert and Dryland Restoration is the first book to offer practical, field-tested solutions to this critical problem. Author David Bainbridge has spent more than 25 years actively involved in restoring lands across the American Southwest. A Guide for Desert and Dryland Restoration presents the results of his years of fieldwork, as well as research and experience from scientists and practitioners around the globe. The book discusses the ecology of desert plants, explores the causes of desertification and land abuse, and outlines the processes and procedures needed to evaluate, plan, implement, and monitor desert restoration projects. It sets forth economical and practical field-tested solutions for understanding site characteristics, selecting and growing plants, and ensuring that they survive with a minimal amount of water and care. Each chapter represents a guide to a critical topic for environmental restoration; extensive photographs, diagrams and drawings give detailed information for immediate application, and additional resources are included in appendixes. A Guide for Desert and Dryland Restoration is the first comprehensive book focused on restoring arid regions, and clearly demonstrates that arid lands can be successfully rehabilitated. In addition to restorationists, the book will be an invaluable resource for anyone working in arid lands, including farmers, ranchers, gardeners, landscapers, outdoor recreation professionals, and activists.
