**Volume 1 of 3. This monumental three-volume work on the Italian madrigal from its beginnings about 1500 to its decline in the 17th century is based on the research of 40 years, and is a cultural history of the development of Italian music. Mr. Einstein, renowned musicologist, supplies a background and a sense of proportion to the field: he gives the right order to the single composers in the evolution of the madrigal, attaches new values to old names, and places in the foreground the outstanding, but until now rather neglected, personality of Cipriano de Rore. His work is not, however, purely musicological; his object is to inquire into the functions of secular music in Italian life during the Cinquecento, and to contribute to our knowledge and understanding of that great century in general. Translated from the German by Oliver Strunk, Roger Sessions and Alexander H. Krappe. Originally published in 1948. "Did Rudolf Steiner dream these things? Did he dream them as they once occurred, at the beginning of all time? They are, for sure, far more astonishing than the demiurges and serpents and bulls found in other cosmogonies.' -- Jorge Luis Borges

Rudolf Steiner recorded his view of the world in numerous books. He also gave more than 5,000 lectures, in which he explained his ideas, using only minimal notes. When describing especially difficult subjects, Steiner frequently resorted to illustrating what he was saying with colored chalk on a large blackboard. After his earlier lectures, the drawings were erased and irretrievably lost. After the autumn of 1919, however, thick black paper was used to cover the blackboards so that the drawings could be rolled up and saved. The Trustees of Rudolf Steiner's Estate in Dornach, Switzerland, possess more than a thousand such drawings. A selection of these drawings was first shown to the general public in 1992, and since then, exhibitions in Europe, America, and Japan have generated much interest in Steiner's works.

**This story is of life for human beings in the year 2092. With continual discoveries in new medicines and alternative systems of healthy eating the life span of humans is reaching far beyond the working age of 120 years. Thomas and Phoebe with the collaboration of their close friends Maia and Nicholas travel on a quest to uncover the two most important discoveries of their age. Human beings are about to travel through the universe. The two hemispheres governing the earth build a close alliance with the planet MARS. The biggest spaceship ever built – in the shape of a large shining egg, is the size of a small planet. On board is a representative from Earth. The people of Earth have named the ship The Star Discovery Arch and it will, when finished, fly on her maiden voyage through the solar system of BETA CENTAURY with the friends on board..... The author declares this tale, the places, the protagonist and their names that travel through this journey together is only fruit of is imagination – none can refer to any reality. *The title of this collection, Shifting the Scene, adapts words from one of the Choruses in Henry V. Its essays try, without denying authority to the text and the theatre, to widen the scene of inquiry to include other institutions, like education, politics, language, and the arts, and to juxtapose the constructions of Shakespeare and his works that have been produced by them.*

*However, as in Henry V, there is also a geographical dimension. The collection goes beyond England and the English-speaking world and focuses on Europe (including Britain). It brings together 17 essays by leading authorities and promising young scholars in the field*
