We spend large portions of our lives working. The purpose is to exchange our time and expertise for the opportunity to lead the lives we desire. However, work alone does not confer the ideal life. Integration with a budget - i.e. wise decision making, planning, and discipline - reigns imperative. A budget is an estimate of income and expenditure for a set period of time.

This process increases the likelihood of exchanging your opportunities into successes - by knowing the necessary information and planning accordingly. Therefore, you owe it to yourself to budget if you truly want to achieve the life you desire. To budget is to plan; to plan is to value your impact on the circumstances.The mechanics of budgeting follow the well-known practice of shifting thoughts to actions and values. We know that practices such as setting yearly goals, creating vision boards, and surrounding yourself with like-minded people lend to reaching greater success than the contrary. Yet, many ditch these tried and true principals in favor of just hoping that everything will work out. While positivity goes a long way, coupling the positivity with right planning gives a push in the right direction.The ultimate desire is to lead a life full of happiness and contentment. This is possible when a sense of balance exists.

Since all decisions are connected, our priorities, values, perceptions, habits and circumstances all impact the usefulness of our budget. Being in control of our personal path is the goal.

How important are your goals? You decide.
