MANUAL Univer al Motor Controller UM C100 - ABB

Manual motor starters, also known as motor protection circuit breakers (MPCBs) or manual motor protectors (MMPs), are electromechanical protection devices for the main circuit. They are mainly used to switch motors ON/OFF manually and to provide fuseless protection against short-circuit, overload and phase failures. Fuseless protection saves costs, space and ensures a quick reaction under ...

ABB Library - High Voltage Induction Motors

The MS132-2.5 manual motor starter (also known as motor protection circuit breaker or manual motor protector) is a compact 45 mm width device with a rated operational current of $I_e = 2.50 \text{ A}$.

ABB MS132-2.5

The manual motor starters have a setting scale in amperes, which allows for direct adjustment of the device without any additional calculation. In compliance with international and national standards, the setting current is the rated current of the motor and not the tripping current (i.e., no tripping at $1.2 \times I$; $I =$ setting current).
