

Who's Your City?: How The Creative Economy Is Making Where To Live The Most Important Decision Of Your Life

In this sequel to his prescient New York Times bestseller Rise of the Robots, Martin Ford presents us with a striking vision of the very near future. He argues that AI is a uniquely powerful technology, a kind of "electricity of intelligence" that is altering every dimension of human life, often for the better with advanced science being done by machines who can solve problems humans can not. AI has the potential to help us fight climate change or the next pandemic, but it also has a capacity for profound harm. Deep fakes-AI-generated audio or video of events that never happened-are poised to cause havoc throughout society. AI empowers authoritarian regimes like China with unprecedented mechanisms for social control. And AI can be deeply biased, learning bigoted attitudes from the data used to train algorithms and perpetuating them. Hard-hitting and thought-provoking, covering everything from self-driving cars to the history of deep learning to apps for diagnosing skin cancer, Rule of the Robots challenges our fears and preconceptions about artificial intelligence. Ford argues that AI is here to stay and the real question is not how to stop it, but how to control its negative potential and harness its power for good as AI transforms our economy, our politics, and our lives.

An essential guide to building supportive entrepreneurial communities "Startup communities" are popping up everywhere, from cities like Boulder to Boston and even in countries such as Iceland. These types of entrepreneurial ecosystems are driving innovation and small business energy. Startup Communities documents the buzz, strategy, long-term perspective, and dynamics of building communities of entrepreneurs who can feed off of each other's talent, creativity, and support. Based on more than twenty years of Boulder-based entrepreneur-turned-venture capitalist Brad Feld's experience in the field as well as contributions from other innovative startup communities, this reliable resource skillfully explores what it takes to create an entrepreneurial community in any city, at anytime. Along the way, it offers valuable insights into increasing the breadth and depth of the entrepreneurial ecosystem by multiplying connections among entrepreneurs and mentors, improving access to entrepreneurial education, and much more. Details the four critical principles needed to form a sustainable startup community Perfect for entrepreneurs and venture capitalists seeking fresh ideas and new opportunities Written by Brad Feld, a thought-leader in this field who has been an early-stage investor and successful entrepreneur for more than twenty years Engaging and informative, this practical

guide not only shows you how startup communities work, but it also shows you how to make them work anywhere in the world.

Never before have our cities been as important as they are now. The drivers of innovation and growth, they are essential to the prosperity of nations. But they are also destructive, plunging us into housing crises and deepening inequality. How can we keep the good and break free of the bad? In this bracingly original work of research and analysis, leading urbanist Richard Florida explores the roots of this new crisis and puts forward a plan to make this the century of the fairer, thriving metropolis.

Life is hard for Gary. He has a dead-end job, a grouchy boss, and a beat-up car-and he's only in eighth grade! Things go from bad to worse when a wave of bank robberies hits the city and Gary becomes the prime suspect. With time running out to clear his name and nail the real crooks, this teenage tough-guy must rely on cunning, stealth, and good, old-fashioned, two-fisted justice! It's all in a day's work in a city that doesn't exist.

In Recast Your City: How to Save Your Downtown with Small-Scale Manufacturing, community development expert Ilana Preuss explains how local leaders can revitalize their downtowns or neighborhood main streets by bringing in and supporting small-scale manufacturing. Small-scale manufacturing businesses help create thriving places, with local business ownership opportunities and well-paying jobs that other business types can't fulfill. Preuss draws from her experience working with local governments, large and small, from Knoxville, Tennessee, to Columbia, Missouri, to Fremont, California. She provides tools, such as her five-step method for recasting your city, that local leaders in government, business, and real estate as well as entrepreneurs and advocates in every community can use.

In the age of globalization, some claim that where you live doesn't matter: Alaska, Idaho, and Alabama are interchangeable. The world is, after all, flat. Not so fast. Place, argues the great urbanist Richard Florida, is not only important, it's more important than ever. In fact, choosing a place to live is as important to your happiness as choosing a spouse or career. And some regions, recent surveys show, really are happier than others. In Who's Your City, Creative Class guru Richard Florida reports on this growing body of research that tells us what qualities of cities and towns actually make people happy -- and he explains how to use these ideas to make your own choices. This indispensable guide to how people can choose where to live and what those choices mean to their lives and their communities is essential reading for everyone from urban planners and mayors to recent graduates.

Scandals and malpractice at companies like GE, Theranos and WeWork have raised justified questions among regulators, shareholders, and the public about the quality of corporate governance. Boards face ever-louder demands to weigh in on questions of climate change, racial and gender equity, data privacy, and other social issues that range far beyond their traditional mandate: choosing the CEO and endorsing corporate strategy. In *HOW BOARDS WORK*, prizewinning economist, veteran board director, and bestselling author Dambisa Moyo offers an insider's view of corporate boards as they are buffeted by the turbulence of our times. Drawing on her decade of experience serving on corporate boards, Moyo lays out what it is that boards actually do, and she outlines how they must adapt to survive the challenges of coming years. Corporations need boards that are more transparent, more knowledgeable, more diverse, and more deeply involved in setting the strategic course of the companies they lead. *HOW BOARDS WORK* is an urgent road map for how boards can steer companies through tomorrow's challenges and ensure they thrive to benefit their employees, shareholders, and society at large.

And How They Can Work Better in a Chaotic World

This book examines the paradoxes, challenges, potential and problems of urban living. It understands cities as they are, rather than as they may be marketed or branded. All cities have much in common, yet the differences are important. They form the of both imaginative policy development and productive experiences of urban life. The phrase 'city imaging' is often used in public discourse, but rarely defined. It refers to the ways that particular cities are branded and marketed. It is based on the assumption that urban representations can be transformed to develop tourism and attract businesses and in-demand workers to one city preference to another. However, such a strategy is imprecise. History, subjectivity, bias and prejudice are difficult to temper

needs of either economic development or social justice. The taste, smell, sounds and architecture of a place all combine to construct the image of a city. For researchers, policy makers, activists and citizens, the challenge is to use or transform this. The objective of this book is to help the reader define, understand and apply this process. After a war on terror, a credit crunch, a recession, cities still do matter. Even as the de-territorialization of the worldwide web enables the free flow of money, music, ideas across national borders, cities remain important. *City Imaging: Regeneration, Renewal, Decay* surveys the iconography of urbanity and explores what happens when branding is emphasized over living.

A provocative new way to think about why we live as we do today-and where we might be headed. Initially published in 2003, *Rise of the Creative Class* quickly achieved classic status for its identification of forces then only beginning to reshape our economy, geography, and workplace. Weaving story-telling with original research, Richard Florida identified a fundamental shift linking a host of seemingly unrelated changes in American society: the growing importance of creativity in people's work lives, the emergence of a class of people unified by their engagement in creative work. Millions of us were beginning to work and live much as creative types like artists and scientists always had, Florida observed, and this Creative Class was determining how the workplace was organized, what companies would prosper or go bankrupt, and even which cities would thrive. In *The Rise of the Creative Class Revisited*, Florida further refines his occupational, demographic, psychological, and economic profile of the Creative Class, incorporates a decade of research, and adds five new chapters covering the global effects of the Creative Class and exploring the factors that shape "quality of place" in our changing cities and suburbs.

Experience True Liberation by Seeing Your Beauty, Femininity, and Freedom From Heavens Point of View Has Christianity kept women trapped in the stone age? In many ways, yes; but this is not by Gods design. As society offers women opportunities to explore outer-space and govern nations, the church often stifles and limits them. The tide is changing, though. Amber Picotas Gods Feminist Movement is a new covenant manifesto calling women to embrace their true identity in Christ and fulfill their destiny as revolutionaries who shape the course of history with the Kingdom of God. There is a powerful new feminist movement emerging in the body of Christ. Its not politically driven and its not being championed by an uprising of angry man-haters. Based on an intense study of Scripture, factoring in historical and contextual hermeneutics and original languages, Picota shares a practical, non-legalistic, and non-traditional (yet deeply Biblical) look at topics that women commonly face, such as: Dating and Modesty Female Leaders in the Church Submission in Marriage Beauty and Self-Image Celebrate the power and beauty of womanhood. God has given you permission to change the world by being you! Break off religious traditions that keep women trapped in old school legalism and move beyond Christian clichés that minimize a womans true position in Christ!

Brooklyn—famed for its bridge, its long-departed Dodgers, its Botanic Garden, and its accent—is the most populous borough in New York City and arguably the most colorful. Its many neighborhoods boast diverse and shifting ethnic enclaves, an abundance of architectural styles, and an amazing number of churches and festivals. Generously illustrated with both historical and contemporary photographs, *The Neighborhoods of Brooklyn* is an indispensable and entertaining guide. Begun as an offshoot of *The Encyclopedia of New York City*, which provides much of the historical background, the book takes its character from the neighborhoods themselves, as detailed by the Citizens Committee for New York City and Brooklyn Borough Historian John Manbeck. Taking us on a tour of some 90 neighborhoods (including ghost neighborhoods that no longer exist), the book identifies the boundaries of each one through a neighborhood profile and a street map. There is also an essay on each neighborhood as well as an insert with practical tips on subways, buses, libraries, police precincts, fire departments, and hospitals. In addition, each entry includes eclectic neighborhood facts: Erasmus Hall Academy, in Flatbush, boasts such famous graduates as Barbra Streisand and Bobby Fischer; during Poland's 1990 elections, more than 5,000 absentee ballots were postmarked Greenpoint. The introduction by Kenneth T. Jackson gives an overview of Brooklyn, while an index allows readers to locate key sites within the borough. In 1898, when it was the third largest city in the United States, the City of Brooklyn merged with New York City to become one of its five boroughs. A century later it is time to salute this unique community in a book that

What if the church in your city becomes known for its love? God is on the move and doing a new thing around the globe. Citywide movements and global urban mission are two merging trends turning the church inside-out. In cities worldwide, the church is becoming known for its love, like Jesus said. How can you start such a movement in your city, town, or community? Most urban mission textbooks are written from and for a Western context, but this book is different! Jacob Bloemberg shares the story of Love Hanoi, a campaign-turned-movement that has been enjoying success since 2012 in the capital city of Vietnam. In this book, he provides the theological foundation of building the city and explains how urban mission concepts can be adapted for citywide movements in any cultural context. Love [Your City] also features practical tools and helpful tips for students, practitioners, and mission leaders so that they, too, can start transforming their cities and making the church known for its love!

Abortion. Physician-assisted suicide. Same-sex marriages. Embryonic stem-cell research. Poverty. Crime. What is a faithful Christian response? The God of the Bible is unquestionably a God of justice. Yet Christians have had their differences as to how human government and the church should bring about a just social order. Although Christians share many deep and significant theological convictions, differences that threaten to divide them have often surrounded the matter of how the church collectively and Christians individually ought to engage the public square. What is the mission of the church? What is the purpose of human government? How ought they to be related to each other? How should social injustice be redressed? The five noted contributors to this volume answer these questions from within their distinctive Christian theological traditions, as well as responding to the other four positions. Through the presentations and ensuing dialogue we come to see more clearly what the differences are, where their positions overlap and why they diverge. The contributors and the positions taken include Clarke E. Cochran: A Catholic Perspective Derek H. Davis: A Classical Separation Perspective Ronald J. Sider: An Anabaptist Perspective Corwin F. Smidt: A Principled Pluralist Perspective J. Philip Wogaman: A Social Justice Perspective This book will be instructive for anyone seeking to grasp the major Christian alternatives and desiring to pursue a faithful corporate and individual response to the social issues that face us.

World-renowned urbanist Richard Florida's bestselling classic on the transformation of our cities in the twenty-first century—now updated with a new preface In his modern classic The Rise of the Creative Class, urbanist Richard Florida identifies the emergence of a new social class reshaping the twenty-first century's economy, geography, and workplace. This Creative Class is made up of engineers and managers, academics and musicians, researchers, designers, entrepreneurs and lawyers, poets and programmer, whose work turns on the creation of new forms. Increasingly, Florida observes, this Creative Class determines how workplaces are organized, which companies prosper or go bankrupt, and which cities thrive, stagnate or decline. Florida offers a detailed occupational, demographic, psychological, and economic profile of the Creative Class, examines its global impact, and explores the factors that shape "quality of place" in our changing cities and suburbs. Now updated with a new preface that considers the latest developments in our changing cities, The Rise of the Creative Class is the definitive edition of this foundational book on our contemporary economy.

Redefining a "Woman's Place" From a Biblical Perspective

For years, south Dallas has been ruled by a corrupt caste of politicians who espouse populist rhetoric. Growing fat and rich while their constituents wallow in crime and poverty. Jebediah Shaw never wanted to make the city his home. It had never been more than a place to rest between wars. And now, working in that dark area between government and private business, he's given an impossible task. To keep a man alive that everyone, including himself, has a reason to want dead while choosing sides in a Civil War no one even knows is happening. At the beginning of the end of the American empire, at the edge of what was and what will be, he knows in the end all a man has, all he has any control over, is his word and his work. He will do whatever it takes to complete his mission. Dallas, may never be the same.

We tend to view prolonged economic downturns, such as the Great Depression of the 1930s and the Long Depression of the late nineteenth century, in terms of the crisis and pain they cause. But history teaches us that these great crises also represent opportunities to remake our

*economy and society and to generate whole new eras of economic growth and prosperity. In terms of innovation, invention, and energetic risk taking, these periods of "creative destruction" have been some of the most fertile in history, and the changes they put into motion can set the stage for full-scale recovery. In The Great Reset, bestselling author and economic development expert Richard Florida provides an engaging and sweeping examination of these previous economic epochs, or "resets." He distills the deep forces that have altered physical and social landscapes and eventually reshaped economies and societies. Looking toward the future, Florida identifies the patterns that will drive the next Great Reset and transform virtually every aspect of our lives -- from how and where we live, to how we work, to how we invest in individuals and infrastructure, to how we shape our cities and regions. Florida shows how these forces, when combined, will spur a fresh era of growth and prosperity, define a new geography of progress, and create surprising opportunities for all of us. Among these forces will be * new patterns of consumption, and new attitudes toward ownership that are less centered on houses and cars * the transformation of millions of service jobs into middle class careers that engage workers as a source of innovation * new forms of infrastructure that speed the movement of people, goods, and ideas * a radically altered and much denser economic landscape organized around "megaregions" that will drive the development of new industries, new jobs, and a whole new way of life We've weathered tough times before. They are a necessary part of economic cycles, giving us a chance to clearly see what's working and what's not. Societies can be reborn in such crises, emerging fresh, strong, and refocused. Now is our opportunity to anticipate what that brighter future will look like and to take the steps that will get us there faster. With his trademark blend of wit, irreverence, and rigorous research and analysis, Florida presents an optimistic and counterintuitive vision of our future, calling into question long-held beliefs about the nature of economic progress and forcing us to reassess our very way of life. He argues convincingly that it's time to turn our efforts -- as individuals, as governments, and as a society -- to putting the necessary pieces in place for a vibrant, prosperous future.*

Toxic culture is eroding our sense of belonging, community and well-being. Our capacity to collaborate and innovate together is also being undermined by the rising incivility and divisiveness. We need each other to address the complex challenges facing our cities and communities--from the infrastructure deficit to climate change, homelessness, mental health and addiction issues. In order to thrive, our local democracies depend on our ability to revive the art of living and working well together. Save Your City author and veteran community builder Diane Kalen-Sukra, MA, CMC empowers community leaders and citizens to be part of the solution. She demonstrates what's involved by taking readers on a journey from Bullyville to Sustainaville, including an eye-opening visit to classical antiquity. The successful journey includes a renaissance of civic values and civic education as vital to fostering the type of culture that can sustain us, our democracy and our planet.

A leading American legal scholar offers a surprising account of the incompleteness of prevailing theories of freedom of speech. Robert C. Post shows that the familiar understanding of the First Amendment, which stresses the "marketplace of ideas" and which holds that "everyone is entitled to an opinion," is inadequate to create and preserve the expert knowledge that is necessary for a modern democracy to thrive. For a modern society reliably to answer such questions as whether nicotine causes cancer, the free and open exchange of ideas must be complemented by standards of scientific competence and practice that are both hierarchical and judgmental. Post develops a theory of First Amendment rights that seeks to explain both the need for the free formation of public opinion and the need for the distribution and

creation of expertise. Along the way he offers a new and useful account of constitutional doctrines of academic freedom. These doctrines depend both upon free expression and the necessity of the kinds of professional judgment that universities exercise when they grant or deny tenure, or that professional journals exercise when they accept or reject submissions.

Creating Thriving Neighborhoods and Adapting to a Changing World

Today many pastors are struggling to adapt to a post-Christian culture without abandoning orthodox theology. How do we communicate the concepts of grace and substitutionary atonement in our globalized culture and context? In *Center Church*, Timothy Keller offers challenging insights and provocative questions based on over twenty years of ministry in New York City. This book outlines a theological vision for ministry - applying classic doctrines to our time and place - organized around three core commitments:

- Gospel-centered: The gospel of grace in Jesus Christ changes everything, from our hearts to our community to the world. It completely reshapes the content, tone and strategy of all that we do.
- City-centered: With a positive approach toward our culture, we learn to affirm that cities are wonderful, strategic and underserved places for gospel ministry.
- Movement-centered: Instead of building our own tribe, we seek the prosperity and peace of our community as we are led by the Holy Spirit.

"In this important book, Tim Keller unpacks the gospel and gently but firmly reminds us that it is nonnegotiable. At the same time, he enables us to think through how we can responsibly interact with the culture, how we can - indeed, must - appreciate good things within it, and how we can firmly and faithfully apply the gospel to it." - D.A. Carson, research professor of New Testament, Trinity Evangelical Divinity School

When you move to a new city you look at a map to get you where you need to be, but a Google Map of San Francisco won't tell you where you can get "Real Dim Sum" or where "The Worst Trader Joes Ever" is. A must read for anyone who believes that God has a higher purpose for your life, and you long to break free from the status quo to be used by Him in a greater way. The good news is that God has faith in you. He is not calling you based on your past track record, your education, or what side of town you live on. None of these things are what qualifies you. God is only looking for your availability. Are you willing to be used by Him to powerfully impact others who are hurting and to bring positive change to the challenges faced within your community? The Bible is clear that God promises to be with us to accomplish any task He sets before us, even if it is in the hard places. In this book you will discover Biblical keys, and practical steps, to raise your sights for living every day with the Greater One on the inside of you. In our communities crime is rampant, drug addiction epidemic, homelessness continues to rise, and poverty and unemployment abound. Traditionally our prayers have been focused on bringing these needs to God and asking what He will do about them. But what if He wants to use you as part of His answer? Every day God intends your work to become your worship and for you to embrace your neighborhood as your mission. This book will affirm your calling into the marketplace where you can show others the love of God. It will provide you with the encouragement to step out. Consider this as road map for effective outreach in your city in ways and places that you may have never considered before. As you go, you may be surprised to find that Your City is Waiting on You!

Tired of watching your city being degraded by new development that doesn't fit? Paying for city plans that never get implemented? Wondering what your city can do to respond to climate change? In his groundbreaking book, *Fixing Your City*, Portland urban architect George Crandall reveals how to produce city plans that mitigate climate change and create healthy places to live, work, and play. This is not a theoretical book about cities - it is a practical book based on Crandall's wide experience transforming cities in the U.S. and Canada over the last 40 years.

The chilling Saga of Darren Shan, the ordinary schoolboy plunged into the vampire world.

Kama Mastromonaco believes true heroes are not the superheroes of movies, but the people who stand on the frontlines during a crisis, who lay their lives down for us on a daily basis, and those who are the closest to us and offer consistent inspiration, education, and protection. This inspirational and colorfully illustrated picture book presents children with positive influences and strong role models to help them grow in today's society. Included are a doctor, nurse, farmer, pilot, mother, father, brother, sister, firefighter, policeman, teacher, construction worker, and soldier. Each has brief description of why that character should be considered a hero. A perfect book for parents, caregivers, and teachers of children ages 2-7, helping kids to look up to different types of people and professions, and see them in a heroic light.

Save Your City: How Toxic Culture Kills Community & What to Do about It

"Should appeal to all rugged individualists who dream of escape to the forest."—The New York Times Book Review Sam Gribley is terribly unhappy living in New York City with his family, so he runs away to the Catskill Mountains to live in the woods—all by himself. With only a penknife, a ball of cord, forty dollars, and some flint and steel, he intends to survive on his own. Sam learns about courage, danger, and independence during his year in the wilderness, a year that changes his life forever. "An extraordinary book . . . It will be read year after year." —The Horn Book

"Nonstop Metropolis, the culminating volume in a trilogy of atlases, conveys innumerable unbound experiences of New York City through twenty-six imaginative maps and informative essays. Bringing together the insights of dozens of experts—from linguists to music historians, ethnographers, urbanists, and environmental journalists—amplified by cartographers, artists, and photographers, it explores all five boroughs of New York City and parts of nearby New Jersey. We are invited to travel through Manhattan's playgrounds, from polyglot Queens to many-faceted Brooklyn, and from the resilient Bronx to the mystical kung fu hip-hop mecca of Staten Island. The contributors to this exquisitely designed and gorgeously illustrated volume celebrate New York City's unique vitality, its incubation of the avant-garde, and its literary history, but they also critique its racial and economic inequality, environmental impact, and erasure of its past. Nonstop Metropolis allows us to excavate New York's buried layers, to scrutinize its political heft, and

to discover the unexpected in one of the most iconic cities in the world. It is both a challenge and homage to how New Yorkers think of their city, and how the world sees this capital of capitalism, culture, immigration, and more." -- Publisher's description.

Eleven women confront the everyday, outlandish, and unnerving in a "startlingly ingenious" collection of stories (The Boston Globe). From the American Midwest to Finland to the coast of Africa, Caitlin Horrocks "deploys love and humor as convincingly as dread" as she explores the dilemmas of wives, mothers, daughters, lovers, and strangers who cut imperfect paths to peace and escape. In personal worlds gone awry, they have no other choice (The New York Times). A Russian mail-order bride is rendered silent by her dislocation and loss of language; a subversively sadistic biology teacher takes advantage of pupil's unease; on a cruise ship held hostage by Somali pirates, the mother of a severely disabled boy writes him postcards he'll never read; crime and conscience collide for a professional dog-napper heartened by her loveable new catch; a girl is plagued by unforgiving memories of a cruel game she played on a classmate years ago; and an Iowa actuary wanders among the reincarnations of those she's known in her 127 lives. In this "achingly observant and witty" (Cleveland Plain Dealer), San Francisco Chronicle Best Book Pick, Caitlin Horrocks delivers "refreshing takes on old themes: childhood meanness, the effects of devastating illness, the desire for a better life, misunderstandings between parents and their children, [and] looking for love in all the wrong places" (Minneapolis Star-Tribune).

Richard Florida outlines how certain cities succeed in attracting members of the 'creative class' - the key economic growth asset - and argues that, in order to prosper, cities must harness this creative potential.
