Are you in search of Financial Freedom? So is the right time to learn about passive income... If you are an employee, a contractor, or they pay you an hourly rate, this book will radically change the way you see the money and income you receive from your work activity. Passive income is money or resources that you can receive periodically from systems that work autonomously or semi-autonomously. Passive income is also known as income, profit or residual income. When you use passive income generating systems, the money flows continue to arrive regardless of whether you are performing a job or not during a particular period. On the contrary, the active income (product of salaries, payment of contracts or quotas per hour) disappears very quickly once you stop working actively: If the company dismisses you, you run out of payroll. If you do not meet your contracts in time, there are no payments. If you do not serve your customers, you do not receive your fees. When you work as an employee, the value you generate is given to only one person (your boss) and therefore, is the only person who pays you. It's like having a business with a single client (very risky, by the way). When you work with passive income systems, you can share the same value you generate with many people. If what you produce is useful, more people will want to pay to obtain it. The more skillful you become producing and delivering value to people, the higher your passive income streams will be. Passive income is not a scheme that promises to turn you into a millionaire overnight (although it is a favorite of rich people), but it does offer you a much smarter method to work and make money. The construction of income generating systems is hard work, but the results are fantastic. Passive income is based on powerful concepts such as value creation, service to people, generosity and your continuous personal development. Your Ultimate Guide to Financial Freedom

Create wealth and become financially independent through Profitable Investments Virtually everyone would like to generate wealth, yet very few know how to start doing so. Financial freedom is a concept that has been talked about a lot lately. It is clear that most people want to be financially free, although there is no unanimity when it comes to addressing this issue. I'll explain myself. On the one hand, there are persons who think that being financially free is a myth, a legend, and unattainable, that is, something that would be fine but who doubt that it can be achieved. On the other hand, there are others that claim to have the keys and secrets to achieve it, but when you listen to them, all they offer are obvious things like saving more or not spending on what is not strictly necessary. Finally, there are people who have abandoned their jobs for someone else and have become self-employed, believing that this is the way that will free them from economic problems, which obviously does not have to be the case. What do I think? My position is that financial freedom is a perfectly achievable state and to achieve it, you have to devise and implement a specific strategy that will help you achieve it. I don't think it's a myth, nor do I think it can be achieved by just saving more or by self-employment. It is a reality that you can incorporate into your life if you put yourself to it with the necessary knowledge and teachings. For me, financial freedom is the state in which you live away from worries about money, since you have reached the state in which you have transcended them. Why? Because your level of income is higher than your level of expenses and in this way, you have enough means to live a satisfactory, full and abundant life from an economic point of view. Not only that; ideally, it would be the state in which you can live without what most people would call work, that is, without having to go to a certain place to do some things in exchange for a certain amount of money. And this is because the income you receive, thanks to the system you have established and which you will discover in this book, allows it without major problems. And is that possible? Of course, yes, as you will discover in this book. The strategy to achieve this status is to create a diversified system of passive income that operating in automatic or quasi-automatic mode, provides you with recurring and constant income without the need to be physically present. The key is in the concept of passive income, which Larry K. Halford shared in this guide. Larry K. Halford, an expert in investment will show you simple ways to invest your money to create passive income that once your initial investment has been created, the income is received constantly and periodically without the need to do anything else. You invest your time (or your money) only once and you begin to receive the income for life (or almost). In this book, you will learn: Why you need to invest in investment funds The different types of investment funds you need to know How to invest in investment funds How investment funds work How to invest in index funds And much more.... Are you ready to discover how to invest your money to create wealth and passive income and gain financial freedom? Then take the first step today! Passive Prosperity Forever

Ever wondered why the rich get richer and the poor get poorer? One major reason is that the poor work for money while the rich have money work for them. While the poor work every day to make a living, the rich do the bulk of the work once and continue to reap the fruit of their work for a very long time. By the time they get old, the poor man no longer has the same amount of energy as before and his productivity drops. This automatically affects his income and he begins to depend on others for survival. The rich man on the other hand has been able to build several streams of passive income which keep bringing in money to him. Passive income is income that you earn with little or no effort. It is often called residual income because the bulk of the work is done once while little extra effort may be required to keep it running. There are also some that require no additional effort. The money just keeps flowing. Any work that involves your active participation cannot be regarded as passive income. Passive income is a good tool to use to build wealth. The good part is that with the little extra effort, your returns are huge. As long as the proper system is in place, you can keep increasing it with a multiplier effect on your earnings. While there are several streams of passive income, we will only take a look at the most popular and most profitable of them. These are real estate, intellectual property, automated business and marketing. The key thing about real estate is location. You need to carefully choose your location with foresight. You should estimate the potential gains vis-a-vis the cost to know whether it will be worth the while. For intellectual property your content must be original. People pay for good products and anything they enjoy. You also get to earn more when you prove that you can reproduce the same thing over again. The raw material you need is your mind which you already have. Do you know your business does not have to be subsistence? You can build a business up such that it runs by itself. The secret to this is automation. Automation allows you to have a business while you still keep your 9-5 job or do other things that are important to you. Before you start marketing you would need to do your due diligence to be sure of the kind of company you are recommending. This will also determine your ability to earn for a long period while maintaining your integrity. Since you talk to people every day, thus selling your opinion and idea on issues, sales should not be a big deal. Do not sit down with only your active income. The residual nature of the passive income streams can help you realize your dream of sustainable wealth faster and better. Write your plan today
