What are you waiting for? Kickstart your life now by downloading this book! See you inside! There are sneaky little ways that you can save money, even during these expensive times. This book is full of clear, practical advice on saving money and time with simple and inexpensive cooking, shopping, housekeeping, construction, farming activities, and so on. I wrote this book based on my experiences. My goal is to help people save money for the truly necessary things such as saving for retirement or growing your own business. My approach is simple: ditch the unnecessary expenses for the important stuff. In these harsh economic times, you are probably feeling the crunch. Simple survival is a struggle, and major bills like air conditioners, car repairs, or septic disasters can create small financial crises. Saving money is difficult when every penny gets gobbled up as grocery and gas prices steadily climb. In addition, as your income grows, so does your spending. As a rule, the growth of expenses surpasses the growth of income. If you start making more money, but your expenses grow due to starting a family, a business, or some other venture, you won't see any additional wealth. The crunch does not simply go away with increased income. When I came to the United States in 1995, I was stunned by how much of a struggle the "American Dream" proved to be. Seeing the relative wealth of most Americans, I thought that America must be a cash cow with riches there for the taking. All you have to do is work hard and anything you want can be yours. While living here is certainly lucrative, the high cost of living prevents it from being that cash cow that so many assume it to be. Learning to survive in this country has taught me many valuable lessons on how to avoid feeling that painful financial pinch and still save money for my business. Based on my experiences, I wish to impart two major lessons, themes if you will, that you will encounter throughout this book. The first lesson is that there is a huge difference between what you want and what you need. For instance, you need a phone for communication, work, directions, etc. But you want the latest iPhone with its awesome marketing. Well, if you are not just oozing money out of your ears, then the latest iPhone is a major purchase, or at least significant monthly payments, which you could safely do without. You could get just as much functionality out of a different, less expensive Smartphone or even an older version of iPhone. You can get what you need without splurging on what you want, and your life will be just as satisfying, without the added stress of spending beyond your means. The other lesson is that experiences are far more valuable than material things. Think about your best memories. Did they revolve around some expensive item, or did they revolve around spending quality time with your family and dearest friends? An experience can be made wonderful by the people included in it and the impact that you have on others; it can also be free. You will gain far more mileage from spending a little bit of money on an experience than a lot of money on a material thing that will only malfunction, break, or get lost sooner or later. Now let's embark on this journey where I show you how to be wise with money, as I had to learn to be. Here Is A Preview Of What You'll Learn... Saving Money in General Saving Money

"About the book" Luck is (no) Coincidence: How we declutter our life, home, mind and soul! (Minimalism-Guide) We live too fast, rush through overfull days, and there is always too much lying around. But that could change. Because: In every one of us is the stuff of the time-millionaire. We ourselves are the ones who turn the clock, because we are stuffing more and more into our everyday lives, and that makes our precious time of life short. We do not have too little time, but too much to do. In this way we ourselves bring the hectic pace into our lives, which we want to avoid. Never really get to the point, and always thinking somewhere else. A simple life with more success, freedom, happiness, money, love and time - that's what we all want. But in our modern performance-oriented society, however, this simplicity often falls by the wayside: consumption, ownership and performance seem to be the more important values, at least superficially. Minimalism as a way of life refers to a way of living that enables everyone to concentrate on the essential things. Minimalism can, but does not have to cover all areas of life. Whoever decides to want to live minimalistically, usually does so very consciously. The motives are almost always similar: # Pressure to perform and career constraints: Too much stress at work, in studies and in leisure time # Excessive lifestyle...body worship, shopping and social media communication: overtaxed by exaggeration and abundance #

Money Management Turn Bad Credit Into Good Credit: It seems that everywhere you turn, someone wants to know your credit score. It doesn't matter if this is you or someone from your bank. Many landlords will even run a potential renter's credit as this will usually give them insight as to whether the person will pay their rent. The landlords will also have guidelines to use in order to tell you if you are approved or not approved based on your credit score. While some may allow you to have a cosigner if you are not approved, they will also want to run your co-signer's credit report. This is often frustrating to many people, especially when you are trying to repair your credit. It can make you feel that you are never given a break or that your identity is now your bad credit. It doesn't have to be this way. In fact, the more you learn about the details of what bad credit is and how there are federal laws to help you overcome bad credit, the faster you will find yourself in financial freedom. Your credit score is vital to your life. It is something that helps you to enjoy life as you have added access to financial services and various investments. You must understand how your score can directly influence what you can purchase so that you can enjoy your life. The problems you have with your credit score can be very dramatic and you might not be fully aware of what affects your credit score or how valuable it is to you. Those people who pay off their debts and lines of credit with on-time payments will be more likely to have better credit ratings. There are many things relating to your credit score that should be explored that go well beyond just your payment history. Financial Budgeting: Everyone has an opportunity to grow their money and get out of debt, but you must start to make this a reality. Be warned, though, when your income starts to grow, it is easy to fall into temptation and start spending more

than you are earning again. Refrain and continue saving and investing your money. Every small step counts. Every coin kept and invested counts. If you use the profit you make, you will be unable to grow your wealth. Instead, allow your investment to grow by using the profits as part of the next years principal. With time, you will have a venture that can not only buy you whatever you want but one that will continue to grow over the years. Taking advice from experts in the field you wish to invest is critical to your investment. Would you go to a farmer when you are sick, or would you seek out a doctor? The same way, take your investment knowledge from those who understand the market dynamics and can offer you advice to help grow your investment. Manage your credit cards with responsibility, or they will sink you into a hole. The easiest way to get into debt is to spend more than you earn. You need to keep your expenses lower than your income at all times. Watch your credit card spending because that's how we often find ourselves overspending. To get out of debt is to pay. The longer it takes you to pay, the higher the interest rate you will be required to pay. Either consolidate your debt or tackle one debt at a time. You might want to reduce your expenses, so you have more money to spread around. Always start by saving 10% of your income. A safety net is essential for your peace of mind. Budgeting does not have to be complicated. The more you simplify it, the better. As long as you track your expenses and stick to your budget, it will work for you. Ensure that you don't view it as a task but as a necessary tool to help you stay ahead, get a real financial picture, and manage your money correctly.
