"A wonderfully eccentric and vibrant collection . . . Sometimes dreamlike, sometimes nightmarish, always riveting." (Jill McCorkle, New York Times bestselling author of Life After Life). In "Hummingbird Moonshine," a frustrated hunt for authentic religion in botanicas and science books culminates in a spiritual connection made with a hummingbird. In "Oceanic," the narrator resolves to marry a manate after a drunken pre-party for her best friend's wedding. In "Tiles," four vignettes about bloody accidents in tiled bathrooms intermingle with scenes from the author's favorite scary movies. In Trinie Dalton's tweaked vision of reality, psychic communications between herself and Mick Jagger, The Flaming Lips, Marc Bolan, Lou Reed, and Pavement are daily occurrences. Animals also populate this book: beavers, hamsters, salamanders, black widows, owls, llamas, bats, and many more are characters who befriended the narrator. This collection of stories is told by a woman compelled to divulge her secrets, fantasies, and obsessions with native Californian animals, glam rock icons, and horror movies, among other things. With a setting rooted in urban Los Angeles but colored by mythic tales of beauty borrowed from medieval times, Shakespeare, and Grimm's fairy tales, Wide Eyed makes the difficulties of surviving in a contemporary American city more palatable by showing the reader that magic and escape is always possible. "A delightfully weird and disarming read." --Publishers Weekly "Trinie Dalton's voice is so charming in these stories and they fly right by, so it takes a little time to realize how deftly she is talking about death and sex and fear and love and fur and slumber parties, how lightly she touches upon heaviness, making an imprint so gentle you don't know it's there until later, when the story floats back up in your memory." --Aimee Bender "These charming stories vibrate with innocence and awe. Trinie Dalton is an effortless purveyor of wonder, strangeness, and love. She is a writer of high spirits and unguarded vision, and this debut collection is an absolute pleasure to read." --Ben Marcus

Men Do It Too: Opting Out and In offers a timely and comprehensive analysis of the phenomenon of men leaving mainstream careers models, adding to current debates on opting out. The book investigates how globalization, individualization, and this age of high modernity, in addition to issues of masculinity and what it means to be a man in contemporary society and organizational contexts, affect decisions to opt out. Throughout the book, social theory and relevant debates are interwoven with the narratives of 15 men who have left successful careers and mainstream career models to live and work on their own terms: six from the United States, five from Finland, and four from the UK. The narratives help illustrate the issues presented, as well as providing an insight into the men's identity work throughout their opting out processes. In addition, Biess explores what organizations can learn from the knowledge gathered in her research on men (and women) opting out. This is important in order to create sustainable work environments that not only attract but also retain employees.

Noting a phenomenon that might seem to recall a previous era, The New York Times Magazine recently portrayed women who leave their careers in order to become full-time mothers as "opting out." But, are high-achieving professional women really choosing to abandon their careers in order to return home? This provocative study is the first to tackle this issue from the perspective of the women themselves. Based on a series of candid, in-depth interviews with women who returned home after working as doctors, lawyers, bankers, scientists, and other professions, Pamela Stone explores the role that their husbands, children, and coworkers play in their decision; how women's efforts to construct new lives and new identities unfold once they are home; and where their aspirations and plans for the future lie. What we learn--contrary to many media perceptions--is that these high-flying women are not opting out but are instead being pushed out of the workplace. Drawing on their experiences, Stone outlines concrete ideas for redesigning workplaces to make it easier for women--and men--to attain their goal of living rewarding lives that combine both families and careers.

An interdisciplinary study that combines the burgeoning fields of digital aesthetics and eco-criticism. The book offers the argument that digital art in the service of environmental criticism has the potential to reconnect humankind to the natural world.

*The Opted Out Planner is designed for online language teachers and coaches who want to turn their multiple lessons, product and course ideas into a sustainable online business. They want to become owners, creators and artists and not to depend on demanding clients and online schools. However, the transition from teaching several lessons a day to running a business involves a number of new tasks that many teachers find overwhelming and stressful. Despite their brilliant lesson planning, teachers feel lost when planning their marketing strategy, finances and online content. This planner will help them break huge projects into smaller tasks and prepare for each month, week and the whole year both mentally and strategically. As language teachers and business owners ourselves, we created this planner to help you run your own business with clarity and confidence. We recognize that many tasks require more than theoretical knowledge and understanding of the process. We believe that business growth starts in the mind, and so we introduce reflection and intention setting journaling activities. This is the first planner for online language teachers that combines mindset exercises, mindfulness techniques (journaling and doodling) with tracking, planning and strategizing. Together with our book and journal Opted Out of the *Real Job* this planner will set you off for a year of success, purpose and growth.*

Opt Out is the story of how the author opted out of the conventional approach to business, money and life that enabled him to own several businesses, real estate, and eventually spend a year living in Bali. He takes the reader on a journey through his experiences and provides the tools for others to do the same.

Opting Out and In: On women's careers and new lifestyles introduces a new perspective and definition of opting out that better reflects contemporary issues and lifestyles. The book offers a timely and comprehensive analysis of the phenomenon of women leaving high-powered careers, adding to current debates on opting out. It investigates the themes of globalization, individualization and the age of high modernity and addresses issues of how gender, in the context of what it means to be a mother and career woman in a masculinist society, affects decisions to opt out. In contrast to previous debates, the definition of opting out is broadened to include relevant masculinist notions of career to adopt alternative ways of working. To better understand the identity issues and inner workings of the women who opt out, opting out is critically examined through three lenses: agency and autonomy; gender, femininity and the maternal; and, finally, concepts of reinvention. These three areas of inquiry all raise and problematize relevant issues that are present in women's lives, and that have a deep and defining effect on concepts of the self. The book includes the narratives of six women, interwoven with in-depth social theory and relevant debates. Written in an engaging and accessible style, **Opting Out and In** will strongly appeal to researchers and practitioners alike, working in areas such as social theory, globalization, feminist studies and identity studies.

The public will learn the Real Deal about the EEOC, particularly the legal tricks and maneuvers employed in its application of (supposed) remedial remedies under Title VII of the 1964 Civil Rights Act. EEOC remedies that in reality ensure virtually all complainants lose. The author describes the process by analysis of three merit based complaints, from inception in a top secret Department of Defense environment to a local Defense Logistics Agency EEO office; then through Federal district and appeal courts to culmination of the complaints in a writ to the Supreme Court. The book explains why the vast majority of Title VII citizen complaints, as proven by statistical results alone, reflect a reality that complaints referred to the EEOC seldom receive the justice presumed available under the act. This book also provides a solution to end this unique Indian Treaty type justice. Plus note the exciting third chapter: it captures the event of Hit Men attempting to end the authors life! Is the Government involved? Why? These questions are yet to be answered. The public has an undeniable right to the truth!

In a much-publicized and much-maligned 2003 New York Times article, "The Opt-Out Revolution," the journalist Lisa Belkin made the controversial argument that highly educated women who enter the workplace tend to leave upon marrying and having children. Women Who Opt Out is a collection of original essays by the leading scholars in the field of work and family research, which takes a multi-disciplinary approach in questioning the basic thesis of "the opt-out revolution." The contributors illustrate that the desire to balance both work and family demands continues to be a point of unresolved concern for families and employers alike and women's equity within the workforce still falls behind. Ultimately, they persuasively make the case that most women who leave the workplace are being pushed out by a work environment that is hostile to women, hostile to children, and hostile to the demands of family caregiving, and that small changes in outdated workplace policies regarding scheduling, flexibility, telecommuting and mandatory overtime can lead to important benefits for workers and employers alike. Contributors: Kerstin Aumann, Jamie Dolkas, Ellen Galinsky, Lisa Ackerly Hernandez, Susan J. Lambert, Joya Misra, Maureen Perry-Jenkins, Peggie R. Smith, Pamela Stone, and Joan C. Williams.

In this book Stone explores the reasons why high-achieving women with children interrupt their professional careers. This qualitative study, using the life history interview, shows that women are not opting out, but are being shut out by inflexible employers.

Within this context six classes of excellence were organized with the participation of interested Belgian colleagues across the board, belonging to universities adhering to different basic philosophies and even forming part of different linguistic communities. These classes culminated in a final symposium where Professor Devine gave a birds-eye view of the general theme, overarching and synthesizing the different subjects covered during the previous classes of excellence. This book offers a reworked compilation of all the contributions of the key-note speakers to the classes of excellence.

This gritty chronicle illustrates the emergence of punk rock in Toronto for the first time. The visionary bands that brought the original scene to life--and who still maintain loyal fans across North America--are documented in detail, from the Diodes, Viletones, and Teenage Head to the B-Girls, Forgotten Rebels, Johnny & the G-Rays, and more. Full of chaos, betrayal, failure, success, and pure rock 'n' roll energy, this layered history is assembled from interviews with those now recognized as innovators, pioneers, and outright legends in their genre. Their accounts go beyond run-of-the-mill anecdotes, venturing into the uncharted territory of sex, drugs, murder, conspiracy, violence, criminals, and biker gangs. Bold and brazen, this compilation also includes a wealth of previously unpublished photographs as well as one of the last interviews with the late Frankie Venom, lead singer of Teenage Head.

Opt out of expectations and live a more intentional life with this refreshing guide from the national bestselling author of The Year of Less. In reality, many of us either do what is expected of us, or follow the invisible but well-worn paths that lead to what is culturally acceptable. For some, those paths are fine -- even great. But they leave some of us feeling disconnected from ourselves and what we really want. When that discomfort finally outweighs the fear of trying something new, we're ready to opt out. After going through this process many times, Cait Flanders found there is an incredible parallel between taking a different path in life and the psychological work it takes to summit a mountain -- especially when you decide to go solo. In Adventures in Opting Out, she offers a trail map to help you with both. As you'll see, reaching the first viewpoint can be easy -- and it offers a glimpse of what you're walking toward. Climbing to the summit for the full view is worth it. But in the space between those two peaks you will enter a world completely unknown to you, and that is the most difficult part of the path to navigate. With Flanders's guidance and advice, drawn from her own journey and stories of others, you'll have all the encouragement and insight you need to take the path less traveled and create the life you want. Just step up to the trailhead and expect to be an adventurer.

Object relations theory has been useful in understanding borderline personality disorder, and from this theoretical orientation have emerged effective approaches to its treatment. However, treatment based on the object relations model has tended to emphasize only the structural and technical facets of the psychotherapy enterprise, i.e., the frame of therapy, therapeutic neutrality, and interventions strategies, etc. In Another Chance to Be Real, Donald and Deanda Roberts argue that the incorporation of attachment theory and research enhances the effectiveness of treatment by expanding the clinical focus to include relational and process factors.

You can build anything in Minscraft. With one exception: your life. Dillon Aldham loves being on his computer. He's a little bit awkward and most of his relationships have been online. When a pipe explodes in his apartment, he holes up in the local bar for a few days waiting for repairs to be done. He figures the hot redheaded bartender is just being polite, but every now and then he thinks they might have a spark. (And Gage's tone of command is pretty... evocative.) Gage Maher isn't in the closet, he's just private. At least, he's private until he meets Dillon. But Dillon, and his fun mix of awkward and fearless, really gets under his skin. Between an inheritance he never asked for, the feud that comes along with it, and New Halliday's first gay wedding, Gage could use a little fun. Can a computer geek and a small town bartender really hit it off? Is a love for kink, a healthy fear of gossip, and a huge helping of sexual chemistry enough to build a life on?
