When a hole appears in the road, the workers have to use lots of different big machines to help them fix it. Diggers, road rollers, dump trucks, and pavers — each vehicle has an important job to do. Follow the workers as they clear the rubble, add crushed stones, pour on the hot asphalt, make sure the surface is flat, and clean the road. Readers also search for the little brown dog (belonging to the road workers) on nearly every spread. Extra illustrations of each of the machines are shown and labeled on the endpapers.

Battling Chronic Dizziness

Psychotherapist and author of Fathering The Next Generation William Jarema offers a "second chance" to people who have gaping holes where parental gifts of lifeskills for wholeness should be. Their name is legion. Many become addicted in their pain. These addictions to food or drugs, to relationships or self-destructive behaviors are the frantic attempts to fill the void - the "hole in the chest" feeling so familiar to an adult child. This wise and comforting book proves that it's never too late to grow up, to become whole, to heal - to live life to the full.

Lily imagines her sadness as a hole, which is getting bigger and swallowing up her life--until a friend shows her how to patch her hole and make it managable.

Them Before Us has flipped the script on adult-centric attitudes toward marriage, parenthood, and reproductive technologies by framing these issues around a child’s right to be raised by both their mother and father. Set against a backdrop of sound research, the compelling stories throughout each chapter confirm that a child’s mental, physical, and emotional well-being depends on being loved by the two people responsible for their existence. It’s a paradigm shift that will impact the personal and the political, and reframe every marriage and family conversation across the globe. Them Before Us dispels many prevalent, harmful myths concerning children’s rights, such as:
• Kids need only love and safety–moms and dads are optional.
• Love makes a family–biology is irrelevant.
• Marriage is about adults–it has nothing to do with kids.
• Children are resilient and will “get over” divorce.
• Studies show “no difference” in outcomes for kids with same-sex parents.
• Sperm and egg donor kids are fortunate because they are so wanted.
• Surrogacy is a great way to help wannabe parents have a baby.
• Reproductive technologies are just like adoption. Are you tired of a culture that views adults as victims in family matters, when it’s clear that kids are the ones who truly pay the price? If so, we are your people, and this is your movement.

An inspirational, life-affirming memoir from the great-grandson of J.R.R. Tolkien. Having grown up on their great-grandfather's stories, Royd Tolkien and his brother, Mike, have always enjoyed adventures. So when Mike is diagnosed with Motor Neurone Disease, the brothers decide to use the time they have left to tick off as much as possible from Mike's bucket list, from remote camping in Norway to travelling through Royd's beloved New Zealand. Yet, when Royd loses Mike, he discovers his brother had been writing another kind of bucket list: fifty things he wanted Royd to do after his death. His first task? Mike wants his mild-mannered brother to trip up on his way to the lectern to deliver his eulogy. What follows is a set of emotionally charged tests that will push Royd firmly out of his comfort zone. This is the story of Royd's journey to accomplish a challenging, humorous, and often heart-breaking list of unknown tasks that chart the brothers' lives from childhood to adulthood. But above all, it is a story of the sibling bond, of grief--and of treasuring every moment.

Winner of the Akutagawa Prize, The Hole is by turns reminiscent of Lewis Carroll, David Lynch, and My Neighbor Totoro, but is singularly unsettling Asa's husband is transferring jobs, and his new office is located near his family's home in the countryside. During an exceptionally hot summer, the young married couple move in, and Asa does her best to quickly adjust to their new rural lives, to their remoteness, to the constant presence of her in-laws and the incessant buzz of cicadas. While her husband is consumed with his job, Asa is left to explore her surroundings on her own: she makes trips to the supermarket, halfheartedly looks for work, and tries to find interesting ways of killing time. One day, while running an errand for her mother-in-law, she comes across a strange creature, follows it to the embankment of a river, and ends up falling into a hole—a hole that seems to have been made specifically for her. This is the first in a series of bizarre experiences that drive Asa deeper into the mysteries of this rural landscape filled with eccentric characters and unidentifiable creatures, leading her to question her role in this world, and eventually, her sanity.

Alice in Wonderland (also known as Alice's Adventures in Wonderland), from 1865, is the peculiar and imaginative tale of a girl who falls down a rabbit-hole into a bizarre world of eccentric and unusual creatures. Lewis Carroll's prominent example of the genre of "literary nonsense" has endured in popularity with its clever way of playing with logic and a narrative structure that has influence generations of fiction writing.
