An exploration of how design might be led by marginalized communities, dismantle structural inequality, and advance collective liberation and ecological survival. What is the relationship between design, power, and social justice? "Design justice" is an approach to design that is led by marginalized communities and that aims explicitly to challenge, rather than reproduce, structural inequalities. It has emerged from a growing community of designers in various fields who work closely with social movements and community-based organizations around the world. This book explores the theory and practice of design justice, demonstrates how universalist design principles and practices erase certain groups of people—specifically, those who are intersectionally disadvantaged or multiply burdened under the matrix of domination (white supremacist heteropatriarchy, ableism, capitalism, and settler colonialism)—and invites readers to "build a better world, a world where many worlds fit; linked worlds of collective liberation and ecological sustainability." Along the way, the book documents a multitude of real-world community-led design practices, each grounded in a particular social movement. *Design Justice* goes beyond recent calls for design for good, user-centered design, and employment

Over the last 20 years, China fed our zombie-like appetite for iPhones, Prada and Snuggies. At the same time, its biggest customer, the US, found itself in debt, under-educated, and covered with recreational tattoos. So now what? Will America wallow in mediocrity like Greece or some C-list celebrity? Or, will our legendary ingenuity save us from Tweeting...and eating our way to irrelevance? Econovation is a bold, witty response to those questions that doesn't rely on miracles or government for answers. It challenges business leaders to think differently about the next decade of the US economy and respond with big, sustainable innovations. Written by Steve Faktor, former Vice President of Growth & Innovation and head of the Chairman's Innovation Fund at American Express, Econovation is a trends book on steroids. It's bursting with practical, thought-provoking ideas no executive, entrepreneur or Fed Chairman can afford to miss. Most importantly, Econovation envisions a very different future. It's one ruled by "producerism", not consumerism. It's a future in which real innovators must do more than slide a greasy finger over the screen of an iPad. Econovation uncovers opportunities in unexpected places. You'll learn how to: Capitalize on a market that will go from making nothing to making everything...for China. Use psychological pricing and some crafty tricks from Google to reduce reliance on tapped-out consumers. Sell to consumers whose new identities will be based on what they create, not what they buy, click or super-size. Seduce a desperate government to finance your business, then feed you pancakes in the morning. Motivate tomorrow's employee with social currency instead of the green, depreciating kind. Upgrade your business and your kids with a little help from Mormons and kindergartners with hacksaws. Econovation is a fresh perspective on a future we've taken for granted. It empowers readers to think big, dream big, and conquer economic conditions that will paralyze others. With a hefty dose of data, humor, and actionable ideas, Econovation offers insight and amusement in one, convenient place - a rare treat for a business book.

When a career-ending injury left elite athlete and professional football player Lewis Howes out of work and living on his sister's couch, he decided he needed to make a change for the better. He started by reaching out to people he admired, searching for mentors, and applying his past coaches' advice from sports to life off the field. Lewis did more than bounce back: He built a multimillion-dollar online business and is now a sought-after business coach, speaker, and podcast host. In *The School of Greatness*, Howes shares the essential tips and habits he gathered in interviewing "the greats" on his wildly popular podcast of the same name. In discussion with people like Olympic gold medalist Shawn Johnson and Pencils of Promise CEO Adam Braun, Howes figured out that greatness is unearthed and cultivated from within. The masters of greatness are not successful because they got lucky or are innately more talented, but because they applied specific habits and tools to embrace and overcome adversity in their lives. A framework for personal development, *The School of Greatness* gives you the tools, knowledge, and actionable resources you need to reach your potential. Howes anchors each chapter with a specific lesson he culled from his greatness "professors" and his own experiences to teach you how to create a vision, develop hustle, and use dedication, mindfulness, joy, and love to reach goals. His lessons and practical exercises prove that anyone is capable of achieving success and that we can all strive for greatness in our everyday lives.

“Everybody who has ever read a book will benefit from the way Keith Houston explains the most powerful object of our time. And everybody who has read it will agree that reports of the book’s death have been greatly exaggerated.”—Erik Spiekermann, typographer We may love books, but do we know what lies behind them? In *The Book*, Keith Houston reveals that the paper, ink, thread, glue, and board from which a book is made tell as rich a story as the words on its pages—of civilizations, empires, human ingenuity, and madness. In an invitingly tactile history of this 2,000-year-old medium, Houston follows the development of writing, printing, the art of illustrations, and book binding to show how we have moved from cuneiform tablets and papyrus scrolls to hardcovers and paperbacks of today. Sure to delight book lovers of all stripes with lush, full-color illustrations, *The Book* gives us the momentous and surprising history behind humanity’s most important—and universal—information technology.
