Tartares and Carpaccios

Bartolomeo Scappi (c. 1500-1577) was arguably the most famous chef of the Italian Renaissance. He oversaw the preparation of meals for several Cardinals and was such a master of his profession that he became the personal cook for two Popes. At the culmination of his prolific career he compiled the largest

cookery treatise of the period to instruct an apprentice on the full craft of fine cuisine, its methods, ingredients, and recipes. Accompanying his book was a set of unique and precious engravings that show the ideal kitchen of his day, its operations and myriad utensils, and are exquisitely reproduced in this volume. Scappi's Opera presents more than one thousand recipes along with menus that comprise up to a hundred dishes, while also commenting on a cook's responsibilities. Scappi also included a fascinating account of a pope's funeral and the complex procedures for feeding the cardinals during the ensuing conclave. His recipes inherit medieval culinary customs, but also anticipate modern Italian cookery with a segment of 230 recipes for pastry of plain and flaky dough (torte, ciambelle, pastizzi, crostate) and pasta (tortellini, tagliatelli, struffoli, ravioli, pizza). Terence Scully presents the first English translation of the work. His aim is to make the recipes and the broad experience of this sophisticated papal cook accessible to a modern English audience interested in the culinary expertise and gastronomic refinement within the most civilized niche of Renaissance society.

The Table

DOE/CS.

For too long, tartares and carpaccios have been thought of as just meat, but this books

shows that other ingredients - including seafood, fruits and vegetables - can also be used. The combinations of flavours and ingredients should lead you to experiment with your own textures and tastes.

Harvest of the Cold Months

L'arte et prudenza d'un maestro Cuoco (The Art and Craft of a Master Cook)

'A splendid tale of human ingenuity in the service of taste, sedulously researched and told with great flair.' Loyd Grossman Sunday Times Author of such cookery classics as *Italian Food and French Provincial Cooking*, Elizabeth David (1913-1992) found that the literature of cookery, as well as the practical side, was of absorbing interest, and she studied it throughout her life. *Spices, Salt and Aromatics in the English Kitchen* was published in 1970, followed by *English Bread and Yeast Cookery*, for which she won the Glenfiddich Writer of the Year award, in 1977. At the time of her death in 1992 she was working on this equally epic study of the use of ice, the ice-trade and the early days of refrigeration, which was published posthumously in 1994 as *Harvest of the Cold Months*. *'An awe-inspiring feat of*

detective scholarship, the literally marvellous story of how human beings came to ingest lumps of flavoured frozen matter for pleasure ... There is much, much more - about the making and breaking of reputations, the founding of Parisian café culture, the great and rivalrous confectioners of eighteenth- and nineteenth-century London, about Russian ice-cream (surprisingly superior) and Persian sherbets ... sumptuous.' Independent on Sunday 'This survey of the use of ice in cookery takes us on a fascinating journey from 1581, where in Florence they put snow in the wine glasses, to that modern phenomenon, the growth of the ice-cream business. A scholarly social history, which makes a fitting finale to the work of the greatest of our writers on foods and its contexts.'

The Opera of Bartolomeo Scappi (1570)

The history of artificial cold has been a rather intriguing interdisciplinary subject (physics, chemistry, technology, sociology, economics, anthropology, consumer studies) which despite some excellent monographs and research papers, has not been

Bookmark File PDF Costesine Musetto E Soppressa I Doni Del Maiale Alla Maniera Nostra

systematically exploited. It is a subject with all kinds of scientific, technological as well as cultural dimensions. For example, the common home refrigerator has brought about unimaginably deep changes to our everyday lives changing drastically eating habits and shopping mentalities. From the end of the 19th century to the beginning of the 21st century, issues related to the production and exploitation of artificial cold have never stopped to provide us with an incredibly interesting set of phenomena, novel theoretical explanations, amazing possibilities concerning technological applications and all encompassing cultural repercussions. The discovery of the unexpected and “bizarre” phenomena of superconductivity and superfluidity, the necessity to incorporate macroscopic quantum phenomena to the framework of quantum mechanics, the discovery of Bose-Einstein condensation and high temperature superconductivity, the use of superconducting magnets for high energy particle accelerators, the construction of new computer hardware, the extensive applications of cryomedicine, and the multi billion industry of frozen foods, are some of the more dramatic instances in the history of artificial cold. ?
