The Romance languages offer a particularly fertile ground for the exploration of the relationship between language and society in different social contexts and communities. Focusing on a wide range of Romance languages – from national languages to minoritised varieties – this volume explores questions concerning linguistic diversity and multilingualism, language contact, medium and genre, variation and change. It will interest researchers and policy-makers alike.

In the last decade, public discussions of transgender issues have increased exponentially. However, with this increased visibility has come not just power, but regulation, both in favor of and against trans people. What was once regarded as an unusual or even unfortunate disorder has become an accepted articulation of gendered embodiment as well as a new site for political activism and political recognition. What happened in the last few decades to prompt such an extensive rethinking of our understanding of gendered embodiment? How did a stigmatized identity become so central to U.S. and European articulations of self? And how have people responded to the new definitions and understanding of sex and the gendered body? In *Trans\**, Jack Halberstam explores these recent shifts in the meaning of the gendered body and representation, and

explores the possibilities of a nongendered, gender-optional, or gender-queer future.

**This book presents a semiotic study of the re-elaboration of Christian narratives and values in a corpus of Italian novels published after the Second Vatican Council (1960s). It tackles the complex set of ideas expressed by Italian writers about the biblical narration of human origins and traditional religious language and ritual, the perceived clash between the immanent and transcendent nature and role of the Church, and the problematic notion of sanctity emerging from contemporary narrative.** uno Dawson è autrice di diversi romanzi per giovani adulti e nel 2014 è stata nominata «Queen of Teen» per la sua attività di scrittrice per ragazzi e di divulgazione. Senza peli sulla lingua e con dosi massicce di umorismo, l'autrice presenta il variegato mondo LGBT e propone un percorso attraverso cui gli adolescenti arrivano a conoscersi meglio e a capire quale tipo di sessualità li rispecchia, veramente, al di là delle pressioni sociali e culturali.**

**In many European languages the National Standard Variety is converging with spoken, informal, and socially marked varieties. In Italian this process is giving rise to a new standard variety called Neo-standard Italian, which partly consists of regional features. This book contributes to current research on standardization in Europe by offering a comprehensive overview of the re-standardization dynamics in Italian. Each chapter investigates a specific dynamic shaping the emergence of Neo-standard Italian and Regional Standard Varieties, such as the acceptance of previously non-standard features, the reception of Old Italian features excluded from the standard variety, the changing standard language ideology, the retention of features from Italo-Romance dialects, the**

communities across the world. This book offers a comparative analysis summarising the results of the research and explores the impact of social media on politics and gender education and commerce. What is the result of the increased emphasis on visual communication? Are we becoming more individual or more social? Why is public social media so conservative? Why does equality online fail to shift inequality offline? How do memes become the moral police of the internet? Supported by an introduction to the project's academic framework and theoretical terms that help to account for the findings, the book argues that the only way to appreciate and understand something as intimate and ubiquitous as social media is to be immersed in the lives of the people who post. Only then can we discover how people all around the world have already transformed social media in such unexpected ways and assess the consequences.

Representing the first comprehensive analysis of Gaga and Ohad Naharin's aesthetic approach, this book follows the sensual and mental emphases of the movement research practiced by dancers of the Batsheva Dance Company. Considering the body as a means of expression, *Embodied Philosophy in Dance* deciphers forms of meaning in dance as a medium for perception and realization within the body. In doing so, the book addresses embodied philosophies of mind, hermeneutics, pragmatism, and social theories in order to illuminate the perceptual experience of dancing. It also reveals the interconnections between physical and mental processes of reasoning and explores the nature of physical intelligence.

*At the age of ten, when Martin Amis spent a year in Princeton, New Jersey, he was excited and frightened by America. As an adult he has approached that confusing country from many arresting angles, and interviewed its literati, filmmakers, thinkers, opinion makers, leaders and crackpots with characteristic discernment and wit. Included in a gallery of Great American Novelists are Norman Mailer, Gore Vidal, Truman Capote, Joseph Heller, William Burroughs, Kurt Vonnegut, John Updike, Paul Theroux, Philip Roth and Saul Bellow. Amis also takes us to Dallas, where presidential candidate Ronald Reagan is attempting to liaise with born-again Christians. We glimpse the beau monde of Palm Beach, where each couple tries to out-Gatsby the other, and examine the case of Claus von Bulow. Steven Spielberg gets a visit, as does Brian de Palma, whom Amis asks why his films make no sense, and Hugh Hefner's sybaritic fortress and sanitised image are penetrated. There can be little that escapes the eye of Martin Amis when his curiosity leads him to a subject, and America has found in him a superlative chronicler.*

***Domhoff's neurocognitive model helps explain the neural and cognitive bases for dreaming. He discusses how dreams express conceptions and concerns, and how they are consistent over years and decades. He also shows that there may be limits to understanding the meaning of dreams as there are many aspects of dream content that cannot be related to waking cognition or personal concerns. In addition, the book includes a detailed explanation of the methods needed to test the new model as well as a case study of a comprehensive dream journal. Particularly valuable is***

***In Roads to Health, G. Geltner demonstrates that urban dwellers in medieval Italy had a keen sense of the dangers to their health posed by conditions of overcrowding, shortages of food and clean water, air pollution, and the improper disposal of human and animal waste. He consults scientific, narrative, and normative sources that detailed and consistently denounced the physical and environmental hazards urban communities faced: latrines improperly installed and sewers blocked; animals left to roam free and carcasses left rotting on public byways; and thoroughfares congested by artisanal and commercial activities that impeded circulation, polluted waterways, and raised miasmas. However, as Geltner shows, numerous administrative records also offer ample evidence of the concrete measures cities took to ameliorate unhealthy conditions. Toiling on the frontlines were public functionaries generally known as viarii, or "road-masters," appointed to maintain their community's infrastructures and police pertinent human and animal behavior. Operating on a parallel track were the camparii, or "field-masters," charged with protecting the city's hinterlands and thereby the quality of***

*what would reach urban markets, taverns, ovens, and mills. Roads to Health provides a critical overview of the mandates and activities of the viarii and camparii as enforcers of preventive health and safety policies between roughly 1250 and 1500, and offers three extended case studies, for Lucca, Bologna, and the smaller Piedmont town of Pinerolo. In telling their stories, Geltner contends that preventive health practices, while scientifically informed, emerged neither solely from a centralized regime nor as a reaction to the onset of the Black Death. Instead, they were typically negotiated by diverse stakeholders, including neighborhood residents, officials, artisans, and clergymen, and fostered throughout the centuries by a steady concern for people's greater health.*

La vita extraterrestre. Attraversare un buco nero. Un viaggio nel tempo. La quinta dimensione. Superare la velocità della luce. C'è una parola che siamo soliti usare per riferirci a queste cose: «impossibile». A un certo punto della nostra storia abbiamo tracciato una linea mentale oltre la quale la realtà scompariva e iniziava la fantascienza: navi stellari in fiamme al largo dei bastioni di Orione, colonie terrestri su altri pianeti, alieni xenomorfi, portali interdimensionali. La fantasia. L'assurdo. Ma siamo certi che quella linea sia ancora lì dove stava molti anni fa? In un'epoca in cui i treni levitano sopra i binari, le automobili si guidano da sole e le cellule di esseri preistorici estinti da millenni vengono clonate e riportate in vita, che cosa significa davvero «Non è possibile»? Cosimo Bambi ci guida alla scoperta dell'impossibile: tra spazitempi curvi, ipercubi, onde gravitazionali e universi paralleli, il suo è un viaggio nei meandri della fisica contemporanea per provare a capire quanto c'è di vero nelle idee che la nostra immaginazione ha prodotto. Da Flatlandia di Abbott alla teoria delle stringhe, da Star Trek ai muoni, da Ritorno al futuro agli esperimenti del Cern di Ginevra, Bambi passa in rassegna alcuni dei grandi tabù della scienza raccontati da cinema e narrativa per esplorarne la plausibilità alla luce di quello che oggi sappiamo sul cosmo.

Niente è impossibile è una mappa spaziale per spiriti curiosi. Un'opera che, con chiarezza e semplicità, ci mette di fronte ad alcune delle più sconcertanti rivelazioni della ricerca scientifica, facendoci meravigliare non per ciò che ignoriamo ma per ciò che già conosciamo. Perché niente è più stupefacente dell'impossibile che diventa realtà.

What is the essence of black dance in America? To answer that question, Brenda Dixon Gottschild maps an unorthodox 'geography', the geography of the black dancing body, to show the central place black dance has in American culture. From the feet to the butt, to hair to skin/face, and beyond to the soul/spirit, Brenda Dixon Gottschild talks to some of the greatest choreographers of our day including Garth Fagan, Francesca Harper, Meredith Monk, Brenda Buffalino, Doug Elkins, Ralph Lemon, Fernando Bujones, Bill T. Jones, Trisha Brown, Jawole Zollar, Bebe Miller, Sean Curran and Shelly Washington to look at the evolution of black dance and its importance to American culture. This is a groundbreaking piece of work by one of the foremost African-American dance critics of our day.

**In these powerful and stylishly written essays, Maria Manuel Lisboa dissects the work of Paula Rego, the Portuguese-born artist considered one of the greatest artists of modern times. Focusing primarily on Rego's work since the 1980s, Lisboa explores the complex relationships between violence and nurturing, power and impotence, politics and the family that run through Rego's art. Taking a historicist approach to the evolution of the artist's work, Lisboa embeds the works within Rego's personal history as well as Portugal's (and indeed other nations') stories, and reveals the interrelationship between political significance and the raw emotion that lies at the heart of Rego's uncompromising iconographic style. Fundamental to Lisboa's analysis is an understanding that apparent opposites – male and female, sacred and profane, aggression and submissiveness – often co-exist in Rego's work in a way that is both disturbing and destabilising. This collection of essays brings together both unpublished and previously published work to make a significant contribution to scholarship about Paula Rego. It will also be of interest to scholars and students of contemporary painting, Portuguese and British feminist art, and the political and ideological aspects of the visual arts.**
