that also provides inspiration for career options and activities to help children further explore and apply what they have learned.” —Liesl Pimentel, manager of education and formal programs, Phoenix Zoo

Zoology for Kids invites young animal lovers to discover the animal kingdom through clear, entertaining information and anecdotes and hands-on activities. Part 1 introduces the science of zoology, discussing animals’ forms, functions, and behaviors as well as the history behind zoos and aquariums. Kids bake edible animal cells, play a dolphin-echolocation game, and design an exhibit.

Part 2 offers an insider's look at how zoologists apply their knowledge every day. Kids peek into the world of zookeepers and aquarists, veterinarians, wildlife researchers, and conservationists. They "train" their friends, mold a tiger's jawbone, and perform field research in their own backyard. Animal enthusiasts come away with new knowledge, a healthy respect for the animal kingdom, and the idea that they can pursue animal-related careers and make a difference to preserve and protect the natural world. the Botswana truism: “only food runs!” With a new introduction and new material from the author In the tradition of Bill Bryson, a new writer brings us the lively adventures and biting wit of an African safari guide. Peter Allison gives us the guide’s-eye view of living in the bush, confronting the world’s fiercest terrain of wild animals and, most challenging of all, managing herds of gaping tourists. Passionate for the animals of the Kalahari, Allison works as a top safari guide in the wildlife-rich Okavango Delta. As he serves the whims of his wealthy clients, he often has to stop the impulse to run as far away from them as he can, as these tourists are sometimes more dangerous than a pride of lions. No one
