Women's hairstyles have changed dramatically over the past century. Charting the progression from styles dictated by fashion and tradition towards more unique and individualised looks, this book explores how the history of women's hair in the west corresponds with their liberation over the course of the 1900s. Refined illustrations, era-specific photographs, and contemporary images tell the story of the hairstyles and fashion trends that flourished between 1940 and 1980, as well as those in vogue today. The volume closes with a section dedicated to the most famous hairstylists and salons de coiffeur, past and present.

Two new series from the great champion of European figurative painting During 2020, German artist Georg Baselitz (born 1938) created two bodies of work, documented here: the first series is a tribute to his departed friend and Italian icon of Arte Informale, Emilio Vedova; the other is dedicated to, and named for, his wife, Elke.

Un programma di allenamento dettagliato e consigli culinari per rimettersi o mantenere la forma psico-fisica perfetta. L'autore, facendo leva sulla sua esperienza ultra-decennale come praticante amatore, svela trucchi e strategie per un approccio ottimale a questo sport, che miri a ridurre a zero gli infortuni e ad aumentare in meno di 3 mesi resistenza fisica e potenza muscolare. Seguire una sana e corretta alimentazione, di pari passo con la pratica di questo sport, è di fondamentale importanza se si vogliono raggiungere obiettivi di benessere duraturo nel tempo. Dunque, un'ampia descrizione dedicata anche a questo aspetto, proponendo consigli e ricette, quest'ultime preparate da lui stesso, adatte per chi pratica attività sportive di resistenza. Ricette vegetariane, create, la maggior parte di esse, con frutta e verdura bio, raccolte fresche quotidianamente dal suo orto di campagna, che gli hanno permesso un sostanziale miglioramento della sua forma fisica e mentale.

Cecilia and Claudio are doctors are the same hospital. They eat lunch together almost every day; they talk, sometimes even share secrets. Each is enmeshed in a complicated, painful relationship that has technically ended but isn't really over: she is newly separated, with two small children; he's stuck in the apartment building where he grew up, where his senile mother, not to mention his ex-wife and her new family, all still live. Cecilia and Claudio are attracted to each other magnetically, powerfully. But life has taught them to treat that attraction with suspicion. Then a chance encounter between Claudio and Cecilia's sister, Silvia, shifts the precarious balance of the relationship between the two colleagues. Claudio begins to recognize the damage caused by his wary stance toward everything around him. He has hidden a hunger for life and experience beneath a veneer of apathy, a mask that also conceals a deep well of anguish. And just when Cecilia comes to the realization that she loves Claudio and is ready to commit to a genuine relationship, fate steps in once again. The complicated tale is unraveled by the son born of this love triangle, a man attempting to understand both himself and his past. In lucid, enchanting prose, supplely rendering into English by Anne Milano Appel, Andrea Canobbio's Three Light-Years sketches a fable of love poisoned by the indecision born of fear, laying bare the dangers of playing it safe when it comes to matters of the heart.

Perspectives and Prospects

Human values are innate, a product of man's evolution and genetics. This is the unorthodox thesis of this major work, which for the first time places the study of values on a firm scientific foundation. Drawing on biological findings which indicate that the fundamental behavioral motivations of each species are inherited, the author looks at the human brain as a biological decision system in which innate values in the form of human motivations serve as the decision criteria.

This handbook aims to debunk the myth that vegetarian diets provide inadequate nutrition for growing children. Separate chapters address the needs of infants, preschoolers, school-age children, and teenagers. There are lots of child-friendly recipes, and a resources section.

A moving and timely novel about human trafficking—from the author of the acclaimed debut Lipstick in Afghanistan. Newly heartbroken and searching for purpose in her life, Abby Monroe is determined to make her mark as a UN worker in one of the world's most unstable cities: Peshawar, Pakistan. But after witnessing the brutal murder of a woman thrown from a building, she is haunted by the memory of an intricate and sparkling bracelet that adorned the victim's wrist. At a local women's shelter, Abby meets former sex slaves who have miraculously escaped their captors. As she gains the girls' trust and documents their horrifying accounts of unspeakable pain and betrayal, she joins forces with a dashing New York Times reporter who believes he can incriminate the shadowy leader of the vicious human trafficking ring. Inspired by the women's remarkable bravery—and the mysterious reappearance of the bracelet—the duo traces evidence that spreads from remote villages of South Asia to the most powerful corners of the West, risking their lives to offer a voice to the countless innocents in bondage.

SPACE FOR YOUR FUTURE

T he present work, the result of some forty years of investigative research, is a logical progression from my previous books: the expose of the international control of monetary issue and banking practices in the United States; a later work revealing the secret network of organizations through which their hidden plans are implemented; and now; to the most vital issue of all, the manner in which these depreddations affect the daily lives and health of American citizens. Despite the great power of the hidden rulers, I found that only one group has the power to issue life or death sentences to any American-our nation's physicians. I discovered that these physicians, despite their great power, were themselves subjected to very strict controls over every aspect of their professional lives. These controls, surprisingly enough, were not wielded by any state or federal agency, although almost every other aspect of American life is now under the absolute control of the bureaucracy. The physicians have their own autocracy, a private trade association, the American Medical Association. This group, which is headquartered in Chicago, Illinois, had gradually built up its power until it assumed total control over medical schools and the accreditation of physicians. The trail of these manipulators led me straight to the same lairs of the international conspirators whom I had exposed in previous books. I knew that they had already looted America, reduced its military power to a dangerously low level, and imposed bureaucratic controls on every American. I now discovered that their conspiracies also directly affected the health of every American. This conspiracy has resulted in a documented decline in the health of our citizens. We now rank far down the list of civilized nations in infant mortality and other significant medical statistics. I was able to document the shocking record of these cold-blooded tycoons who not only plan and carry out famines, economic depressions, revolutions and wars, but who also find their greatest profits in their manipulations of our medical care. The cynicism and malice of these conspirators is something beyond the imagination of most Americans. They deliberately mulct our people of millions of dollars each year through "charitable" organizations and then use these same organizations as key groups to bolster their Medical Monopoly. Fear and intimidation are the basic techniques by which the conspirators maintain their control over all aspects of our health care, as they ruthlessly crush any competitor who challenges their profits. As in other aspects of their "behavioural control" over the American people, their most constantly used weapon against us is their employment of federal agents and federal agencies to carry out their intrigues. The proof of this operation may be the most disturbing revelation of my work.

The history of artificial cold has been a rather intriguing interdisciplinary subject (physics, chemistry, technology, sociology, economics, anthropology, consumer studies) which despite some excellent monographs and research papers, has not been systematically exploited. It is a subject with all kinds of scientific, technological as well as cultural dimensions. For example, the common home refrigerator has brought about unimaginably deep changes to our everyday lives changing drastically eating habits and shopping mentalities. From the end of the 19th century to the beginning of the 21st, issues related to the production and exploitation of artificial cold have never stopped to provide us with an incredibly interesting set of phenomena, novel theoretical explanations, amazing possibilities concerning technological applications and all encompassing cultural repercussions. The discovery of the unexpected and " bizarre " phenomena of superconductivity and superfluidity, the necessity to incorporate macroscopic quantum phenomena to the framework of quantum mechanics, the discovery of Bose-Einstein condensation and high temperature superconductivity, the use of superconducting magnets for high energy particle accelerators, the construction of new computer hardware, the extensive applications of cryomedicine, and the multi billion industry of frozen foods, are some of the more dramatic instances in the history of artificial cold.

In this fascinating and highly readable new book, Mel Greaves shows how the origins of cancer are inextricably linked with our evolutionary heritage, and considers the implications of this theory for future research and treatment.

Sir Elton John, musician and philanthropist, has built one of the greatest private collections of photography in the world. This book presents an unparalleled selection of modernist images, which introduce a crucial moment in the history of photography when artists were beginning to use the camera and darkroom to redefine and transform visions of the modern world. Technological advancements gave artists the freedom to experiment and test the limits of the medium enabling new imaginings of portraits, nudes and still lifes; and street life and the modern world was captured from a new, uniquely modern perspective. Showcasing only original vintage prints by the artists themselves, the book features key figures from the 1920s to 1950s, such as Brassai, Andre Kertesz, Dorothea Lange, Tina Modotti, Man Ray, Edward Steichen and Alexander Rodchenko. Also includes a newly commissioned interview with Sir Elton John and essays on modernist photography and technology and innovation by Dawn Ades and Shoar Mavian. '

During the nineteenth century many of Europe's capital cities were subject to major expansion and improvement schemes. From Vienna's Ringstrasse to the boulevards of Paris, the townscapes which emerged still shape today's cities and are an inalienable part of European cultural heritage. In Planning Europe's Capital Cities, Thomas Hall examines the planning process in fifteen of those cities and addresses the following questions: when and why did planning begin, and what problems was it meant to solve? who developed the projects, and how, and who made the decisions? what urban ideas are expressed in the projects? what were the legal consequences of the plans, and how did they actually affect subsequent urban development in the individual cities? what similarities or differences can be identified between the various schemes? how have such schemes affected the development of urban planning in general? His detailed analysis shows us that the capital city projects of the nineteenth century were central to the evolution of modern planning and of far greater impact and importance than the urban theories and experiments of the Utopians.

Emilio Sereni's classic work is now available in an English language edition. History of the Italian Agricultural Landscape is a synthesis of the agricultural history of Italy in its economic, social, and ecological context, from antiquity to the mid-twentieth century. From his perspective in the Italian tradition of cultural Marxism, Sereni guides the reader through the millennial changes that have affected the agriculture and ecology of the regions of Italy, as well as through the successes and failures of farmers and technicians in antiquity, the middle ages, the Renaissance, and the Industrial Revolution. In this sweeping historical survey, he describes attempts by successive generations to adapt Italy's natural environment for the purposes of agriculture and to respond to its changing ecological problems. History of the Italian Agricultural Landscape first appeared in 1961. At the time of its publication it was a pathbreaking work, parallel in its importance for Italy to Marc Bloch's masterpiece of 1931, The Original Characteristics of French Rural History. Sereni invented the concept of the historical "agricultural landscape": an interdisciplinary characterization of rural life involving economic and social history, linguistics, archeology, art history, and ecological studies. Originally published in 1997, The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. In his new book, Gordon M. Shepherd expands on the startling discovery that the brain creates the taste of wine. This approach to understanding wine's sensory experience draws on findings in neuroscience, biomechanics, human physiology, and traditional enology. Shepherd shows, just as he did in Neurogastronomy: How the Brain Creates Flavor and Why It Matters, that creating the taste of wine engages more of the brain than does any other human behavior. He clearly illustrates the scientific underpinnings of this process, along the way enhancing our enjoyment of wine.

Neuroenology is the first book on wine tasting by a neuroscientist. It begins with the movements of wine in through the mouth and then consults recent research to explain the function of retronasal smell and its extraordinary power in creating wine taste. Shepherd comprehensively explains how the specific sensory pathways in the cerebral cortex create the memory of wine and how language is used to identify and imprint wine characteristics. Intended for a broad audience of readers—from amateur wine drinkers to sommeliers, from casual foodies to seasoned chefs—Neuroenology shows how the emotion of pleasure is the final judge of the wine experience. It includes practical tips for a scientifically informed wine tasting and closes with a delightful account of Shepherd's experience tasting classic Bordeaux vintages with French winemaker Jean-Claude Berrouet of the Chateau Petrus and Dominus Estate.

A winter snowfall can be beautiful. But if conditions call for dense snow, freezing temperatures, and bone-chilling wind, you are in for a dangerous blizzard. These blinding, swirling storms can shut down roads and damage buildings. Violent winds can thrash vehicles driving on icy roads. Snowdrifts can pile up to block streets or even cover houses. Blizzards can knock out power and threaten the lives of people stranded inside for days or worse, those caught outside in the storm. With dramatic images and first-hand survivor stories plus the latest facts and figures this book shows you blizzard disasters up close.

Anthimus was a Greek doctor condemned by the Emperor of Constantinople to a life of exile at the court of Theodoris the Ostrogoth, barbarian ruler of Italy at the beginning of the 6th century AD. In the course of his life in Ravenna he was sent as ambassador to the King of the Franks and, perhaps as a sweetener to his fierce yet royal host, wrote a letter about foods - which were good for you, which were bad, and in some cases how to cook and serve them. It may reasonably be called the first French cookery book, various errors of fact in earlier editions, a Latin text based on the editho princeps of 1864, a modern English translation, and a detailed commentary on the work itself, with many cross-references to classical medical treatises, the literature of classical cookery and modern scholarship insofar as it knows anything of the food and cookery of the early Merovingian Franks. linguistic transition from classical to medieval Latin, but rarely has it been treated for what it was - a cookery and medical treatise. It shows cooking on the cusp between the bread-, vegetable- and oil-based cuisine of the Mediterranean and the meat-dominated cookery of the northern forests.

Described as "the perfect Baroque city," the southeastern Sicilian city of Noto was totally destroyed by an earthquake in 1693 and then rebuilt by ambitious citizens eager to match Italian achievements. The Genesis of Noto traces the complex history of Noto's foundation and growth as a grid-planned Renaissance-Baroque utopia.

The present volume, based on a conference on Ancient Near Eastern historical geography and toponymy held at the Université catholique de Louvain (Belgium) on 27-28 February 2014, brings together 12 contributions by Belgian and international specialists on various aspects of this field of research. They deal with the entire Ancient Near East (Anatolia, Levant, Mesopotamia and Iran). Chronologically, the various contributions in the volume discuss topics situated in the 3rd-,2nd and 1st Millennia BC.The articles in this volume are arranged geographically, starting with items on Anatolia, followed by studies on Mesopotamian and Levantine topography and finally a part on ancient Iran and Elam. They will doubtlessly demonstrate the high importance of the study of historical geography and toponymy for our understanding of the history of the Ancient Near East and will also stimulate the research on the historical geography of the ancient Near East.

For the fourth installment in Rankin's beauty book series, the prolific photographer teams up with Hunger Magazine's very own Beauty-Editor-At-Large, Andrew Gallimore. His previous high-profile collaborations for the series have included Alex Box, Ayami Nishimura and Caroline Saulnier. Having first worked together on Jitros s AW08 campaign, Rankin and Andrew have been friends for six years, joining forces on a number of landmark editorial projects and commercial shoots. The pair s most recent project, Andrew Gallimore by Rankin, not only documents their creative partnership thus far but features new, never-before-seen material shot exclusively for the stunning art book. Featuring a range of compelling portraiture, Andrew Gallimore by Rankin sees the pair chart British history through make-up, give their own vibrant take on death masks and embrace blood, guts and gore. As the UK s first ambassador for Dior, Andrew has never been one to shy away from experimentation while, since founding Dazed & Confused in 1992, Rankin has captured almost every walk of life with his lens. This unique set of images illustrates that, both individually and as a pair, Rankin and Andrew are game changers at the top of their fields who never cease to impress and amaze. "

"A splendid tale of human ingenuity in the service of taste, sedulously researched and told with great flair." Loyd Grossman Sunday Times Author of such cookery classics as Italian Food and French Provincial Cooking, Elizabeth David (1913-1992) found that the literature of cookery, as well as the practical side, was of absorbing interest, and she studied it throughout her life. Spices, Salt and Aromatics in the English Kitchen was published in 1970, followed by English Bread and Yeast Cookery, for which she won the Glenfiddich Writer of the Year award in 1977. At the time of her death in 1992 she was working on this equally epic study of the use of ice, the ice-trade and the early days of refrigeration, which was published posthumously in 1994 as Harvest of the Cold Monthk. "An awe-inspiring feat of detective scholarship, the literally marvellous story of how human beings came to ingest lumps of flavoured frozen matter for pleasure ... There is much, much more - about the making and breaking of reputations, the founding of Parisian café culture, the great and rivalrous confectioners of eighteenth- and nineteenth-century London, about Russian ice-cream ('surprisingly superior) and Persian sherbet, 'sumptuous.' Independent on Sunday "This survey of the use of ice in cookery takes us on a fascinating journey from 581, where in Florence they put snow in the wine glasses, to that modern phenomenon, the growth of the ice-cream business. A scholarly social history, which makes a fitting finale to the work of the greatest of our writers on foods and its contexts." Harpers & Queen
