taxonomy and analysis to facilitate internal discussions and identify innovative cloud computing solutions that deliver efficiencies.

~~Intel Cloud Computing Taxonomy and Ecosystem Analysis~~

The process helps identify data that falls under the highly sensitive category. Such data would require anonymization per the GDPR. Other, non-sensitive data can be ignored for compliance analysis, saving time and effort. Reduce unwanted data — GDPR recommends data minimization to collect and store only as much personal data as required. A taxonomy helps get rid of existing ROT (redundant, obsolete, or trivial) data, which decreases the risk of storing non
