

The Cascade Preppers: A Post Apocalyptic Survival Thriller (Graham's Resolution Book 2)

~~~~~**"As that old campfire song says. "There'll Be A Hot Time In The Old Town Tonight!"~~~~~ From USA Today Bestselling Author AR Shaw! ~~~~~ Is it wrong to kill a killer? Dane Talbot uses a world of civil unrest to her advantage and avenges all those who've done her wrong. In the near dystopian future, a quiet firefighter, Dane Talbot, achieves the coveted position of smokejumper, only to soon realize the nation is filled with domestic terrorism and worsening by the day. She sees an opportunity at last to right the wrongs of her past and seeks revenge. But the lawless world of vigilante justice works both ways. Will Dane achieve her goal or will she regret she ever tried. ~~~~~"Character development was refined to perfection and pace of story exceptional. Could not put the book (kindle) down! Nice twist in the story..." ~~~~~"A.R. Shaw's Rebel Blaze: Remember the Ruin is another winning achievement for this author. " ~~~~~"This book is laid out for the perfect character "collision" and she makes it magnificent!" ~~~~~"Wow! I could smell the smoke in this one. Actual physical pain from the detailed descriptions in this story were almost overwhelming. AR SHAW has done it again. I could not put it down!"♥ **Start the journey. Get your copy today!** **Lillie Claire Glidden is unraveling. She knows she's in trouble when she finds her wallet and keys deep in the refrigerator, smelling of lettuce and forgetfulness. And not even her favorite California red wine can dull the pain of the dreaded diagnosis: Alzheimer's. As language starts to fail her and words disappear, Lillie Claire is determined to find a way to pass on the lessons she learned as a child on a Southern porch. Surrounded by family and caregivers, she fights to hold on to the details of her life, and to recognize the woman in the mirror for as long as possible. Told from Lillie Claire's perspective, All the Dancing Birds offers beautiful and terrifying insight into the secret mind of those touched-and ultimately changed-by the mystery of Alzheimer's disease.****

***In the two hours it takes to read our book, you'll learn more about survival medicine, and feel more comfortable handling emergencies, than ever before. Our guide is not about stabilizing injuries until help arrives. It's about learning to treat injuries and illnesses definitively. It's a confidence builder, and we guarantee it to be one of the most valuable resources in your prepper bookshelf! Welcome to the 2nd edition of The Prepper Pages! In this edition we've added image and video links for quick and easy reference. Written by a Trauma Surgeon and contributing physicians, doctors of ThePrepperPages.com are obsessed with teaching you easy, effective treatments for medical conditions preppers most worry about. Conditions we're all likely to face when the world and everything in it goes sideways. Our guide is not about stabilizing injuries until help arrives. Our guide is about treating injuries and illnesses definitively - knowing help will never arrive! Here's what some readers had to say: Survival Medicine - "Literally the best prepper medical guide I have found yet! Well done! No nonsense and no beating around the bush. I feel as if I have learned something." - Steven Trumbo (Emmaus, PA) What will this book teach me? Whether you're buying items to build a comprehensive medical kit, or have found yourself in a disaster without one, this book will teach you exactly what to do. In fact, it will teach you medical and surgical skills you won't find in any other book. "Full of truly useful information on where to get and, even better, how to use items in your emergency medical kit. This is one book that is definitely a must have!" - Shar We are entering the Anthropocene's back loop, a time of release and collapse, confusion and reorientation, in which not only populations and climates are being upended but also physical and metaphysical grounds. Needed now are forms of experimentation geared toward autonomous modes of living within the back loop's new unsafe operating spaces.***

***By bestselling author, AR Shaw! Over forty thousand books sold!GRAHAM'S RESOLUTION:What the world dreads most has happened...The Bitter Earth, is a return to The China Pandemic's beginnings. The first half is the tale of what actually happened in those early days, the panic that ensued. Meet Sheriff's partner, Officer Lincoln Asher and experience those last days. The second half is set eight years into the future after The Malefic Nation. With so few left behind, how will they maintain a society or will they become a nation of lonely scavengers? 'A gorgeous literary novel that asks us to imagine all the possible versions of ourselves that we can imagine' J COURTNEY SULLIVAN 'A suburban srama build to leap form page to screen' Kirkus Reviews 'Fascinating and moving' EOWYN IVEY ----- In a sleepy Oregon town at the base of a dormant volcano, four neighbours find themselves see visions of themselves in an alternate reality, and have to question the choices they've made as natural disaster looms. For fans of Celeste Ng's LITTLE FIRES EVERYWHERE and TV serial SIX FEET UNDER. In the shadow of a dormant volcano in Oregon lies a small town much like any other – though mistier perhaps, and greener. Look out, you may see four neighbours plagued by strange visions. Ginny, a devoted surgeon, is troubled by thoughts of a beautiful colleague in her bed. Mark, a wildlife scientist, foresees imminent and devastating natural disaster. Cass, a brilliant scholar struggling with the demands of a small baby, envisages herself pregnant once more – just as she is returning from research. And then there's Samara, a young estate agent, who glimpses images of her dead mother alive again, healthy and vibrant. As the volcano begins to rumble, it becomes clear that these visions mean more than at first it seemed, and that the fate of this close-knit community hangs in the balance.

Pyrrhic Progress analyses over half a century of antibiotic use, regulation, and resistance in US and British food production. Mass-introduced after 1945, antibiotics helped revolutionize post-war agriculture. Food producers used antibiotics to prevent and treat disease, protect plants, preserve food, and promote animals' growth. Many soon used antibiotic use to sustain and increase production. The resulting growth of antibiotic infrastructures came at a price. Critics blamed antibiotics for leaving dangerous residues in food, enabling bad animal welfare, and selecting for antimicrobial resistance (AMR) in bacteria, which could no longer be treated with antibiotics. Pyrrhic Progress re-examines negotiations that accompanied this process of risk prioritization between consumers, farmers, and regulators on both sides of the Atlantic. Unsurprisingly, solutions differed: while Europeans implemented precautionary antibiotic restrictions to curb AMR, consumer concerns and cost-benefit assessments made US regulators focus on curbing antibiotic use. The result was a growing divergence of antibiotic stewardship and a rise of AMR. Kirchhelle's comprehensive analysis of evolving non-human antibiotic use and the historical complexities of antibiotic stewardship provides important insights for current debates on the global burden of AMR.

On a warm summer night in New York City, the apocalypse begins. Within days, the deadly Medusa virus is sweeping the globe like a wildfire, pushing humanity to the brink of extinction. As civilization crumbles around him, survivor Adam Fisher will discover a flicker of hope that will send him on a quest through a ruined American landscape to find a Bunker

How to Avoid a Climate Disaster

The Cascade Preppers: A Post-Apocalyptic Medical Thriller

The Prepper Pages

Framing Energy Sustainability in the Time of Renewables

Experimentation in Unsafe Operating Space

~~~~~"If you have not read this series, start, now!! Very well worth it, and more. This would make a great movie!!!" - Pete D. USA Today bestselling author A. R. Shaw continues the Graham's Resolution series with the second book in the Graham's Resolution series, The Cascade Preppers. Delivering a far too plausible scenario challenging human survival. The past meets the future as those who survived meet again. Eight years later...where do we find our survivors? Who was Sheriff's original owner and how did he end up on the highway? Bang is now a man. Life without Tala shapes Graham's camp and her daughter is just like her. ~~~~~"Shaw delivers another blockbuster story with The Bitter Earth. She leaves us chomping at the bit for even more."~~~~~"Great characters. Scary stuff because it is all too believable. Makes you wonder how well you would cope in a similar situation and what would be your surprise talent. Highly recommend getting all 5 books and starting the series while on vacation because you will not want to put them down."~~~~~"I really love [this whole series! The books are very well written and I am anxious to read the next book in the series when I finish one!" ~~~~~"I am now just awaiting the next book! I hope it is released soon!" Start the journey. WINNER, Business: Personal Finance/Investing, 2015 USA Best Book Awards FINALIST, Business: Reference, 2015 USA Best Book Awards Investor Behavior provides readers with a comprehensive understanding and the latest research in the area of behavioral finance and investor decision making. Blending contributions from noted academics and experienced practitioners, this 30-chapter book will provide investment professionals with insights on how to understand and manage client behavior; a framework for interpreting financial market activity; and an in-depth understanding of this important new field of investment research. The book should also be of interest to academics, investors, and students. The book will cover the major principles of investor psychology, including heuristics, bounded rationality, regret theory, mental accounting, framing, prospect theory, and loss aversion. Specific sections of the book will delve into the role of personality traits, financial therapy, retirement planning, financial coaching, and emotions in investment decisions. Other topics covered include risk perception and tolerance, asset allocation decisions under inertia and inattention bias; evidenced based financial planning, motivation and satisfaction, behavioral investment management, and neurofinance. Contributions will delve into the behavioral underpinnings of various trading and investment topics including trader psychology, stock momentum, earnings surprises, and anomalies. The final chapters of the book examine new research on socially responsible investing, mutual funds, and real estate investing from a behavioral perspective. Empirical evidence and current literature about each type of investment issue are featured. Cited research studies are presented in a straightforward manner focusing on the comprehension of study findings, rather than on the details of mathematical frameworks.

This book offers an interdisciplinary discussion of the fundamental issues concerning policies for sustainable transition to renewable energies from the perspectives of sociologists, physicists, engineers, economists, anthropologists, biologists, ecologists and policy analysts. Adopting a combined approach, these are analysed taking both complex systems and social practice theories into consideration to provide deeper insights into the evolution of energy systems. The book then draws a series of important conclusions and makes recommendations for the research community and policy makers involved in the design and implementation of policies for sustainable energy transitions.

The Cascade PreppersA Post-Apocalyptic Medical Techno Thriller SeriesA. R. Shaw

Hugh Hefner, the Playboy of the Western World, was a visionary publisher, an empire-builder, an avatar of pleasure, and a pajama-clad pipe-smoker with a pre-coital grin. Although lauded by millions of avid readers, he was denounced by feminists for exploiting women, and defined as "the father of sex addiction," "a huckster," "a lecherous low-brow feeder of our vices," "a misogynist," and, near the end of his life, "a symbol of priapic senility." This ground-breaking biography, the latest in Blood Moon's award-winning string of outrageously unvarnished myth-busters, is the first published since Hefner's death at the age of 91 in 2017. It is a provocative saga, rich in tantalizing, often shocking detail--not recommended for the rigidly sanctimonious or for the faint of heart.

All That Rises

Climate Change, Cultural Collapse, and the Hard Future Ahead

All That Survives

The climate futurist presents a sobering analysis of America's future in the face of climate change—and how we can prepare to make the most of it. After decades of missed opportunities, the door to a sustainable future has closed, and the future we face now is one in which today's industrial civilization unravels in the face of uncontrolled climate change and resource depletion. What is the world going to look like when all these changes have run their course? John Michael Greer seeks to answer this question, using a clear-eyed analysis of ecology, economics, and history to discern what the next 500 years or so might look like. As globalization ends, the United States—and Western civilization—will enter the stages of decline and fall. Though Dark Age America offers an uncompromising assessment of our collective future, it is by no means without hope. Knowing where we're headed is a crucial step in responding to the challenges of the future and doing what we can now to help our descendants make the most of the world we're leaving them.

????????????"It's a nail biter and I'm having to slow myself down reading it." ?????????? From USA Today Bestselling Author AR Shaw! ?????????? With the aid of a canine brigade, can a charade keep the apocalypse away? Sloane finds inspiration from Sun Tzu's, The Art of War. To keep her people safe she now knows she has to bring the fight to the enemy. Her clever deceptions continue in new ways. The last lesson learned, after world's end, is that humanity is too raw once again to live in great numbers. "Good book. Kept me wanting to read more." "What a great ending to a well-written series!" "Dawn of Deception series is awesome. That doesn't even come close to giving it the credit it is due." Start the journey. Get your copy today!

He hated the rules until the power grid failed.Tyler Ford is a tour guide, a brother, and the son of a prepper from Whitefish, Montana. Robbed of a childhood and forced to learn his father's stringent rules of survival for every kind of apocalypse, he couldn't wait to leave home, but when an EMP obliterates the United States electrical grid, takes out communication and stalls vehicles, Tyler must face the past and remember what he taught him if he hopes to make it out of Vegas alive. When chaos erupts, will you know the rules to survive?Erika Lyons just wanted an evening away from the hectic world of hotel management but she got more than she expected. There's only one thing worse than a bad date, that's relying on them to keep you alive. Demanding guests were a challenge, desperate ones, pure hell. As food stops being delivered, vehicles clog up the streets, and society begins to unravel, sin city could be the most dangerous place in America.In a world without power, fighting to stay alive may be the only rule that matters.With no warning, no communication, and planes falling out of the sky, the Ford's may be the only ones who know what it takes to thrive. Can Tyler, and two ordinary strangers survive the perilous journey home to Montana? Can the Ford family hold it together long enough to push back the tide of violence, looters and roving gangs? And will they help the community survive as the world is thrown into darkness?Rules of Survival is book one in Survival Rules, a post-apocalyptic EMP thriller series following the Ford family and their community as they fight to survive after an EMP destroys the nation's power grid.

FBI special agent Mercy Kilpatrick has been waiting her whole life for disaster to strike. A prepper since childhood, Mercy grew up living off the land--and off the grid--in rural Eagle's Nest, Oregon. Until a shocking tragedy tore her family apart and forced her to leave home. Now a predator known as the cave man is targeting the survivalists in her hometown, murdering them in their homes, stealing huge numbers of weapons, and creating federal suspicion of a possible domestic terrorism event. But the crime scene details are eerily familiar to an unsolved mystery from Mercy's past. Sent by the FBI to assist local law enforcement, Mercy returns to Eagle's Nest to face the family who shunned her while maintaining the facade of a law-abiding citizen. There, she meets police chief Truman Daly, whose uncle was the cave man's latest victim. He sees the survivalist side of her that she desperately tries to hide, but if she lets him get close enough to learn her secret, she might not survive the fallout...

The Last Infidels

The Bitter Earth

Rebel Blaze

Playboy's Hugh Hefner

A Post-Apocalyptic Story In The Shadow Of The Coast Mountains

A Post-Apocalyptic EMP Survival Thriller

From the prize-winning author of To Be a Machine - meet the men and women preparing for the end of the world In the remote mountains of Scotland, in high-tech bunkers in South Dakota and in the lush valleys of New Zealand, small groups of determined men and women are getting ready. They are environmentalists who fear the ravages of climate change; billionaire entrepreneurs dreaming of life on Mars; and right-wing conspiracists yearning for a lost American idyll. One thing unites them: their certainty that we are only years away from the end of civilization as we know it. Not unconcerned himself by the possibility of the end of days, Mark O'Connell set out to meet them.

"Thoroughly enjoyed the series. Couldn't put it down... which is why I've already finished reading the book on the day it was released." - Karl From USA Today Bestselling Author AR Shaw! Graham Morgan never set out to survive the apocalypse. He'd only meant to save his dog and those he'd come to love. But then tragedy strikes when the enemy makes a return and this time Graham says goodbye...once and for all.

When the world ends, people don't. Alex Park was an uninvolved PR manager living in North Vancouver, toiling away at his daily life while the world went on around him. Markets crashed, governments cracked down and all he could do was type away at the keyboard at his desk and hope that the world wouldn't come crashing down onto him. It did. When the apocalypse comes, Alex is forced to flee the city before nuclear hellfire rains down on everything he's ever known or loved. And in the aftermath, he and a small group of co-workers must endure the life that goes on after the end of the world, trying to survive in the hellish aftermath of atomic annihilation.As the people around him split and argue over what this new world

means, Alex finds himself torn between the two sides of his own consciousness. What was more important? Survival, or doing what's right? When the chips are down, and your back is against the wall, who do you chose to be? Shadow of the Cascade is a debut novel by aspiring author Kai Hugessen. Written during the worldwide Quarantine enacted due to COVID-19, Shadow of the Cascade is a reflection of the best and worst aspects of the human spirit. It was driven by the fundamental questions we ask about the end of the world. More importantly, it was driven by a need to know what would happen after it.

-When tensions rise, Graham's camp and the hidden community of preppers try to maintain their benevolent relationship. -The human traits of community and compassion are pitted against the instinct to survive. -Are they doomed by their own efforts to coexist? "Haunting and unforgettable. Chillingly realistic." - SpacedMom

"Oh my goodness, this series is fantastic - when is the next novel out!" - D. Bartlett USA Today bestselling author A. R. Shaw continues the Graham's Resolution series with the second book in the Graham's Resolution series, The Last Infidels. Delivering a far too plausible scenario challenging human survival. With spring, they begin to thrive. Then

the true reason for humanity's demise becomes ever more apparent. The remaining survivors must face an enemy far more sinister than anyone ever conceived. A common malevolent enemy of the past emerges and suddenly the pandemic wasn't what it seemed at all.

"Popcorn & Vengeance." - Kindle Customer "Page Turner." - Kindle Customer "A definite 'can't put it down' kind of book." - MadelynnF "A must read if you like survival stories." Rules of Survival: A Post-Apocalyptic Emp Survival Thriller

A Personal Journey to the End of the World and Back

Complex Systems and Social Practices in Energy Transitions

The History of Antibiotics in Anglo-American Food Production

The Wild West

A Post-Apocalyptic Survival Thriller Series

In the tiny town of Cascade, Washington, the members of Graham's camp endure a severe winter season. Meanwhile, The Prepper community remains dedicated to isolation and maintains their benevolent relationship. Tensions rise when tragedy strikes. The human traits of community and compassion are pitted against instincts to survive. Will they be doomed by their own efforts to coexist?

Mike Mitchell, an average New Yorker already struggling to keep his family together, suddenly finds himself fighting just to keep them alive when an increasingly bizarre string of disasters starts appearing on the world's news networks. As both the real world and the cyberworld come crashing down, bending perception and reality, a monster snowstorm cuts New York off from the world, turning it into a wintry tomb where nothing is what it seems.

From USA Today Bestselling Author AR Shaw! "Eerily Plausible," they said. "Too close to reality..." Published in 2013, this is a story of hope when humanity is at its worst. Post-apocalyptic fiction at it's best! "Forget the chores, or sleep for that matter! This story grabs you and doesn't let you go! And it was published in 2013!" "This book fleshes out a possibility that's all too real. She doesn't flinch about what the realities would likely be. She also rejoices with the triumphs, small and large. By the end of the book, you are left with a hope that life will go on even as it is forever changed. It really makes you evaluate your own hopes, fears, and ethics. You're asking, "What would I do?" Not many authors make their characters seem so personal to me. That is something really special. This book is one you should read." - Claudia Lopez What the world dreads most, has happened. * A weaponized bird flu ravaged the globe to near extinction. * A former Seattle math professor races on a journey to survive. * A community of survivalists, without immunity to the killer virus, struggle to remain undetected. * A young girl is exposed, threatening war between those few left behind. Start the journey. Get your copy today!

In this urgent, authoritative book, Bill Gates sets out a wide-ranging, practical - and accessible - plan for how the world can get to zero greenhouse gas emissions in time to avoid a climate catastrophe. Bill Gates has spent a decade investigating the causes and effects of climate change. With the help of experts in the fields of physics, chemistry, biology, engineering, political science, and finance, he has focused on what must be done in order to stop the planet's slide toward certain environmental disaster. In this book, he not only explains why we need to work toward net-zero emissions of greenhouse gases, but also details what we need to do to achieve this profoundly important goal. He gives us a clear-eyed description of the challenges we face. Drawing on his understanding of innovation and what it takes to get new ideas into the market, he describes the areas in which technology is already helping to reduce emissions, where and how the current technology can be made to function more effectively, where breakthrough technologies are needed, and who is working on these essential innovations. Finally, he lays out a concrete, practical plan for achieving the goal of zero emissions—suggesting not only policies that governments should adopt, but what we as individuals can do to keep our government, our employers, and ourselves accountable in this crucial enterprise. As Bill Gates makes clear, achieving zero emissions will not be simple or easy to do, but if we follow the plan he sets out here, it is a goal firmly within our reach.

"A kind of apocalyptic Super Size Me" (The Guardian) that is both "page turning and thoughtful" (Financial Times) about "prepper" communities around the world that are building fortresses against an array of threats. Currently, 3.7 million Americans call themselves preppers. Millions more prep without knowing it. Bradley Garrett, who began writing this book years before the 2020 Covid-19 pandemic, argues that prepping is a rational response to global, social, and political systems that are failing to produce credible narratives of continued stability. Left with a sense of foreboding fueled by disease outbreaks, increasing government dysfunctionality, eroding critical infrastructure, nuclear brinkmanship, and an accelerating climate crisis, people all over the world are responding predictably—by hunkering down. Garrett traveled across four continents to meet those who are constructing panic rooms, building underground backyard survival chambers, stockpiling supplies, preparing go bags, hiding inflatable rafts, rigging mobile "bugout" vehicles, and burrowing deep into the earth. He has returned with "a big-thinking, deep-diving, page-turning study of fear, privilege, and apocalypse" (Robert Macfarlane, author of Underland) from the frontlines of the way we live now: an illuminating reflection on our age of disquiet and dread that brings our times into new and sharper focus. With scenes that are "fascinating, amusing, crazy, chilling, and surreally topical" (Douglas Preston, author of Lost City of the Monkey God), Garrett shows that the bunker is all around us: in malls, airports, gated communities, the vehicles we drive. Most of all, he reveals, it's in our minds.

Unbeaten

All the Dancing Birds

The Psychology of Financial Planning and Investing

Unbound

The Malefic Nation

A Post-Apocalyptic Medical Techno Thriller Series

Four months after an EMP brought the power grid down, Landon Gray and Beth 'Bluebird' Sullivan scrambling to survive. With no power, no internet, no phones, no transportation, and over a thousand miles from his home in Castine, Maine, they set off on a perilous journey using the Appalachian Trail. But as chaos forces the worst of society into their path, they must fight to survive.

What the world dreads most, happened. Now that they've achieved their quest for survival, the true reason for humanity's demise becomes ever more apparent. In her dystopian and post-apocalyptic novel, The China Pandemic, A. R. Shaw created a realistic world after a much too plausible pandemic collapse event. Now, the remaining survivors must face an enemy more sinister than anyone ever conceived. The story moves forward with...The Last Infidels and the terrorists are here. The survivors are back in book three of the Graham's Resolution series. In the tiny town of Cascade, Washington, the members of Graham's camp and the Preppers welcome spring and begin to thrive as a community. Meanwhile, dark forces invade the peace they've cultivated. A common malevolent enemy of the past emerges and suddenly the pandemic wasn't what it seemed at all. Read the ongoing thriller series of Graham's Resolution, Book 3, The Last Infidels, for the startling revelation. Top 100 in Dystopian and Post-Apocalyptic fiction novels. A TEOTWAWKI Prepper thriller fiction favorite.

"Edge of the seat intensity!" From USA Today Bestselling Author AR Shaw! Sometimes you just have to fight. Though she prepared, her most precious commodity is taken from her. With pure will, Sloane Delaney finds a way to fight back. Kent finds, despite his lack of skills, he'll do anything to save those he's come to love. Wren lives through a horror no one imagined.

"Write faster please." Start the journey. Get your copy today!

This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.

Who will survive in the fourth and final book in the bestselling Lone Survivor saga? After a hellish journey on the Appalachian trail, Landon Gray reunites with his wife, Sara only to learn of her infidelity, but that's only the beginning of their troubles. Although all is calm in the coastal community of Castine, Maine, death is at their doorstep. As tragedy strikes close to home, and Mick Bennington manages to turn the tables on them, the small-town they worked so hard to defend is now on the verge of collapse. Without the support of militia, and residents turning on one another, the survivors have no choice but to leave, but leaving isn't easy when family is divided and danger lurks around every corner. Will the Gray's pull together before it's too late, or will Castine fall into the hands of a tyrant? All That Rises is the fourth and final book in the Lone Survivor, post-apocalyptic EMP thriller series that follows a group of survivors as they fight to stay alive after an EMP destroys the nation's power supply.

In the next book in the Wall Street Journal bestselling Mercy Kilpatrick series, there are no such things as little secrets... Raised by preppers, survivalist and FBI agent Mercy Kilpatrick has a deep-rooted need for a safe place. Her getaway in the Cascade Foothills is her secret. But when skeletal remains are unearthed--those of a murdered man linked to a notorious heist--Mercy realizes she isn't the only one with something to hide. Thirty years ago, an armored-car robbery turned deadly. The mastermind was captured. Four conspirators vanished with a fortune. One of them, it appears, never made it out of the woods alive. For Mercy and her fiancé, Police Chief Truman Daly, their investigation opens old wounds in Eagle's Nest that cut deeper than they imagined. Especially when a reckless tabloid reporter draws fresh blood. It's clear to Mercy that somebody in this close-knit community is not who they seem to be. Some are still shattered by the heist. Some still have reason to be afraid. But which one will kill again and again to hide three decades of secrets? To land this case, it's up to Mercy to unmask a familiar stranger before someone else dies.

????????? From USA Today Bestselling Author AR Shaw! ?????????? ??????????"I love?? this series of books!" Graham's Resolution continues with the 6th installment, The Wild West, and this time ???arrows??? fly. Graham Morgan's brief respite is over when he realizes surviving a decade after a devastating pandemic continues. But now it's not his own life threatened; it's the next generation's existence he has to protect from an enemy that just won't quit. With the aid of a peaceful society, the script flips, but will it be enough to save them all from a relentless enemy? ??????????"Enjoyed reading. Lots of action & adventure! Can't wait till the next book comes out." ??????????"Read it in 2 days. Great read. Can't wait for the next episode. You will not regret buying this book."For fans of Lee Child and James Patterson, a medical thriller that hits too close to home by USA Today bestselling author A. R. Shaw.

What the world dreads most has happened - a mutated avian flu pandemic has ravaged the global population. Whether accidental or intentional, only two percent of the population has survived. In the Pacific Northwest, a dying mother recognizes that her young child is among the immune. What will she do to ensure his survival before her own death? Meanwhile, as natural predators invade urban areas, Graham has buried his last remaining family member and promised to carry out his father's advice to make it to the family cabin. He meets with triumph and tragedy learning new rules along the way. Just when he thinks he's finally got a handle on this new world, he's taken by surprise as he learns he's not alone. A hidden community of Preppers is nearby. Will he find the strength to escape these dangers and go on living? And more importantly, will he have the ability to protect those he's come to trust?"In the near future, 98 percent of the Earth's population has been wiped out by a virus developed by the Chinese that was inadvertently unleashed onto the world. In the Pacific Northwest, one man, math professor Graham Morgan, finds the will to live. Having lived through the nightmarish experience of watching his pregnant wife wither away and die, Morgan is now faced with the task of burying his beloved father. All alone in a world increasingly ruled by wild animals--and ruthless human predators--Morgan's goal of making it to an old family cabin deep in the wilderness near a secluded lake is complicated when a dying woman leaves her 5-year-old son at his feet just before she dies. Morgan's journey with the boy takes more than a few unexpected turns as they travel through the dangerous wasteland of what was once civilization. By the time they reach their destination, his group (which now includes 15-year-old twin girls whom Morgan courageously saved from the clutches of a madman) must come to grips with their new reality: Winter is coming, supplies are running out, and there may be a gang of killers living across the lake. Powered by adept character development and relentless pacing, this post-apocalyptic novel, the first in a series...makes for a page-turning, end-of-the-world-as-we-know-it reading experience. ...readers will find Morgan to be an endearing hero at world's end. The beginning of what could be a riveting apocalyptic saga." -Kirkus Review

An already weakened U.S. economy crumbles after a rogue nation detonates a small nuclear bomb in a Los Angeles port. The disastrous economic domino effect known as "Black Autumn" threatens a group of Special Forces vets, their families, and friends, leaving serious doubt that their skills and fortitude will be enough to bridge the deadly gap between modern society and an epoch of American savagery. ??????????"Love the characters and story. Especially considering current circumstances. I felt I was living the story, great way to escape." - Gwenda Hughes USA Today bestselling author A. R. Shaw continues the Graham's Resolution series with book 3, The Malefic Nation. What the world dreads most, had happened. In Graham's Resolution, author A. R. Shaw delivers a far too plausible scenario challenging human survival. Graham struggles with loss and birth at the same time. With an impossible decision, the cure may cost Clarisse her soul. A journey comes to an end but at a cost. "A.R. Shaw really knows how to weave a story - The Malefic Nation had me gripped!" - Debra M. ??"Great fast-paced believable story. Loved the characters and their progression highly recommend!" - Amazon Customer "Again I couldn't put it down great story." - Sylvia Francie Start the journey. Get your copy today!

Notes from an Apocalypse

A Merciful Fate

Recent advances in understanding of fundamental immunology have created new insights into the dynamic interactions between tumors and the immune system. This includes new understanding of T- and B-cell interaction, immune inhibitory mechanisms including the biology of T regulatory cells, myeloid suppressor cells, and dendritic cell subsets. Enhanced understanding of mechanisms underlying T-cell anergy such as arginine deprivation, immunosuppressive cytokines, defective innate and interferon response pathways, and NKG2D downregulation have all provided new insight into suppression of anti-tumor immunity and tumor evasion. In addition to emerging understanding of tumor evasion, new immune targets such as CTLA4 blockade, NK stimulatory receptors, manipulation of the antigen processing and presentation, cytokine and costimulatory responses all provide new possibilities for enhancing anti-tumor immunity even in tumors previously felt to be resistant to immune attack. Several of these strategies have already been realized in the clinic. The volume will explore evolving paradigms in antigen presentation, dendritic cell biology, the innate response and immunosuppressive mechanisms, and emerging strategies for manipulation of the immune system for therapeutic benefit that have realized success in neuroblastoma, leukemia, melanoma, lung cancer, and allogeneic transplantation. Early successes as well as failures will be highlighted to provide a snapshot of the state of clinical immunotherapy with an eye to future possibilities such as combination therapies, adoptive T-cell transfer, and the retargeting of immune cells via T-cell receptor engineering.
