In his New York Times bestseller Steal Like an Artist, Austin Kleon showed readers how to unlock their

creativity by “stealing” from the community of other movers and shakers. Now, in an even more forward-thinking and necessary book, he shows how to take that critical next step on a creative journey—getting known. Show Your Work! is about why generosity trumps genius. It’s about getting findable, about using the network instead of wasting time “networking.” It’s not self-promotion, it’s self-discovery—let others into your process, then let them steal from you. Filled with illustrations, quotes, stories, and examples, Show Your Work! offers ten transformative rules for being open, generous, brave, productive. In chapters such as You Don’t

Have to Be a Genius; Share Something Small Every Day; and Stick Around, Kleon creates a user's manual for embracing the communal nature of creativity— what he calls the “ecology of talent.” From broader life lessons about work (you can't find your voice if you don't use it) to the etiquette of sharing—and the dangers of oversharing—to the practicalities of Internet life (build a good domain name; give credit when credit is due), it's an inspiring manifesto for succeeding as any kind of artist or entrepreneur in the digital age. Embossed with gold foil accents. Inspirational quotes throughout.

Johnson encourages young people to discover their own unique voices by offering guidance on writing and other forms of self-expression and self-dialogue and on learning how to listen to inner wisdom. 'Transparencies: Small Camera Works 1971-1979' offers an alternative account of one of the most fabled episodes in photographic history: the cross-country journeys that produced Stephen Shore's luminous new vision of the American landscape, 'Uncommon Places'. Along with his large-format camera, Shore also brought a 35mm Leica on his travels. The images made with it, on luminous colour slide film, are intimate, spontaneous and personal, while retaining Shore's studied formal sensitivity. In these entirely unseen photographs, a

parallel iteration of an iconic vision emerges like a piece of music played in a new key. The vocabulary is familiar: highways and homes, phone boxes, fast food and sun-strewn parking lots. But the alternative format unmistakably re-envisions these subjects through distinct experiments with composition, attitude, and colour. *Transparencies* uncovers both a detail-oriented survey of the American landscape of the 1970s and a rigorous, imaginative exercise in form by an undisputed modern master. The idea of The Fingerprint Sourcebook originated during a meeting in April 2002. Individuals representing the fingerprint, academic, and scientific communities met in Chicago, Illinois, for a day and a half to discuss the state of fingerprint identification with a view toward the challenges raised by Daubert issues. The meeting was a joint project between the International Association for Identification

(IAI) and West Virginia University (WVU). One recommendation that came out of that meeting was a suggestion to create a sourcebook for friction ridge examiners, that is, a single source of researched information regarding the subject. This sourcebook would provide educational, training, and research information for the international scientific community.

An absorbing account of the record industry's worst nightmare. In the summer of 1969, Great White Wonder, a collection of unreleased Bob Dylan recordings appeared in Los Angeles. It was the first rock bootleg and it spawned an entire industry dedicated to making unofficial recordings available to true fans. Bootleg! tells the whole fascinating saga, from its underground infancy through the CD 'protection gap' era,

This classic history has now been updated and revised to include today's digital era and the emergence of a whole new bootleg culture.

The Alex-award winning The Oxford Project is back in an abridged paperback edition. Less expensive, more portable, and retaining all the drama of this extraordinary true tale of a seemingly ordinary Midwestern town through the pictures and words its residents. Equal parts art, American history, cultural anthropology, and human narrative - The Oxford Project is at once personal and universal, surprising and predictable, simple and profound. The Project began in 1984, when photographer Peter Feldstein set out to photograph every single resident of his town, Oxford, IA (pop. 676). He

converted an abandoned storefront on Main Street into a makeshift studio and posted fliers inviting people to stop by. At first they trickled in slowly but in the end nearly all of Oxford stood before his lens. Twenty years later, Feldstein decided to do it again. Only this time he invited writer Stephen G. Bloom to join him, and together they went in search of the same Oxford residents Feldstein had originally shot two decades earlier. What emerges is a living composite of a quintessential Midwestern community, told through the words and images of its residents - then and now. This intricate web

of human connections among neighbors, friends, and family is the mainstay of small-town American life - unforgettably captured here in Feldstein's candid black-and-white photography and Bloom's rhythmic storytelling.

Modern life is often described as an iron cage from which there is no escape. But popular culture venerates leisure

and travel as authentic escape routes from routine and monotony. However what kind of escape is tolerated in modern society? How is it shaped by historical expectations of leisure and travel? And what do we actually experience when we engage in leisure or travel activity? This fascinating and accomplished book tries to supply answers to these questions. A major scholarly contribution to the sociological analysis of leisure, pleasure and travel, Dr Rojek's study is a radical challenge to the existing paradigmatic orthodoxy. Bryan S.
