*Women of Wasps and War is a grim, gripping tale of power and politics, and the heart-breaking struggle between love and honour. Agata, the Duchess of Ambrova, was never meant to take the throne. In a land where men rule, her sole purpose was to smile and curtsy. However, when war left her land leaderless, the Fatherhood religion begrudgingly allowed a first; a woman to rule. Now the war is over the men have returned more arrogant and cruel than ever, and the Duchess is shoved back into a life of needwork and silence. But with her new thirst for justice, Agata is reluctant to allow her country to return to its old ways. Without her position of power, Agata and her circle of women look to the taboo wisdom of the Wasp Women for answers. But this ancient knowledge comes with consequences, and with death and treachery on the horizon, Agata must decide whether it is worth the risk.*

*Whatever it takes... Eleanor Chance has made it her mission to find her husband who has been cursed to roam the netherworld. But her plans are scuppered when a band of sky pirates attack, led by a man hell-bent on revenge. And rumour has it the Council of Warlocks has fallen under the sway of the nefarious Shadow Master – who wants her dead at any cost. Being chased from all sides, Elle will have to channel all of her powers as the Oracle to try to save the man she loves...*

*Mattie, an intelligent automaton skilled in the use of alchemy, finds herself caught in the middle of a conflict between gargoyles, the Mechanics, and the Alchemists. With the old order quickly giving way to the new, Mattie discovers powerful and dangerous secrets – secrets that can completely alter the balance of power in the city of Ayona. This doesn't sit well with Loharri, the Mechanic who created Mattie and still has the key to her heart – literally.*

*A magical new series that will leave readers begging for more! Deborah Harkness, author of A Discovery of Witches In a world where the ancient Great Library of Alexandria was never destroyed, knowledge now rules the world: freely available, but strictly controlled. Owing private books is a crime. Jess Brightwell is the son of a black market book smuggler, sent to the Library to compete for a position as a scholar... but even as he forms friendships and finds his true gifts, he begins to unearth the dark secrets of the greatest, most revered institution in the world. Queen Victoria dismisses her from the Shadow Council, and the only person who can explain anything, Lord Akeldama, unexpectedly leaves town. To top it all off, Alexia is attacked by homicidal mechanical ladybugs, indicating, as only ladybugs can, the fact that all of London's vampires are now very much interested in seeing Alexia quite thoroughly dead. While Lord Maccon elects to get progressively more enbrated and Professor Lyall desperately tries to hold the Woolsey werewolf pack together, Alexia flees England for Italy in search of the mysterious Templars. Only they know enough about the preternatural to explain her increasingly inconvenient condition, but they may be worse than the vampires – and they're armed with pesto.
