You wouldn't believe it, but . . . James Earl Jones, the voice of Darth Vader, grew up mute. Michael Jordan was cut from his high school basketball team. Albert Einstein was bullied mercilessly in school. Beethoven's mom almost aborted him. Life takes the strangest sharp turns--and sometimes, U-turns. Robert Petterson--popular speaker, storyteller, and author--has been a student for his entire life of what God is teaching us through those real-life U-turns. In this short book, he compiles amazing stories that teach lessons you won't easily forget. Each entry is written in the rest-of-the-story style popularized by Paul Harvey. Marvel at how God has used the lives of these ordinary people to change the course of human history. (Adapted from The One Year Book of Amazing Stories)

This book compiles the stories, stats, and facts of the world's most amazing knits, from a handknit Ferrari on display at the British Auto Show (knitting the car took 12 miles of yarn) to the American flag knit with utility poles and cranes—and everything in between (a plate of sushi; a handknit wedding, including the flowers and the cake; a cozy for a house). This will be a Guinness Book of World Records for knitters. Each entry features color photos, an explanation of how the object was made, and other interesting details, including how much yarn was used, how long it took to make, how many people contributed stitches, the project dimensions, and more.

With its enticing and colourful design and its fascinating information, this is a book that children will want to pour over—either at home, in the classroom or on a road trip. This book brings together 55 national parks, selected across all Australian states and territories, and over 120 animals. It is divided into seven sections according to habitat (woodlands and grasslands; forests; rainforests; arid zones; mountains; wetlands and waterways; coasts, oceans and islands), each including a number of national parks and a selection of the fish, reptiles, frogs, birds and mammals that inhabit them. At the end of the book is a section on 'little critters'—beetles, spiders, butterflies, grasshoppers, bugs and so on. Each habitat section opens with photographs of the featured national parks and a description of the habitat. Each animal has its own page, which has a stunning colour photograph of the species, a map of its distribution range, its conservation status and scientific information about the species. The information is divided into the following sections: 'Fast Facts' gives you all the vital statistics, such as size, lifespan and number of young; 'Where Does It Live?' tells you where in Australia you can find the species and provides details about its home; 'What's Its Life Like?' tells you a bit about how the animal moves, behaves, eats and has young; and 'Interesting Info' has quirky and fascinating facts. This book features a foreword by the Governor-General of Australia, Sir Peter Cosgrove.
