Marco Pellitteri examines the growing influence of Japanese pop culture in European contexts in this comprehensive study of manga, anime, and video games. Looking at the period from 1975 to today, Pellitteri discusses Super Mario, Pokémon, kawaii, Sonic, robots and cyborgs, Astro Boy, and Gundam, among other examples of these

Computer graphics is the difference between Steamboat Willie and Buzz Lightyear, between ping pong and PONG. It began in 1963 when an MIT graduate student named Ivan Sutherland created Sketchpad, the first true computer animation program. Sutherland noted: "Since motion can be put into Sketchpad drawings, it might be exciting to try making cartoons." This book, the first full-length history of CG, shows us how Sutherland's seemingly offhand idea grew into a multibillion dollar industry. His story features a memorable cast of characters—math nerds, avant-garde artists, cold warriors, hippies, video game enthusiasts, and studio executives: disparate types united by a common vision. Sito shows us how fifty years of work by this motley crew made movies like Toy Story and Avatar possible.
