Are spiritual parents uniquely ordained to lead a movement for wiser use of media and digital devices for our children? Gloria DeGaetano thinks so. In *Left to Their Devices...What's Left?* you will find provocative poems and compelling prayers that capture the angst, fear, guilt, confusion, and frustration of parenting in today's "screen machine world." You will also find solace and wisdom,

hope and inspiration. Use this book as a personal meditation. Discuss it at church. Share it with your book club or PTA. Show it to a relative whose child struggles with computer addiction. Give it to new parents, encouraging careful future decisions. Use this book to make a positive change in your life and in the lives of those you love. Left to Their Devices...What's Left? is a spiritual call to action...from your heart. Heed the call. Take action.

Hey kids, do you want to know how to make all-stars for your baseball league? Or parents, do you feel like the coaches keep passing your child up? Well no more! Or

coaches, want drills and ways to motivate your players to get better? Coach Andy Collins is going to tell you everything he knows from his 35 years of youth and adult coaching and watching what works and what doesn't work. It's chock-full of ideas in 86 pages. He'll cover: *

- * How your league chooses all-stars
- * What all-star selectors are really looking for
- * 7 tried and true methods of getting better at baseball
- * But more importantly, little known ways to get the people picking the team to notice you
- * And how to beat the "politics" that seem to get in the way

Year after year kids sit in the stands crying after the all-star teams are announced and they weren't one of

the players that were chosen. At the same time the students I've trained do make these same all-star teams. It was then I realized I had the information that the kids in the stands and their parents and coaches were looking for. Wherever there are kids around the world that play youth baseball, there are kids that long to make the league's all-star team. Every year it's the same, kids that desperately want to have their name called out (or see it announced on the list) don't make it, and a little bit of them is hurting deep inside; and they don't know why they were not picked. Little did they know that they could have fairly accurately predicted their chances almost from day one of

when the season started. And if they knew what you're about the find out, they could improve enough in skill in the eyes of the all-star selectors as to be a better player or even make the all-star team. The good news is that in this book, there is a way to learn how to make the all-star team for the next upcoming season; and if not then, the following year (if you're willing to listen and follow the advice I give). While I have written this for parents and coaches to learn how this process works and how they can help these youngsters achieve their dreams, this is mostly a book written for the kid who wants to make all-stars, not a book for the parent who wants their kid to make all-stars

English for Children Picture Book Series English for Children (Musical Dialogues) consists of 24 lessons designed for children from ages 1-6 for English as native speakers, and 4 to 12 for ESL and EFL learners. Older students with no background in English may enjoy the songs and videos as well. Music involves the children and supports their ability to understand and remember the new vocabulary. Each lesson introduces approximately 6-20 words and is presented in musical dialogue form.

In the early 1980s I heard that a customer always buys the

benefit of a product. That made me interested, and I wanted to learn what a customer benefit is. With this knowledge I could probably improve my skills as a salesman and achieve better results. But there was also another interesting question that this matter raised. How many benefits are there? Thousands, hundreds, tens, or less? I started to look for the answers in the literature. After looking through numerous marketing books and articles, I recognized that customer benefit is one of the main concepts. Nevertheless, I could not find a satisfactory description of customer benefits, or an answer to the number of customer benefits. This was the starting

point for my study. And I'm happy to share the results of my work with you now. I have considered both the B2C and B2B environment in the results. Consumers and companies experience the same benefits, but there can be a difference in the sources of the benefits, and there can also be different emphasis of the benefits. In B2B selling you need to take a note of all the various needs of the actors in the supply chain besides the needs of the end customer.

Döstädning, or the art of death cleaning, is a Swedish phenomenon by which the elderly and their families set their affairs in order. Whether it's sorting the family heirlooms from the junk, downsizing to a smaller place, or setting up a system to help you stop misplacing your keys, death cleaning gives us the chance to make the later years of our lives as comfortable and stress-free as possible.

Whatever your age, Swedish death cleaning can be used to help you de-clutter your life, and take stock of what's important. Margareta Magnusson has death cleaned for herself and for many others. Radical and joyous, her guide is an invigorating, touching and surprising process that can help you or someone you love immeasurably, and offers the chance to celebrate and reflect on all the tiny joys that make up a long life along the way.

The title says it all. If you are in the process of writing a book, or if you're considering it, there are dozens of things you won't know - and that you should. What I want to do here is share about my experience over about fifteen years of writing my first novels, and the years of publishing and

Fernando Soto dreamed of owning a business. For years he worked and struggled, never imagining that he could have a better life and then one day he woke up and believed that he could. In *What's Next for You?*, Mr. Soto shares the secrets to the fulfillment of his dream. But guess what? It's no secret at all. Living your dream is possible through hard work, dedication and an unrelenting will to succeed. Today, Mr. Soto owns a contract janitorial services company that services a broad range of clients in a variety of industries, from small office clients to automobile dealerships, manufacturing facilities, office buildings, medical practices and universities. From Scotland, his engaging story moves to England and Wales, then to his father's discovery of bauxite in Jamaica, and ultimately to Canada, recounting a family's social progress over two centuries. Of special interest to Innes cousins near and far is the tantalizing tale of the Stow Succession. In the nineteenth century several branches of the Innes clan believed they had a rightful claim to the vast fortune of Jane Innes of Stow. The author's family was among them. Using simple text and illustrations, describes the nine months of life before birth.

Bernadette and Norman Smith have just celebrated their fiftieth wedding anniversary. After all these years, they are still romantic and in love. They have four children who all have children of their own. The children live in nearby Los Angeles not far from the retirement park where Bernadette and Norman are living. Of all the grandchildren she has, Bernadette has a favorite, Eddie. She and Eddie,

When setting up her computer he scatters his back pack belongings all over the sofa in the study. He hurriedly grabs them up when his dad says it is time to go. Bernadette thinks that the study could use a little change of décor. As she slides the sofa away from the wall she discovers a book wedged in between the wall and the sofa. The book is *Infinite Jest* by David Foster Wallace. On the

Inside cover someone has written "Eddie's Bible". Bernadette believes that Eddie has left her this treasure -- a modern translation of the Bible specifically for young people. And she begins to read it. She doesn't tell anyone about the book, but it starts to influence her decisions and beliefs. As she is beginning her senescence, her mind is aging, too, and logic is fleeing. She, in fact, is showing senility. How will the book influence her decisions about her children and grandchildren? How will it change how she copes and how she feels as old age begins to take its toll on both she and Norman.

landing from his orbit-parked rocket, when the Martian stood up and said hesitantly, "Excuse me, please, but where is it?" That baffled the Professor and the Martian seemed to grow anxious--at least his long mouth curved upward, and he had earlier explained that it curling downward was his smile--and he repeated, "Please, where is it?" He was surprisingly humanoid in most respects, but his complexion was textured so like the rich dark armchair he'd just been occupying that the Professor's pin-striped gray suit, which he had eagerly consented to wear, seemed an arbitrary interruption between him and the chair--a sort

We all know about kangaroos, koalas and gum trees, but do Australian children really know about this country's land, waters, wildlife and original inhabitants? Australia is old. Really old. We are the home of the oldest living plant, oldest animal fossils and the oldest continuing culture of people on earth. This book takes 6- to 10-year-olds on a colourful journey of Australia from the time of Gondwanaland and megafauna through to today. There are pages on 'Australia's Not-very-famous Animals', 'Who's

In a world where reproduction is strictly controlled, they are society's rejects. Unwanted and unloved, they are raised to age twelve, then taken beyond the Boundary and left to fend for themselves, to survive or perish. Wild Children is a story of abandonment and survival, of hope and determination, and of a love that refused to die.

As a research neuroscientist, Lise Eliot has made the study of the human brain her life's work. But it wasn't until she was pregnant with her first child that she became intrigued with the study of brain development. She wanted to know precisely how the baby's brain is formed, and when and how each sense, skill, and cognitive ability is developed. And just as important, she was interested in finding out how her role as a nurturer can affect this complex process. How much of her baby's development is genetically ordained--and how much is determined by environment? Is there anything parents can do to make their babies' brains work better--to help them become smarter, happier people? Drawing upon the exploding research in this field as well as the stories of real children, *What's Going On in There?* is a lively and thought-provoking book that charts the brain's

development from conception through the critical first five years. In examining the many factors that play crucial roles in that process, *What's Going On in There?* explores the evolution of the senses, motor skills, social and emotional behaviors, and mental functions such as attention, language, memory, reasoning, and intelligence. This remarkable book also discusses: how a baby's brain is "assembled" from scratch the critical prenatal factors that shape brain development how the birthing process itself affects the brain which forms of stimulation are most effective promoting cognitive development how boys' and girls' brains develop differently how nutrition, stress, and other physical and social factors can permanently affect a child's brain Brilliantly blending cutting-edge science with a mother's wisdom and insight *What's Going On in There?* is an invaluable contribution to the

his others. After working with the bestselling crime writer for years, she's intimately familiar with his detective, Atticus Pünd, who solves mysteries disturbing sleepy English villages. An homage to queens of classic British crime such as Agatha Christie and Dorothy Sayers, Alan's traditional formula has proved hugely successful. So successful that Susan must continue to put up with his troubling behavior if she wants to keep her job. Conway's latest tale has Atticus Pünd investigating a murder at Pye Hall, a local manor house. Yes, there are dead bodies and a

Masterful, clever, and relentlessly suspenseful, *Magpie Murders* is a deviously dark take on vintage English crime fiction in which the reader becomes the detective.

real -- and growing -- part of our lives. In *Sight Unseen*, Budd Hopkins and coauthor Carol Rainey show how fascinating discoveries in modern science support the plausibility of the UFO phenomenon. Featuring sixteen never-before-published cases, *Sight Unseen* probes two newly uncovered patterns in alien abduction: cases of UFO "invisibility" and reports of genetically altered alien beings who interact with humans during their routine lives. The "invisibility" accounts detailed by Hopkins include numerous daylight abductions in densely populated urban areas -- all apparently unseen and accomplished

through a technology of invisibility. Two air force non-coms are snatched from the tarmac of a busy military airfield. An Australian family is levitated up into a hovering craft while the father remains paralyzed on the ground with a camera to his eye. The resulting evidence on film is discussed in terms of our own scientific advances. In the second series of cases, abductees report encounters with beings who appear human but apparently possess paranormal powers and stunted emotional ranges. Three young women, unknown to each other, are mysteriously summoned to "job interviews." In ordinary

office settings, they encounter human-looking beings who lead them into baffling UFO abduction experiences. A Wisconsin farmer meets "Damoe," a man with odd behavior who closely resembles his son. Damoe eventually reveals himself as an accomplice of UFO occupants in a startling abduction of the farmer and his wife. Five-year-old Jen is abducted at night to a nearby playground. There she must teach the techniques and skills of "play" to twelve seemingly identical, quasi-human children. cutting-edge advances in our own technologies and scientific theories that show how these new UFO patterns could have a concrete basis in contemporary science. Included are an examination of cloaking devices for aircraft, mind-control technologies, and teleportation achieved in the lab. Perhaps the most compelling argument to support these cases lies in the startling and controversial new science of transgenics that actually allows for the creation of alien/human beings.
