The coroner's report identifies the body as young, black, female, and impossibly anonymous. Yet one thing is clear to Detective Chief Inspector Jane Tennison about the latest victim discovered in one of London's poorest districts - that news of her murder will tear apart a city already cracking with racial tensions, hurling Scotland Yard and Tennison herself into a maelstrom of shocking accusations and sudden, wrenching violence. Even as London's brutal killer remains at large, Tennison remains locked in a struggle to overcome her station house's brutal chauvinism and insidious politicking. And as the department's deeply rooted racism rears its head to overshadow every facet of her new investigation, the trail of her prime suspect is growing colder. Worse, when the details of the beleaguered detective's stormy personal life explode across the headlines of London's sleasiest tabloids, Tennison's already frenzied determination to bring the killer

to justice will be catapulted into obsession - one that could send her spiralling over the edge. **Lynda La Plante's Widows is now a major motion picture**

Is a change of identity all it takes to leave prison? Colin Burrows is desperate. Recently sent to prison for burglary, he knows that his four year sentence means that he will miss the birth of his first child. With his wife's due date fast approaching, he had hoped that the prison authorities would allow him to be present for the birth, but they have said no. Sharing a cell with Colin is Barry Marsden. Unlike most of the inmates, Barry actually likes prison life because he has come from a very difficult family and been in and out of a series of foster homes. In prison, he has three meals a day and he has discovered a talent for drawing. So he is upset that he will have to leave on parole soon. Sad to see his cellmate looking depressed, Barry hatches a plan to get Colin out of jail for the birth. It's a plan so crazy that either it will fail and get both men in deeper trouble, or it might just work. Bestselling author Lynda La Plante's exciting tale of one man's escape from jail is based on a true story. **Lynda La Plante's Widows? is now a major motion picture**

Maria Montessori's method of educating children, which she details in this book, is based on a conception of liberty for the pupil; it entails formal training of separate sensory, motor, and mental capacities; and leads to rapid and substantial mastery of the elements of reading, writing, and arithmetic. The Montessori Method is important because it springs from a combination of sympathy and intuition, social outlook, scientific training, intensive study of educational problems and the author's unusual experience as a teacher and educational leader. Following opening statements from J. McV. Hunt and Jaan Valsiner, Maria Montessori discusses topics including pedagogical methods used in the children's houses, discipline, diet, gymnastics, manual labor, education of the senses, intellectual education, methods of teaching reading and writing, language in childhood, and teaching of numeration. This classic volume in the education of children takes on urgent relevance for parents, teachers, and administrators in all parts of our society. The suburban mother seeking an environment of "structured freedom" for an imaginative, quick-learning pre-schooler; the educator jolted into awareness that slum children are irreparably handicapped by cultural impoverishment before the age of six; explorers of "new"

techniques of teaching reading, of programmed instruction and learning by conditioning and reinforcement-by-approval--all these are instructed by Maria Montessori's theory and the reports of her work in the Casa dei Bambini in the slum quarter of Rome.

Together with the companion volume by the same author, Operators, Functions, coed Systems: An Easy Reading. Volume 2: Model Operator and Systems, Mathematical Surveys and Monographs, Vol. 93, AMS, 2002, this unique work combines four major topics of modern analysis and its applications: A. Hardy classes of holomorphic functions. B. Spectral theory of Hankel and Toeplitz operators, Hardy classes of holomorphic functions is known to be the most powerful tool in complex analysis for a variety of applications, starting with Fourier series, through the Riemann ζ -function, all the way to Wiener's theory of signal processing. Spectral theory of Hankel and Toeplitz operators becomes the supporting pillar for a large part of harmonic and complex analysis and for many of their applications. In this book, moment problems, Nevanlinna-Pick and Carathéodory interpolation, and the best rational approximations are considered to illustrate the power of Hankel and Toeplitz operators. The book is geared toward a wide audience of readers, from graduate students to professional mathematicians, interested in operator theory and functions of a complex variable. Tire two volumes develop an elementary approach while retaining an expert level that can be applied in advanced analysis and selected applications.
