

The Lost Destroyer (Lost Starship Series Book 3)

Human pioneers fleeing Earth for the promised land of New Eden found hell instead, falling prey to the reptilian Kresh. But street-savvy Cyrus Gant escaped the aliens, rescued master telepath Klane, and began a desperate journey to head off the impending Kresh invasion of Earth. When the insectile Chir and human cyborgs join the war, Cyrus suddenly faces a triple threat. Only by absorbing the powerful consciousness of the mortally wounded Klane does he stand a chance against the deadly enemies surrounding him. But when a malevolent alien entity invades his mind, Cyrus must do battle in both outer and inner space to save his soul and his sanity. In the thrilling sequel to Alien Honor and Alien Shores, Cyrus rolls the dice to win the biggest prize anyone has ever chased: the future of humanity.

Through desperate tactics and by deliberately keeping a low profile, we survived the machine assaults longer than any human or cybership thought possible. But now our luck has deserted us. The main A.I. brain-core has just given human extinction top priority. The robots are massing an armada to exterminate us.We've done what we could in expectation of this grim day, grabbing enemy factory planets to mass produce warships. And we found an ally, the Star Lords of Roke. But it's just not enough, damn it.We need more...like the alien void ship Hawkins once saw. Or maybe we can make a deal with the treacherous Cog Primus. One thing's sure. We'd better do it soon or we'll join thousands of other extinct species obliterated by the hateful death machines.A.I. VOID SHIP is the sixth book in the series chronicling humanity's war for survival against the galactic machine juggernaut.The series starts with book 1, A.I. DESTROYER.

This book presents the ontological and logical foundation of a new form of thinking, the beginning of an [absolute phenomenology.] It does so in the context of the history of thought in Europe and America. It explores the ramifications of a categorically new logic. Thinkers dealt with include Plato, Galileo, Hegel, Kierkegaard, Marx, Nietzsche, Husserl, Heidegger, Peirce, James, Dewey, Derrida, McDermott, and Altizer.

"Space is vast, dark, and not your friend. Gamma rays and neutrino bursts erupt from dying stars to cook you alive, black holes tear you apart, and the void itself boils your blood and seizes your brain. Try to scream and no one can hear you - hold your breath and you rupture your lungs. Space isn't as empty as you'd think, either - its frontiers are ever expanding. Rival governments wage a cold war of aggression while greedy corporations vie for valuable resources. Colonists reach for the stars and gamble with their lives - each new world tamed is either feast or famine. And there are things lurking in the shadows of every asteroid - things strange and different and deadly. Things alien. This is the official ALIEN tabletop roleplaying game - a universe of body horror and corporate brinkmanship, where synthetic people play god while space truckers and marines serve host to newborn ghoulish creatures. It's a harsh and unforgiving universe and you are nothing if not expendable. Stay alive if you can"--Back cover.
