This book provides a reassessment of the significance of Max Weber's work for the current debates about the institutional and organizational dynamics of modernity. It re-evaluates Weber's sociology of bureaucracy and his general account of the trajectory of modernity with reference to the strategic social structures that dominated the emergence and development of modern society. Included here are detailed analyses of contemporary issues such as the collapse of communism, fordism, coporatism and traditionalism in both Western and Eastern societies. All of the contributors are scholars of international repute. They undertake analyses of Weber's texts and his broader intellectual inheritance to reassert the centrality of Weberian sociology for our understanding of the moral, political and organizational dilemmas of late modernity. These analyses challenge orthodox readings of Weber as the prophet of the iron cage. Instead they offer interpretations of his work which emphasize the reality of modernity as a dual process with the potential for both

*disarticulation of rational structures and deeper colonization of daily life. Not only is this book essential reading for Weber specialists but it also provides compelling analyses of modernity and the inherently contingent nature of global cultural and structural transformation. **The story begins with the discovery of a skeleton in the woods behind a small New England college during the Thanksgiving holiday. The medical examiner informs the police that the victim was definitely male, definitely murdered, but not the person whose wallet was found with the body. The Dean of Students becomes a suspect in the eyes of Lieutenant Harding, who is in charge of the investigation. But the Dean disappears, his study is ransacked, and he is found murdered. The investigation takes the reader from Boulder, Colorado to the mountains of Canada. The Boston police almost catch up to the perpetrator, but he slips through their net, and begins a run through Maine and into Vermont.**

*Remembering Mass Violence breaks new ground in oral history, new media, and performance studies by exploring what is at stake when we attempt to represent war, genocide, and other violations of human rights in a variety of creative works. A model of community-university collaboration, it includes contributions from scholars in a wide range of disciplines, survivors of mass violence, and performers and artists who have created works based on these events. This anthology is global in focus, with essays on Africa, Asia, Europe, Latin America, and North America. At its core is a productive tension between public and private memory, a dialogue between autobiography and biography, and between individual experience and societal transformation. Remembering Mass Violence will appeal to oral historians, digital practitioners and performance-based artists around the world, as well researchers and activists involved in human rights research, migration studies, and genocide studies.*
