active technology teachers using the program. Extras include wall posters to explain basic concepts, suggestions for keyboarding standards, discussion of how to integrate Web 2.0 tools into the classroom curriculum and the dozens of online websites to support classroom subjects.

Step by step computer learning is a Windows 7 and Office 2013 based series. It is a revised series of eight books for Classes 1 to 8. It covers a wide array of topics which are relevant and useful. The books in this series are written in a very simple and easy to understand language. The clearly guided steps make these books sufficient for self-study for children

All Elaine Chan has ever wanted is a loving husband and a houseful of children. But when her almost-fiancé unceremoniously dumps her after a

humiliating episode involving childhood enemies, condoms and puking, Elaine realizes that a change is in order. Armed with an article promising to show her how to re-invent herself in just 5 easy steps, Elaine finds herself on a one-way coach ride to a new life, a new future, a new her. But the complete makeover of Elaine is an arduous process, and is threatened with derailment by distractions like the mystery of the neighbour's vanishing Indonesian maid, with which Elaine finds herself strangely obsessed. Her efforts to keep all the balls in the air as she plays glamour-puss, model girlfriend (to Evan, a hotshot young lawyer from work) and sleuth extraordinaire all rolled into one enticing depilated package, frequently lead her into situations that verge on the bizarre.

Thank heavens through all the perils that seem to dog her evolution, and whose relaxed attitude to life reminds Elaine of how she used to be. As Elaine struggles to emerge as an elegant butterfly from the dowdy chrysalis that was her former self, she cannot help asking if these five steps are taking her to where she really wants to go.
