In this unfriendly land, they stumble upon a conspiracy which could threaten the very fabric of their world!

Fur seals and sea lions are charismatic, large carnivores that engage us with both their skill and playful antics. Although all species in Australian waters were harvested to near extinction 200 years ago, fur seals are recovering and are now common in near-shore waters across southern Australia. Sea lions, however, are endangered. Their populations appear not to have recovered like fur seals and are declining at some locations. Fur seals and sea lions are important top level predators and play an important role in Australia's temperate marine ecosystems. Key threats they currently face relate to human activities, particularly interactions with fisheries. This book outlines the comparative evolutionary ecology, biology,

It also includes brief descriptions of Antarctic and Subantarctic seals that occupy the Antarctic pack-ice and remote Australian territories of Macquarie Island and Heard Island.

SEAL's Homecoming When Chance McCallister left her to join the Navy SEALs, Mandy Loomis was devastated. Now, more than ten years later, Chance and his brothers are back in town for their father's funeral, but Mandy is no longer that moon-eyed teenager she once was. She's a fiercely independent woman determined to solve her own problems—and she has plenty. When her gambler father died two years prior, he left Mandy—along with a successful auto repair business—with a ton of debt owed to a ruthless loan shark. Mandy is barely getting by, and when her mechanic quits, she's in a real bind. It just so happens, Chance is willing to help out. Sure, Chance is bigger, stronger, and sexier than ever, but Mandy isn't interested in anything but his mechanical skills. Or maybe just a bit interested in his kissing skills—which, by the way, are just as good as she remembers. SEAL's Accidental Family All her life, Rachel Winchester has fought against the idea that she was nothing but white trash destined for Loserville. Now, it seems all that fighting was for nothing. Sure, she's running a successful B&B and, yes, she finally had her way with a man she's crushed on for forever—Harris McCallister, the guy she's flirted with for years; the guy she's thought about and pined for. She's finally feeling good about the future when—bam—she gets pregnant. True or not, in her world, nothing says white trash more than an unmarried pregnant woman. Worse, her “loving” mother is threatening her over

the B&B and the property it sits on, all because of a silly legend about a pirate's buried treasure. Harris doesn't know what it is about Rachel, but he's always been drawn to her. With her brightly dyed hair and sexy-as-hell tattooed body, she's impossible to ignore—and drives him crazy in all the best ways. Finding out she's carrying his baby has him thinking things he's never thought before. Thoughts he brutally pushes away. Returning to active duty as a Marine Raider is what he wants, not settling down and playing house. He'll stick around just long enough to make sure Rachel and the baby-to-be are safe from increasingly disturbing attacks they both believe has to do with an old legend about a pirate's buried treasure. The longer he stays, though, the tougher returning to duty is becoming. But when the time comes to head back to the Marines, he has to make the toughest decision of his life—duty to his country, or life with the woman he loves. Ranger's Protection Viktoria Jonsdottir is none too pleased with the personal bodyguard her father has insisted on hiring to keep her safe. Safe from what, she has no idea, but she's convinced having this brooding man hovering over her is completely unnecessary. All she wants to do is get to New York where her father is conducting high level meetings for their corporation—meetings she arranged, to prove her value to the company. Sure, Lee MacCallister is sexy as hell and his eyes would make an ordinary woman swoon. But Viktoria is no ordinary woman. She's not going to fall for Lee, even if he does make her feel things she's never felt before. Like this strange new emotion that just might be...happiness. It's a simple enough assignment for the former Army Ranger—protect some rich, spoiled woman for a few days then pick up the check. Only thing is, Viktoria isn't like any woman he's ever met. She's tough, smart, and has a body that's more than a little distracting. He can keep it professional, even though she's beyond tempting as sin. But

when things get dicey and Victoria's enemies prove to be far more dangerous than Lee anticipated, he realizes Viktoria has become more than an assignment—she's become personal. And that could be the most dangerous thing of all.

Cylindrically-shaped seals first appeared in the second half of the fourth millennium B.C., gradually replacing the more traditional stamp seals. Cylinder seals are interesting not only for the past functional uses and for what they reveal about ancient Near Eastern culture and society--but the representations rendered by the seals are a worthy art form. This book discusses over 700 seals, including a large number of Syrian seals. --Publisher description.

Most of the Sasanian seals published in this catalogue have been in the Saeedi family collection for several decades. The 131 seals included here are only a small part of the collection, and the sample applies to the clay sealings

covered in this work. Where more than one sealing bears the same impression, we have contented ourselves with reproducing one well-preserved specimen, or, where necessary, two less well-preserved ones. This work, therefore, does not include all the sealings cited in my previous work on administrative seals. A concordance between those cited in that work and those published here is instead provided. Comprising as it does some 463 clay sealings, at least half of which bear the seals of administrative bodies or high-ranking dignitaries, this collection is the richest ever to have been published.

Hearing Before the Subcommittees on Asian and Pacific Affairs and on International Organizations of the Committee on Foreign Affairs, House of Representatives, Ninety-sixth Congress, First Session, on H.R. 5033, September 27, 1979

In January 1996 a total of 270 conference participants gathered for 3 days in Trondheim, Norway, to focus on and to discuss the complex topic of hydrocarbon seals particularly related to deformation zones and to caprocks. The conference was the first in Norway and one of the first in Europe to exclusively address this very important subject. The purpose of the conference was to present some of the most recent research results, to establish state-of-the-art with respect to understanding hydrocarbon seals and to discuss where to go from here to find some of the keys to successful future exploration

and enhanced oil and gas recovery. Out of the presented papers and posters, 17 are compiled and published in this volume. These provide a good overview of and an introduction to the numerous aspects covered during the fruitful days in Trondheim.

The contributors to this volume have accomplished a breakthrough in our ability to collect data on ocean-dwelling mammals. In the first large-scale comparison of fur seals, they have employed quantitative methods and a special instrument called a Time-Depth-Recorder to study the strategies used by females in six species of cared seals to rear and wean their young in different environments.
