Do you know someone who is just a bit too manipulative and full of himself? Does someone you know charm the masses yet lack the ability to deeply connect with those around her? You might have an Almost Psychopath in your life. Do you know someone who is too manipulative and full of himself? Does someone you know charm the masses yet lack the ability to deeply connect with those around her? Grandiosity and exaggerated self-worth. Pathological lying. Manipulation. Lack of remorse. Shallowness. Exploitation for financial gain. These are the qualities of Almost Psychopaths. They are not the deranged criminals or serial killers that might be coined "psychopaths" in the movies or on TV. They are spouses, coworkers, bosses, neighbors, and people in the news who exhibit many of the same behaviors as a full-blown psychopath, but with less intensity and consistency. In *Almost a Psychopath*, Ronald Schouten, MD, JD, and James Silver, JD, draw on scientific research and their own experiences to help you identify if you are an Almost Psychopath and, if so, guide you to interventions and resources to change your behavior. If you think you have encountered an Almost Psychopath, they offer practical tools to help you: recognize the behavior, attitudes, and characteristics of the Almost Psychopath; make sense of interactions you've had with Almost Psychopaths; devise strategies for dealing with them in the present; make informed decisions about your next steps; and learn ways to help an Almost Psychopath get better control of their behavior. The *Almost Effect™* Series presents books written by Harvard Medical School faculty and other experts that offer guidance on common behavioral and physical problems falling in the spectrum between normal health and a full-blown medical condition. These are the first publications to help general readers recognize and address these problems.

"Compelling, essential reading for understanding the underpinnings of psychopathy." — M. E. Thomas, author of *Confessions of a Sociopath* For his first fifty-eight years, James Fallon was by all appearances a normal guy. A successful neuroscientist and professor, he'd been raised in a loving family, married his high school sweetheart, and had three kids and lots of friends. Then he learned a shocking truth that would not only disrupt his personal and professional life, but would lead him to question the very nature of his own identity. While researching serial killers, he uncovered a pattern in their brain scans that helped explain their cold and violent behavior. Astonishingly, his own scan matched that pattern. And a few months later he learned that he was descended from a long line of murderers. Fallon set out to reconcile the truth about his own brain with everything he knew as a scientist about the mind, behavior, and personality.

What if society wasn't fundamentally rational, but was motivated by insanity? This thought sets Jon Ronson on an utterly compelling adventure into the world of madness. Along the way, Jon meets psychopaths, those whose lives have been touched by madness and those whose job it is to diagnose it, including the influential psychologist who developed the Psychopath Test, from whom Jon learns the art of psychopath-spotting. A skill which seemingly reveals that madness could indeed be at the heart of everything . . . Combining Jon Ronson's trademark humour, charm and investigative incision, *The Psychopath Test* is both entertaining and honest, unearthing dangerous truths and asking serious questions about how we define normality in a world where we are increasingly judged by our maddest edges.

Most people are both repelled and intrigued by the images of cold-blooded, conscienceless murderers that increasingly populate our movies, television programs, and newspaper headlines. With their flagrant criminal violation of society's rules, serial killers like Ted Bundy and John Wayne Gacy are among the most dramatic examples of the psychopath. Individuals with this personality disorder are fully aware of the consequences of their actions and know the difference between right and wrong, yet they are terrifyingly self-centered, remorseless, and unable to care about the feelings of others. Perhaps most frightening, they often seem completely normal to unsuspecting targets--and they do not always ply their trade by killing. Presenting a compelling portrait of these dangerous men and women based on 25 years of distinguished scientific research, Dr. Robert D. Hare vividly describes a world of con artists, hustlers, rapists, and other predators who charm, lie, and manipulate their way through life. Are psychopaths mad, or simply bad? How can

they be recognized? And how can we protect ourselves? This book provides solid information and surprising insights for anyone seeking to understand this devastating condition.

An Introduction

Ghostwritten

Grade A student. Grade A psychopath.

A Malcolm Gladwell, Susan Cain, Daniel Pink and Adam Grant NEXT BIG IDEA book club read about how to avoid the pitfalls of too little, and too much, complexity. 'Essential insights into the character of human choice and decision-making.' ROBERT CIALDINI, bestselling author of *Influence* _____ In this groundbreaking exploration of how our brains work, psychologist Professor Kevin Dutton explains that by understanding the nature of our hardwired black and white thinking we are better equipped to negotiate life's grey zones and make subtler and smarter decisions. Our brains are hardwired to sort, categorize and draw lines. It's how we navigate the kaleidoscope of everyday information. Yet imagine failing an exam by a mere 1 per cent. Or being caught speeding at just 1 mph over the speed limit. We have to draw the line somewhere, we say. But lines can be unhelpful or even dangerous when drawn where they aren't wanted, or in too thick a hand. By thinking in terms of 'them' or 'us' and 'this' or 'that' we isolate ourselves from ideas we don't agree with and people who are not the same as us. We fail to listen to the other side of the argument and beliefs become polarized. Intolerance and extremism flourish. The human race has survived by making binary decisions, but such thinking might also destroy us. We may be programmed to think in black and white but rainbow thinking is the key to our cognitive future. _____ 'Fascinating, important and entirely convincing.' SIR PHILIP PULLMAN

'Essential insights into the character of human choice and decision-making.' ROBERT CIALDINI, author of *Influence* _____ From the author of the bestselling *The Wisdom of Psychopaths*, this is a wake-up call, a groundbreaking and timely explanation of the polarization seen in some of the biggest global news stories of our times. - We isolate ourselves from people who are not the same as us. - We refuse to listen to the other side of the argument. - We think in black and white - them or us, left or right, Leave or Remain - and dangerous possibilities arise. ISIS. Brexit. Trump. The Alt-Right. We are hardwired to think in black and white, and our binary brains have led to increasingly polarized beliefs and a rising tide of religious intolerance and political extremism. But by understanding our evolutionary programming we can learn how to see the grey areas and make rational sense of our complex world. In this appeal for a better future, Oxford University psychologist Dr Kevin Dutton argues for a world in which we make subtler - and far better - decisions. _____ 'Fascinating, important and entirely convincing.' An enlightening and entertaining look at how to use your inner psychopath to get the most out of LIFE. What is a good psychopath? And how can thinking like one help you to be the best that you can be? Professor Kevin Dutton has spent a lifetime studying psychopaths. He first met SAS hero Andy McNab during a research project. What he found surprised him. McNab is a diagnosed psychopath but he is a GOOD PSYCHOPATH. Unlike a BAD PSYCHOPATH, he is able to dial up or down qualities such as ruthlessness, fearlessness, conscience and empathy to get the very best out of himself -- and others -- in a wide range of situations. Drawing on the combination of Andy McNab's wild and various experiences and Professor Kevin Dutton's expertise in analysing them, together they have explored the ways in which a good psychopath thinks differently and what that could mean for you. What do you really want from life, and how can you develop and use qualities such as charm, coolness under pressure, self-confidence and courage to get it? *The Good Psychopath's Guide to Success* gives you a unique and entertaining road-map to self-fulfillment both in your personal life and your career.

Winner of the Mail on Sunday/John Llewellyn Rhys Prize. A magnificent achievement and an engrossing experience, David Mitchell's first novel announced the arrival of one of the most exciting writers of the twenty-first century. An apocalyptic cult member carries out a gas attack on a rush-hour metro, but what links him to a jazz buff in downtown Tokyo? Or to a Mongolian gangster, a woman on a holy mountain who talks to a tree, and a late night New York DJ? Set at the fugitive edges of Asia and Europe, Ghostwritten weaves together a host of characters, their interconnected destinies determined by the inescapable forces of cause and effect.

Approximately 15% of chief executive officers are psychopathic, and many more have psychopathic traits. The Psychopathic CEO, An Executive Survival Guide was written for executives who are in a challenging work environment and suspect that their organizations are led by such a person. This book will help you to identify a potential psychopath in the corner office and to develop a survival strategy - for yourself and the company you lead. Jack McCullough is the president and founder of the CFO Leadership Council, a professional association for financial leaders. He has held many roles throughout his career, including entrepreneur, CEO, board member, author and public speaker, in addition to serving as financial executive for 26 different companies. His previous book, Secrets of Rockstar CFOs, was published in 2019. He holds an MBA from the MIT Sloan School of Management and lives in Massachusetts with his wife and two teenage sons. For this book, McCullough interviewed medical professionals, law enforcement agents, as well as investors and executives who were victims of a psychopathic leader. The Psychopathic CEO is a fascinating look at these remorseless manipulators and will help you and your company survive a psychopath in the corner office.

Psychopath. The word conjurs up images of serial killers, rapists, suicide bombers, gangsters. But think again: you could probably benefit from being a little more psychopathic yourself. Psychologist Kevin Dutton has made a speciality of psychopathy, and is on first-name terms with many notorious killers. But unlike those incarcerated psychopaths, and all those depicted in movies and crime fiction, most are not violent, he explains. In fact, says Prof Dutton, they have a lot of good things going for them. Psychopaths are fearless, confident, charismatic and focused--qualities tailor-made for success in today's society. The Wisdom of Psychopaths is an intellectual rollercoaster ride that combines lightning-hot science with unprecedented access to secret monasteries, Special Forces training camps, and high-security hospitals. In it, you will meet serial killers, war heroes, financiers, movie stars and attorneys--and discover that beneath the hype and popular characterization, psychopaths have something to teach us. Like the knobs on a mixing deck, psychopathy is graded. And finding the right combination of psychopathic traits, sampled and mixed at carefully calibrated volumes, can put us ahead of the game. Immediate Action is a no-holds-barred account of an extraordinary life, from the day Andy McNab was found in a carrier bag on the steps of Guy's Hospital to the day he went to fight in the Gulf War. As a delinquent youth he kicked against society. As a young soldier he waged war against the IRA in the streets and fields of South Armagh. As a member of 22 SAS Regiment he was at the centre of covert operations for nine years - on five continents. Recounting with grim humour and in riveting, often horrifying, detail his activities in the world's most highly trained and efficient Special Forces unit, McNab sweeps us into a world of surveillance and intelligence-gathering, counter-terrorism and hostage rescue. There are casualties: the best men are so often the first to be killed, because they are in front. By turns chilling, astonishing, violent, funny and moving, this blistering first-hand account of life at the forward edge of battle confirms Andy McNab's standing in the front rank of writers on modern war.

In 1983 Andy McNab was assigned to B Squadron, one of the four Sabre Squadrons of the SAS, and within it to Air Troop, otherwise known as SEVEN TROOP. This is Andy McNab's gripping account of the time he served in the company of a remarkable group of men from the day, freshly badged, he joined them in the Malayan jungle, to the day, ten years later, that he handed in his sand-coloured beret and started a new life. The links they forged then bound them inextricably together, but the things they saw and did during that time would take them all to breaking point and some beyond in the years that were to follow. An "entertaining" look at the psychology and neuroscience behind the act of influencing others (Kirkus Reviews). People try to persuade us every day. From the news to the Internet to coworkers and family, everyone and everything wants to influence our thoughts in some way. And in turn, we hope to persuade others. Understanding the dynamics of persuasion can help us to achieve our own goals—and resist being manipulated by those who don't necessarily have our best interests at heart. Psychologist Kevin Dutton has identified a powerful strain of immediate, instinctual persuasion, a method of influence that allows people to disarm skepticism, win arguments, and close deals. With a combination of astute methods and in-depth research in the fields of psychology and neuroscience, Dutton's fascinating and provocative book: Introduces the natural super-persuaders in our midst: Buddhist monks, magicians, advertisers, con men, hostage negotiators, and even psychopaths. Reveals which hidden pathways in the brain lead us to believe something even when we know it's not true. Explains how group dynamics can make us more tolerant or deepen our extremism. Illuminates the five elements of SPICE (simplicity, perceived self-interest, incongruity, confidence, and empathy) for instantly effective persuasion. "[Split-Second Persuasion] offers some powerful insights into the art and science of getting people to do what you want." —New Scientist

A chilling and provocative scientific dissection of the psychopath's brain Fact: A psychopath is 6 times more likely to commit a new crime after release from prison. Fact: Some forms of group therapy make psychopaths more likely to commit a new crime compared to no treatment at all. Fact: A psychopath is born every 47 seconds. Kent Kiehl is the 'Psychopath Whisperer', a neuroscientist who has dedicated his career to understanding what makes a mind turn criminal. Are psychopaths 'evil' and untreatable, or do they suffer from a mental illness comparable to schizophrenia or epilepsy? Do they - do we - have free will? Based on breathtaking research, including personality surveys and brain imaging scans of thousands of criminals, Kiehl pinpoints the biological machinery of psychopathy - and offers a radical new perspective on identifying & treating the psychopaths in our midst.

Spoken from the Front is the story of the Afghan Campaign, told for the first time in the words of the servicemen and women who have been fighting there. With unprecedented access to soldiers of all ranks, as well as pilots, reservists,

engineers, medics, Royal Military police, mechanics, cooks and other military personnel, Andy McNab has assembled a portrait of modern conflict like never before. This is the full experience of our troops on the ground and in the air. The horrors, cruelties, drudgery, excitement and banter of these soldiers' lives combine to form a chronological narrative of all the major events in Helmand during the British Army's time there. From their action-packed, dramatic, moving and often humorous testimonies in interviews, diaries, letters and emails written to family, friends and loved ones, emerges a 360-degree picture of guerrilla warfare up close and extremely personal. It is as close to the real thing as you can get.

'A riveting ride through your own brain' - Adam Grant, New York Times bestselling author of Originals WINNER of the Society for Personality and Social Psychology's book prize for 'The Promotion of Social and Personality Science' If humans are fundamentally good, why do we engage in acts of great cruelty? If we are evil, why do we sometimes help others at a cost to ourselves? Whether humans are good or evil is a question that has plagued philosophers and scientists for as long as there have been philosophers and scientists. Many argue that we are fundamentally selfish, and only the rules and laws of our societies and our own relentless efforts of will can save us from ourselves. But is this really true? Abigail Marsh is a social neuroscientist who has closely studied the brains of both the worst and the best among us—from children with psychopathic traits whose families live in fear of them, to adult altruists who have given their own kidneys to strangers. Her groundbreaking findings suggest a possibility that is more optimistic than the dominant view. Humans are not good or evil, but are equally (and fundamentally) capable of good and evil. In The Fear Factor Marsh explores the human capacity for caring, drawing on cutting edge research findings from clinical, translational and brain imaging investigations on the nature of empathy, altruism, and aggression and brings us closer to understanding the basis of humans' social nature. "I didn't know how to deal with the poisonous and toxic people in my life or why they behaved the way they did, so I went looking for an answer. This book is what I found." Bestselling author David Gillespie turns his attention to a phenomenon that damages businesses, seeds mental disease and discomfort and can bring civilisations to the brink of implosion - the psychopath. Psychopaths are often thought of as killers and criminals, but actually five to ten per cent of people are probably psychopathic without ever indulging in a single criminal act. These everyday psychopaths may be charming in the early stages of relationships or employment but, Gillespie argues, their presence in your life is at best disruptive, and at worst highly dangerous: they will leave you feeling cheated and humiliated, dominating and manipulating you to the point where you question your sanity. Worse, he cautions, at a societal level their tendency to gravitate towards positions of power can be disastrous. *Taming Toxic People* is a practical guide to restraining that difficult person in your life, be it your boss, your spouse or a parent. But it is also a serious and meticulously researched warning: if we value a free and well-functioning society, we need to rebuild the sense of community that has historically kept the everyday psychopath in check, and we must understand and act to manage the psychopathic behaviour in our midst.

Each world faith tradition has its own distinctive relationship with science, and the science-religion dialogue benefits from a greater awareness of what this relationship is. In this book, members of the International Society for Science and Religion (ISSR) offer international and multi-faith perspectives on how new discoveries in science are met with insights regarding spiritual realities. The essays reflect the conviction that "religion and science each proceed best when they're pursued in dialogue with each other, and also that our fragmented and divided world would benefit more from a stronger dialogue between science and religion." In Part One, George F. R. Ellis, John C. Polkinghorne, and Holmes Rolston III, each a Templeton Prize winner, discuss their views on why the science and religion dialogue matters. They are joined in Part Two by distinguished theologians Fraser Watts and Philip Clayton, who place the dialogue in an international context; John Polkinghorne's inaugural address to the ISSR in 2002 is also included. In Part Three, five members of the ISSR look at the distinctive relationships of their faiths to science: •Carl Feit on Judaism •Munawar Anees on Islam •B.V. Subbarayappa on Hinduism •Trinh Xuan Thuan on Buddhism •Heup Young Kim on Asian Christianity George Ellis, the recently elected second president of ISSR, summarizes the contributions of his colleagues. Ronald Cole-Turner then concludes the book with a discussion of the future of the science and religion dialogue.

'What if I were to tell you that a psychopathic arsonist might also be the person most likely to save you from a burning building?' *This book is about a special kind of persuasion: 'flipnosis'. It has an incubation period of just seconds, and can instantly disarm even the most discerning mind. Flipnosis is black-belt mind control. It doesn't just turn the tables, it kicks them over. *From the malign but fascinating powers of psychopaths, serial killers and con men to the political genius of Winston Churchill - via the grandmasters of martial arts, Buddhist monks, magicians, advertisers, salesmen, CEOs and frogs that mug each other - Kevin Dutton's brilliantly original and revelatory book explores what cutting-edge science can teach us about the techniques of persuasion.

What is a good psychopath? And how can thinking like one help you to be the best that you can be? Professor Kevin Dutton has spent a lifetime studying psychopaths. He first met SAS hero Andy McNab during a research project. What he found surprised him. McNab is a diagnosed psychopath but he is a GOOD PSYCHOPATH. Unlike a BAD PSYCHOPATH, he is able to dial up or down qualities such as ruthlessness, fearlessness, conscience and empathy to get the very best out of himself – and others – in a wide range of situations. Drawing on the combination of Andy McNab's wild and various experiences and Professor Kevin Dutton's expertise in analysing them, together they have explored the ways in which a good psychopath thinks differently and what that could mean for you. What do you really want from life, and how can you develop and use qualities such as charm, coolness under pressure, self-confidence and courage to get it? The Good Psychopath Manifesto gives you a unique and entertaining road-map to self-fulfillment both in your personal life and your career.

"What is a psychopath? How can we tell? Are psychopaths always a risk to the public? How safe are we from criminal psychopaths? This basic guide looks at the history and development of psychopathy. It gives practical illustrations and explains key provisions for dealing with criminal psychopaths (with examples). It also examines possible causes, the difficulties involved in the assessment of risk, and the tools used to determine whether or not someone has a psychopathic personality. Psychopathy may exist in the boardroom, politics or sport just as it does in our prisons—sometimes driven or successful people can exhibit similar traits without unduly adverse reaction. But when located in an individual with violent tendencies things become problematic and the chances are that they will not be deterred by or respond to everyday approaches to crime and punishment. Psychopaths may be cold, calculating, manipulative and lack empathy for victims or others. They may be charming, intelligent and walk the streets unnoticed. This book looks at how we seek to identify those who are dangerous or predatory and the arrangements to contain them in prisons and secure hospitals in the name of public safety (often for long periods of time). An expert introduction based on huge experience; Suitable for professionals, academics and general readers; With Questions, Suggestions for Further Reading and a Glossary of key terms. □They are Manfred-like characters, existing in their own time and space□: Dr Emmanuel Miller, in conversation with the author. □I think we have to be willing to go into the darkness□: Leading psychiatrist, Sarah Trevelyan. □Reflects immense scholarship based on multidisciplinary perspectives, innate decency and an ability to convey complex behaviours in a readable style□: John Harding CBE. □A much needed text from one of the doyens in this field□: Professor David Wilson. Professor Herschel Prins is highly respected in crime and mental health circles, having started out as a probation officer, worked for the Home Office, taught in universities and served on the Parole Board, Mental Health Review Tribunal, Mental Health Act Commission and as chair of various inquiries concerning psychopaths."

The #1 New York Times bestselling memoir of U.S. Navy Seal Chris Kyle, and the source for Clint Eastwood's blockbuster movie which was nominated for six academy awards, including best picture. From 1999 to 2009, U.S. Navy SEAL Chris Kyle recorded the most career sniper kills in United States military history. His fellow American warriors, whom he protected with deadly precision from rooftops and stealth positions during the Iraq War, called him "The Legend"; meanwhile, the enemy feared him so much they named him al-Shaitan ("the devil") and placed a bounty on his head. Kyle, who was tragically killed in 2013, writes honestly about the pain of war—including the deaths of two close SEAL teammates—and in moving first-person passages throughout, his wife, Taya, speaks openly about the strains of war on their family, as well as on Chris. Gripping and unforgettable, Kyle's masterful account of his extraordinary battlefield experiences ranks as one of the great war memoirs of all time.
