An estimated 5 million Americans suffer from obsessive-compulsive disorder (OCD)

and live diminished lives in which they are compelled to obsess about something or to repeat a similar task over and over.

Traditionally, OCD has been treated with Prozac or similar drugs. The problem with medication, aside from its cost, is that 30 percent of people treated don't respond to it, and when the pills stop, the symptoms invariably return. In Brain Lock, Jeffrey M. Schwartz presents a simple four-step method for overcoming OCD that is so effective, it's now used in academic treatment centers throughout the world.

Proven by brain-imaging tests to actually alter the brain's chemistry, this method doesn't rely on psychopharmaceuticals. Instead, patients use cognitive self-therapy and behavior modification to develop new patterns of response to their obsessions. In essence, they use the mind to fix the brain. Using the real-life stories of actual patients, Brain Lock explains this revolutionary method and provides readers with the inspiration and tools to free themselves from their psychic prisons and regain control of their lives.

In the first book to fully examine obsessive bad thoughts, Dr. Lee Baer combines the latest research with his own extensive experience in treating this widespread syndrome. Drawing on information ranging from new advances in brain technology to pervasive social taboos, Dr. Baer explores the root causes of bad thoughts, why they can spiral out of control, and how to recognize the crucial difference between harmless and dangerous bad thoughts. An illuminating and accessible guide to the kinds of thoughts that create extreme fear, guilt, and worry, *The Imp of the Mind* provides concrete solutions to a tormenting and debilitating disorder. has worked with psychiatrist Rebecca Gladding to refine a program that successfully explains how the brain works and why we often feel besieged by bad brain wiring. Just like with the compulsions of OCD patients, they discovered that bad habits, social anxieties, self-deprecating thoughts, and compulsive overindulgence are all rooted in overactive brain circuits. The key to making life changes that you want-to make your brain work for you- is to consciously choose to "starve" these circuits of focused attention, thereby

poignant memoir by a young woman about her childhood battle with debilitating obsessive compulsive disorder, and her hard-won journey to recovery. By the age of thirteen, Lily Bailey was convinced she was bad. She had killed someone with a thought, spread untold disease, and ogled the bodies of other children. Only by performing an exhausting series of secret routines could she make up for what she'd done. But no matter how intricate or repetitive, no act of penance was ever enough. Beautifully written and astonishingly intimate, *Because We Are Bad* recounts a childhood

consumed by obsessive compulsive disorder. As a child, Bailey created a second personality inside herself—"I" became "we"—to help manifest compulsions that drove every minute of every day of her young life. Now she writes about the forces beneath her skin, and how they ordered, organized, and urged her forward. Lily charts her journey, from checking on her younger sister dozens of times a night, to "normalizing" herself at school among new friends as she grew older, and finally to her young adult years, learning—indeed, breaking through—to make a way for herself in a big, wide world that

obsessive-compulsive disorder (OCD) and his hard-won recovery. Rewind, Replay, Repeat is the revealing story of Jeff Bell's struggle with obsessive-compulsive disorder (OCD) and his hard-won recovery. Nagging doubt: It's a part of everyday life. Who hasn't doubled back to check on a door or appliance? But what if one check wasn't enough? Nor two or three? And what if nagging doubt grew so intense that physical senses became all but useless? Such was the case for Bell, a husband, father, and highly successful radio news anchor--and one of the millions of Americans living with

obsessive-compulsive disorder (OCD). His fascinating memoir recounts the depths to which this debilitating anxiety disorder reduced him--to driving his car in continuous circles, scouring his hands in scalding water, and endlessly rewinding, replaying, and repeating in his head even the most mundane daily experiences. Readers will learn what OCD feels like from the inside, and how healing from such a devastating condition is possible through therapy, determination, and the support of loved ones.
