The Mental capacity Act 2005 provides a statutory framework for people who lack the capacity to make decisions for themselves, or for people who want to make provision for a time when they will be unable to make their own decisions. This code of practice, which has statutory force, provides information and guidance about how the Act should work in practice. It explains the principles behind the Act, defines when someone is incapable of making their own decisions and explains what is meant by acting in someone's best interests. It describes the role of the new Court of Protection and the role of Independent Mental Capacity Advocates and sets out the role of the Public Guardian. It also covers medical treatment and the way disputes can be resolved.

Concise overview of the laws relating to the supply, administration and prescribing of medicines. User-friendly format for easy reference on the job, or a handy revision aid. Highly practical with case studies throughout to demonstrate application of theory into practice and revised and updated to reflect current law. This book is intended for all health professionals who are likely to be involved in the dispensing, administration, prescribing or supply of medication, whether in hospitals or in the community. It may also be of assistance to others, such as health service managers, patient groups and their representatives, lecturers and clinical supervisors. Each chapter uses a situation to illustrate the relevant laws so that the law can be explained in a practical jargon-free way. The book is intended to introduce readers to the basic principles which apply and the sources of law, so that they can, by following up the further reading and websites provided, add to their knowledge. This book will provide a baseline on which readers can develop their knowledge and understanding of the law relating to medicines.

Practice issues surrounding the legal concept of capacity are of fundamental importance to social work. The profession is committed to maximizing service users' autonomy yet vulnerable people may be at risk of abuse or injury if they exercise complete independence - so practitioners need to know in what situations it is appropriate

for that autonomy to be curtailed. This accessible and practically-grounded text equips social workers with the legal knowledge needed to work effectively with some of the most vulnerable people in society. It explores capacity in relation to minors, vulnerable adults and mental health, as well as covering complex issues such as refusal to accept treatment and deprivation of liberty. The book goes on to explore the different legal mechanisms that are available for promoting autonomy and safeguarding people's interests. The text is supported by a range of innovative features and boxed information to aid learning and stimulate reflection: - Key Case Analysis boxes summarize the details of particular legislation cases and outline the implications for social work practice. - Practice Focus boxes apply legal principles and processes to practice through the use of social work scenarios. - On-The-Spot Questions reinforce understanding and encourage critical reflection

Working with the Mental Capacity Act 2005

Doctors, lawyers and other professionals often need to make an assessment of a person's mental capacity. This book helps to support these professionals by giving them a fuller understanding of the law in all situations where an assessment of capacity may be needed, clarifying the roles of professionals and providing an aid to communication both between them and with the person being assessed. Written by experts from a variety of disciplines, Assessment of Mental Capacity combines a precise statement of the law with a practical, jargon-free approach to provide guidelines on a range of issues, from capacity to form intimate personal relationships, to capacity to consent to medical treatment. The fourth edition has been updated and expanded to take account of:- recent case law and current good practice- revision of the Mental Health Act 1983 Code of Practice- the rising prominence of the United Nations Convention on the Rights of Persons with Disabilities. It provides an essential source of guidelines and information, including extracts from Mental Capacity Act 2005 and the Code of Practice, and is an indispensable tool for health and legal professionals. An overview of important current subjects in old age psychiatry, demonstrating the depth and breadth of the speciality. Written specifically for Approved Mental Health Professionals (AMHPs), this book brings together key elements of the legislation, Code of Practice, Memorandum, Government Circulars and relevant case law and policy. It also discusses the role of an AMHP in the revised Mental Health Act, as well as the Key Competencies. This fully-revised fourth edition analyses updated legislation, case law and policy, while recent changes and cases covered include: - The revised English Code of Practice to the Mental Health Act - The revised Reference Guide to the Mental Health Act - A number of

cases concerning the nearest relative - Clarification on personal accountability of the AMHP - Revisions to the tribunal report requirements in England - The impact of the Cheshire West case decisions in the Supreme Court An essential guide for practising AMHPs or those currently in training, this book contains extensive appendices which cover Mental Health Act Assessments, Practice Directions (first tier tribunal) and the AMHP Regulations for both England and Wales. It also includes checklists, case studies and exercises to aid practice and learning.

This Code of Practice is a reference tool for those dealing with, and caring for people admitted to hospital and care homes with mental health problems. Authored by the Department of Health and produced following wide consultation with those who provide and receive services under the Mental Health Act, this publication will come into force on 3 November 2008. Through the Mental Health Act 2007, the Government has updated the 1983 Act to ensure it keeps pace with the changes in the way that mental health services are - and need to be - delivered. This publication provides guidance and advice to registered medical practitioners, approved clinicians, managers and staff of hospitals, and approved mental health professionals on how they should proceed when undertaking duties under the Act. It also gives guidance to doctors and other professionals about certain aspects of medical treatment for mental disorder more generally. The Mental Health Act Code of Practice is also aimed at all of those working in primary care, Mental Health Trusts, NHS Foundation Trusts as well as solicitors and attorneys who advise on mental health law. The Code should also be beneficial to the police and ambulance services and others in health and social services (including the independent and voluntary sectors) involved in providing services to people who are, or may become, subject to compulsory measures under the Act. It will also be a guide for those working with people with specific mental health needs such as those in nursing and care homes, and those in prison.

The Care Act 2014 has been criticised for the lack of a clear process for professionals to follow. With its emphasis on the personal individual approach to safeguarding, professionals have sometimes felt unclear as to how they should deliver safeguarding support. Written by a practitioner, with an academic background, Safeguarding Adults Together seeks to provide that vital guidance. Whilst there is an absence of process in the Act, there is still a clear set of safeguarding elements which when put together provide a framework of operation for professionals to become more effective in their safeguarding practice. Professionals tend each to look at a particular aspect of safeguarding, but it is only when the whole framework is demonstrated can practitioners understand how they can best provide good safeguarding support to adults who need their help. This book provides the reader with that knowledge and understanding about how adult safeguarding works by translating the Care Act into practice. This is a follow book to the successful The Social Worker's Guide to the Care Act 2014 by Pete Feldon ISBN 9781911106685. Safeguarding Adults: provides a unique safeguarding framework approach that explains what adult safeguarding is and how it works. includes memorable illustrations that explain difficult complex elements of safeguarding is packed with practice case studies and examples to support understanding of safeguarding and application of knowledge and skill.

The Mental Capacity Act 2005 provides a statutory framework for acting and making decisions on behalf of individuals who lack the mental capacity to do so for themselves. It introduced a number of laws to protect these individuals and ensure that they are given every chance to make decisions for themselves. The Act has recently been supplemented with new provisions pertaining to those who need to be accommodated under care and treatment regimes that may have the effect of depriving them of their liberty, but who lack the capacity to consent. This Code of Practice provides guidance and information for professionals implementing the deprivation of liberty safeguards legislation on a daily basis. In some cases, this will be paid staff, in others, those who have been appointed by law to represent individuals who lack capacity to make decisions for themselves (such as deputies or donees of a Lasting Power of Attorney). The Code incorporates good practice and demonstrates how the principles of the Act can be applied to those who have been deprived of their liberty for their own safety, or for the safety of others.

"This publication is designed to assist United Nations staff who provide human rights advice to States, which undertake to amend an existing constitution or write a new one. It should also be of use to States that undertake constitutional reform, including political leaders, policymakers, legislators and those entrusted to draft constitutional amendments or a new constitution. Further this publication should also facilitate advocacy efforts by civil society to ensure that human rights are properly reflected in constitutional amendments or new constitutions. Finally, this publication, along with the international human rights instruments, should not only provide a standard to measure whether constitutional amendments or a new constitution has appropriately reflected human rights and fundamental freedoms, but also assist in evaluating whether the processes used in constitutional reform are consistent with international procedural norms"--Introduction, page 1.

The Mental Health Act 1983 is the most important legislation affecting mental health services. Its central purpose is to provide for the detention and treatment of people with mental disorder in hospital. This book provides an explanation of the legislation.

This booklet is for anyone concerned about another person's capacity to make decisions. It explains the principles of the Mental Capacity Act, which can help you to assess the person's decision making ability. Information is also provided on applying to the Court of Protection, which may be necessary in order to make decisions on their behalf.

Practical Social Work Law: analysing court cases and inquiries presents legal issues associated with social work in an accessible format. It approaches the law in a way that is less daunting and more engaging by examining actual court cases and public inquiries, and explores the stories of real people and the legal and ethical dilemmas practitioners will face. The text adopts a problem-centred approach to learning by introducing the reader to key aspects of the law through a series of real-life situations; it addresses basic principles regarding the operation of the law and explores the lessons for good practice. Each chapter addresses a specific area of social work law including family breakdown, safeguarding children, youth justice, adults with disabilities, mental health and mental capacity. Landmark cases, cases drawn from the lower courts, tribunals, and ombudsman's decisions are included throughout presenting an accessible account of the application of the law.

Practical Social Work Law is an essential text for undergraduate, postgraduate and recently qualified social workers who are wrestling with the complexity of the law and the professional dilemmas it poses for their practice. "This book is unusual for a law book in that it is not only a reference book but also a very readable volume...[It] is set out clearly and provides a sound basis for student social workers new to the law and a refresher for qualified practitioners."
