

Lost In The Lake (Dr Samantha Willerby Series Book 2)

Luke and his father, who is disgusted by the tourists surrounding the once secluded lake of his childhood, hike deeper into the wilderness to find a "lost lake" of their own.

Fires, hurricanes, neglect and progress erased much of Lake Charless physical history. The young town was a magnet for pirates and privateers, like the infamous Jean Lafitte, who conducted business at the mouth of what is today called the Contraband Bayou. Michigan Men, creoles and cowboys made their way to the fledgling Louisiana town to start new lives. A great lumber industry shaped the town in the nineteenth century. Streetcars ran routes around the clock seven days a week. Author and historian Adley Cormier delves deep into Lake Charless past to uncover a history that has been lost to time and change. After surviving a car crash that left her companions dead, a woman must recover her memory—and keep her own secrets hidden—in this gripping thriller. When a

car crash sends a group of musicians plunging into a lake, the sole survivor is amateur viola player Rosie Chandler. Though she is unable to recall the event, Rosie is convinced it was no accident. Now she's seeing Dr. Samantha Willerby, a London-based clinical psychologist, to piece together the shards of her broken memory. But even as Rosie tries to uncover the truth, she has something to hide . . . Sam is immediately drawn to the tragic Rosie. But as she helps her recover her memories, the police find disturbing evidence—evidence that raises new questions about Rosie. And when Rosie insists they return to the lake to relive the fatal incident, it will be Sam who is seriously out of her depth . .

It happens one morning - Kate finally wakes up from the slumber she's been in since her husband's death a year ago. Feeling a fresh sense of desire to take control of her and her young daughter's life, she decides to visit Suley, Georgia - home to Lost Lake. It's where Kate spent one of the happiest summers of her life as a child. She's not sure what she expects to find there, but it's not a rundown place full of ghosts and other curious oddities. Kate's Aunt Eby, Lost Lake's owner, wants to sell the old place and move on. Lost Lake's magic is gone. As Kate discovers that time has a way of standing still at Lost Lake, can she bring the cottages - as well as her heart and the hearts of all the guests - back to life? Because sometimes lost loves aren't really lost. They're just waiting for you to find them again.

and sabre-tooth felines is almost a daily occurrence. Ab may be the smallest and ugliest Sasquatch in the clan, but blessed with a human mind, he is by far the smartest, bravest and most dangerous member of the clan. Shunned for his 'physical deformities' and often barred from many clan 'rights', Ab becomes a loner whose life is dedicated to protecting the less intelligent members of his clan in hopes of someday gaining full acceptance within the clan. That is until his Sasquatch mother reveals to him with her dying breath he is not 'clan'. He comes from the far off and forbidden land of the 'Hairless Others'. That is why he looks so different from the rest of the clan. She stole him from his true mother when he was an infant just before she died. She tells him his world is through the forbidden crack in the rock and tells him he should go home. Go back to the world he came from. Shocked and confused over this knowledge and devastated over the loss of the only mother he has ever known, Ab finds this forbidden entrance between their two worlds. A dark tunnel through a massive mountain filled with numerous deadly hazards. Stark naked, Ab emerges into the world he was born too, only now as a muscular cross between a caveman and total wild man. A marvel to modern man he is the focal point of numerous scientific and research teams who want to study him. DNA tests along with finger and foot printing reveals his true identity. The son of billionaire parents who own a powerful electronics manufacturing business and who had been accused of and believed to have killed their son as an infant even though they remained steadfast in their story a Sasquatch had stolen him. Sought after and hunted by professional big game hunters for the pure blood sport, it is modern man against prehistoric man in a battle of wits and determination.

A drive through the area of Lancashire inland from the seaside resort of Southport takes you through miles of fertile agricultural land dotted with farms and smallholdings. Road signs pointing to such places as 'Mereside', 'Mere Brow' and 'Mere Sands Wood' suggest the origin of these peaty soils, because in the seventeenth century this was the site of the largest lake in England. Martin Mere began as a depression in the glacial drift which filled with water as the ice from the last Ice Age retreated, and over its long history the land and the lake have contested the area as water levels have risen and fallen. Although it was drained in 1697, the Mere continued to reappear after periods of heavy rainfall until as recently as the early 1950s. This fascinating book tells the story of Martin Mere both in terms of its geomorphology and natural history and from the standpoint of the people who have made their homes and their living on its banks. Drawing on archive material and published sources, the authors describe the origins and prehistory of the Mere before examining the various

efforts to drain it for usable land. The place-names, traditions and inhabitants of the Mere are also considered, and the book closes with speculations on what the future might hold for Lancashire's lost lake. Book jacket.

Comprehensive climbing approach, route guides to Washington's Cascades.

For thousands of years, the broad expanse between Sumas and Vedder Mountains east of Vancouver lay under water, forming the bed of Sumas Lake. As recently as a century ago, the lake's shores stood four miles across and six miles long. During yearly high water, the lake spilled onto the surrounding prairies; during high flood years, it reached from Chilliwack into Washington State. Then, through the 1920s, a network of dykes, canals, dams and pumphouses was erected and the lake drained--"reclaimed" in the words of

projects supporters. A new landscape was created, a seemingly 'natural' prairie carved up into productive farmland. Today, few people are aware that Sumas Lake ever existed. The only reminder is a plaque erected on the old lakeshore, at a rest-stop along the Trans-Canada Highway just east of Whatcom Road, on the historic trail blazed to BC's gold fields. Yet for millennia, Sumas Lake was a dynamic, integral part of the region's natural and human landscape. In his new book, Before We Lost the Lake, Chad Reimer sets out to truly reclaim Sumas Lake, to restore it to its proper place in the history of the Fraser Valley, BC and the Northwest Coast. Drawing on extensive primary material, Reimer reconstructs the life history of Sumas Lake from the glacial age through the lake's demise and after. Before We Lost the Lake examines the lake's natural history and ecology, its occupation and use by the Sema: th and other First Nations, its colonization by White immigrants, the environmental changes brought about by introduced plants and animals, and the campaign to drain it. Drainage proponents had their way and gradually the promised benefits were realized. But these benefits came at a heavy cost to the environment and for the Sema: th, whose traditional way of life was irretrievably lost.
