Consumers in most parts of the world now have global access to products beyond those offered in their countries and cultures. This new space for comparison defined by globalization can result in very different purchasing behaviors, including those influenced by the 'country of origin'. This book investigates this effect, one of the most controversial fields of consumer literature, from a company perspective. In particular, it demonstrates the strategic relevance of the country of origin in creating and making use of the value in foreign markets. It also addresses the challenges connected with utilizing the value of the country of origin by considering different entry modes and international marketing channels. Further, it considers the role of international importers and international retailers' assortment strategies in terms of value creation in foreign markets. Combining theory and practice, the book features diverse company perspectives and interviews with importers and retailers.

political system traditionally dominated by polarised left/right-wing politics." "It was one of the most striking innovations in the country's political system during the 1980s, and, despite harsh economic and institutional crises, it still remains a major social and political force today. Giving a fresh perspective on the meteoric rise of the Italian environmental movement, this enlightening study shows that it is possible for pressure groups to break into mainstream politics. It also provides one of the most systematic applications of social network analysis to the study of social movements ever undertaken, and as such, its evidence and interpretations are also of direct relevance to all those interested in the study of new social movements and collective actions at large."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your

Manufacturing, Food & Wine, Tourism

This book offers a detailed analysis of the key sectors in the Italian economy, with the focus especially on areas in which the economy excels, such as the automatic packaging machinery sector, pharmaceutical production, the food and wine industry, and tourism. The book explains how, contrary to widespread opinion, Italy is one of the world's most competitive countries in foreign trade, as confirmed by a new index compiled by Fondazione Edison that highlights its strengths and top traded products. The main characteristics of the Italian productive system, which is primarily composed of SMEs, are documented, and a map illustrating the importance of the various industrial districts is proposed, identifying their sectors of specialization, historical roots, and development. The principal steps in Italy's industrialization over the past 150 years are then outlined, in particular for the manufacturing system – the main driver of Italian exports. In-depth analyses of the mechanical industry and the machinery sector follow. In combining meticulous analysis of statistical data with a historical perspective, this book will appeal to all with an interest in the Italian economy. Drawing on freshly discovered material--including

correspondence previously unavailable outside academia--the talented writer and journalist Nicholas Farrell has created a revelatory biography of the Italian fascist leader and dictator. How did Mussolini manage to take power and hold on to it for two decades? What inspired Churchill to call him "the Roman genius" and Pope Pius XI to say he was "sent by Providence"? And how did Mussolini successfully curtail democracy without using mass murder to stay in command? Farrell answers these questions and more, focusing particularly on Mussolini's fatal error: his alliance with Hitler, whom he despised. Anyone interested in history, politics, and World War II will encounter an intriguing and startling picture of one of the 20th century's key figures.

The Fascist regime under Mussolini regarded its youth as its best hope for the future. Young people were courted more assiduously than any other group in the society and their political socialization became a central concern of the government. Believe,

Pinocchio, The Tale of a Puppet follows the adventures of a talking wooden puppet whose nose grew longer whenever he told a lie and who wanted more than anything else to become a real boy. As carpenter Master Antonio begins to carve a block of pinewood into a leg for his table the log shouts out, "Don't strike me too hard!"

Frightened by the talking log, Master Cherry does not know what to do until his neighbor Geppetto drops by looking for a piece of wood to build a marionette. Antonio gives the block to Geppetto. And thus begins the life of Pinocchio, the puppet that turns into a boy.

Pinocchio, The Tale of a Puppet is a novel for children by Carlo Collodi is about the mischievous adventures of Pinocchio, an animated marionette, and his poor father and woodcarver Geppetto. It is considered a classic of children's literature and has spawned many derivative works of art. But this is not the story we've seen in film but the original version full of harrowing adventures faced by Pinocchio. It includes 40 illustrations.

This book (Volume One) gives an historical overview of 36 countries whose armed forces served in Europe 1900-2000, together with uniform descriptions. Includes 200 full colour paintings of

the regular armies, marines, airforce and para-military troops engaged in land exercises, operations and warfare in Europe, including non-European troops serving in Europe. Each entry is accompanied by a history and description of the uniforms illustrated. The author and illustrator Ron Kidd, has been interested in both police and military history, uniforms and insignia since he was a school boy in the 1950's. He has visited over 300 police and military museums world-wide, and has written and illustrated a number of magazine articles on both police and military history and uniforms. He is a member of both the Military Heraldry Society and the Military Historical Society. It is anticipated that Volume Two will be published in 2013.

Malaria and Rome is the first comprehensive study of malaria in ancient Italy since the research of the distinguished Italian malariologist Angelo Celli in the early twentieth century. It demonstrates the importance of disease patterns and history in understanding the demography of ancient populations. Robert Sallares argues that malaria became increasingly prevalent in Roman times in central Italy as a result of ecological change and alterations to the physical landscapesuch as deforestation. Making full use of contemporary sources and comparative material from other periods, he shows that malaria had a significant

effect on mortality rates in certain regions of Roman Italy. Robert Sallares incorporates all the important advances made in many relevant fields since Celli's time. These include recent geomorphological research on the evolution of the coastal environments of Italy that were notorious for malaria in the past, biomolecular research on the evolution of malaria, ancient DNA as a new source of evidence for malaria in antiquity, the differentiation of mosquito species that permits understanding of the phenomenon of anophelism without malaria (where the climate is optimal for malaria and Anopheles mosquitoes are present, but there is no malaria), and recent medical research on the interactions between malaria and other diseases. The argument develops with a careful interplay between the modern microbiology of the disease and the Greek and Latin literary texts. Both contemporary sources and comparative material from other periods are used to interpret the ancient sources. In addition to the medical and demographic effects on the Roman population, Malaria and Rome considers the social and economic effects of malaria, for example on settlement patterns and on agricultural systems. Robert Sallares also examines the varied human responses to and interpretations of malaria in antiquity, ranging from the attempts at rational understanding made by the Hippocratic authors

and Galen to the demons described in the magical papyri.

The green mantle of the earth! This metaphor borrows from the vocabulary of weaving and epitomizes the Renaissance interest in "fashioning green worlds" in art and poetry. Here it serves as a motto for a cultural poetics that made representing living nature increasingly popular across Italy in the Early Modern Period. The explosion of landscape art in the Renaissance is often associated with the rise of interest in the literary pastoral, narrowly defined, but Green Worlds expands this understanding, investigating green's broad appeal with audiences ranging from the ecclesiastic, to the medical and scientific, to the humanistic and courtly. The essays gathered here explore the expanding technologies and varied cultural dimensions of verdure and verdancy in the Italian Renaissance, demonstrating the role of visual art in shaping the poetics and expression of greenery in the arts of the 16th-century and beyond. The history of totalitarian states bears witness to the fact that literature and print media can be manipulated and made into vehicles of mass deception. Censorship and Literature in Fascist Italy is the first comprehensive account of how the Fascists attempted to control Italy's literary production. Guido Bonsaver looks at how the country's major publishing houses and

individual authors responded to the new cultural directives imposed by the Fascists. Throughout his study, Bonsaver uses rare and previously unexamined materials to shed light on important episodes in Italy's literary history, such as relationships between the regime and particular publishers, as well as individual cases involving renowned writers like Moravia, Da Verona, and Vittorini. Censorship and Literature in Fascist Italy charts the development of Fascist censorship laws and practices, including the creation of the Ministry of Popular Culture and the anti-Semitic crack-down of the late 1930s. Examining the breadth and scope of censorship in Fascist Italy, from Mussolini's role as 'prime censor' to the specific experiences of female writers, this is a fascinating look at the vulnerability of culture under a dictatorship. "Precious Egyptian glass of the Pharaonic period, luxury wares of Hellenistic times, and brilliant mosaic glass inlays from the Ptolemaic period and the early years of the Roman Empire - products of almost all the significant glass centers of the ancient world - are here presented for the first time. This splendid array was gathered in a few decennia by Ernesto Wolf who, recognizing the importance of preserving as much as possible of

the archaeological context of ancient glass, acquired groups of finds in their entirety, among them an important hoard of Hellenistic luxury glass. The product of a discerning collector with a keen eye for beauty, these 155 vessels and objects range from the beginnings of glassworking in the sixteenth century B.C. to the first century A.D. when the novel technique of glassblowing spread through the Roman Empire." "Of particular value is a systematic analysis - the first to date - of the history of ancient glass technology. Presented in easy-to-understand language and accompanied by numerous comparative photographs and drawings, step-by-step descriptions of studio experiments reconstruct the techniques of the ancient artisans. The descriptive catalogue of this comprehensive collection is illustrated with full-color photographs by Peter Frankenstein and Hendrik Zwietasch who have captured the magic of ancient glass, enabling the reader to behold many small objects as through a magnifying glass. E. Marianne Stern and Birgit Schlick-Nolte meticulously researched and documented Ernesto Wolf's collection to create an essential handbook of early ancient glass."--BOOK JACKET. He discusses the social and political institutions that existed in Italy during the fifteenth and sixteenth

centuries, and he analyzes the ways of thinking and seeing that characterized this period of extraordinary artistic creativity. Developing a distinctive approach, the author is concerned not only with the finished works of Michelangelo, Raphael, Leonardo da Vinci, and others, but also with the social background, patterns of recruitment, and means of subsistence of this "cultural elite." He thus makes a major contribution both to our understanding of the Italian Renaissance and to our comprehension of the complex relations between culture and society. An excellent social history of the lives and culture of the artists and artisans which made it possible for the arts to flourish.
