How can YOU help bring hope to our nation? At a time when it seems that our nation is toppling over—morally, culturally, economically, and politically—you may be asking this question: Is there any hope for America? Dr. Tony Evans says YES. In America: Turning a Nation to God, Dr. Evans helps Christians understand that at the core, America's problems are spiritual. And, God and His rule are America's only hope. As His people, God is calling us to return to Him in humility and repentance, to submit to His rule and authority.

Only as we commit to doing so, individually and collectively, will we realize that hope. We hold within the collective body of Christ not only the power but also the capacity to put our country back on the path of ascendancy. This straight-forward teaching, when embraced by believers in our nation, will usher in the greatest revival in American history.

*A clear roadmap for the new territory of education Education in the U.S. has been under fire for quite some time, and for good reason. The numbers alone tell a very disconcerting story: according to various polls, 70% of teachers are disengaged. Add to that the fact that the United States ranks last among industrialized nations for college graduation levels, and it's evident there's a huge problem that needs to be addressed. Yet the current education system and its school buildings—with teachers standing in front of classrooms and lecturing to students—have gone largely unchanged since the 19th century. Humanizing the Education Machine tackles this tough issue head-on. It describes how the education system has become ineffective by not adapting to fit students' needs, learning styles, perspectives, and lives at home. This book explains how schools can evolve to engage students and involve parents. It serves to spread hope for reform and equip parents, educators, administrators, and communities to: Analyze the pitfalls of the current U.S. education system intelligently argue the need to reform the current landscape of education Work to make a difference in the public education system Be an informed advocate for your child or local school system If you're a concerned parent or professional looking for a trusted resource on the need for education reform, look no further than Humanizing the Education Machine. This illuminating resource provides the information you need to become a full partner in the new human-centered learning revolution.*

*An Account of the Native Africans in the Neighbourhood of Sierra Leone : To Which Is Added an Account of the Present State of Medicine Among Them by Thomas Masterman Winterbottom, first published in 1803, is a rare manuscript, the original residing in one of the great libraries of the world. This book is a reproduction of that original, which has been scanned and cleaned by state-of-the-art publishing tools for better readability and enhanced appreciation. Restoration Editors' mission is to bring long out of print manuscripts back to life. Some smudges, annotations or unclear text may still exist, due to permanent damage to the original work. We believe the literary significance of the text justifies offering this reproduction, allowing a new generation to appreciate it.*

Rare edition with unique illustrations. When Jacob and Wilhelm Grimm published their Children's and Household Tales in 1812, followed by a second volume in 1815, they had no idea that such stories as "Rapunzel," "Hansel and Gretel," and "Cinderella" would become the most celebrated in the world. From "The Frog King" to "The Golden Key," wondrous worlds unfold—heroes and heroines are rewarded, weaker animals triumph over the strong, and simple bumpkins prove themselves not so simple after all. A delight to read, The Original Folk and Fairy Tales of the Brothers Grimm presents these peerless stories to a whole new generation of readers. Little Red Riding Hood, or Little Red Ridinghood, also known as Little Red Cap or simply Red Riding Hood, is a European fairy tale about a young girl and a Big Bad Wolf.

This is a lively account of one of the most important and overlooked themes in American education. Beginning in the colonial period and working to the present, Gather describes in rich detail how the home has been used as the base for education of all kinds. The last five chapters focus especially on the modern homeschooling movement and offer the most comprehensive and authoritative account of it ever written. Readers will learn how and why homeschooling emerged when it did, where it has been, and where it may be going. Every known society wears some form of clothing. It is central to how we experience our bodies and how we understand the socio-cultural dimensions of our embodiment. It is also central to how we understand works of literature. In this innovative study, Brazil demonstrates how medieval writers use clothing to direct readers' and spectators' awareness to forms of embodiment. Offering insights into how poetic works, plays, and devotional treatises target readers' kinsic intelligence—their ability to understand movements and gestures—Brazil demonstrates the theological implications of clothing, often evinced by how garments limit or facilitate the movements and postures of bodies in narratives. By bringing recent studies in the field of embodied cognition to bear on narrated and dramatized interactions between dress and body,

this book offers new methodological tools to the study of clothing.

A major contribution to the history of philosophy in the later medieval period (1250-1350).

These conference proceedings explore the design of pedagogical intervention and learning cultures, the inclusion of socio-emotional support in teaching and policy, transforming technology to support the social fabric of our institutions, and challenging established beliefs about learning. They clarify the complex challenges involved in employing social learning in education and higher education institutions to foster greater understanding and insights, while also avoiding the pitfalls that come with rolling out the concept of "redesigning learning". This study of West Saxon charters includes all those that may be dated before 839, the end of the reign of Ecgberht. The charters are discussed in groups according to the monastic archive from which they come; the author seeks to establish which are authentic in whole or in part, thus identifying a body of valid evidence for the history of the West Saxon kingdom. *John Catt's Guide to International Schools is the leading guidebook to international education, now in its 19th edition. The 2021/22 edition has been updated to include more than 5,000 international schools. In addition to a comprehensive directory, this guide profiles leading schools across the world, with detailed information on curriculum, facilities and school achievements and ethos. It also includes everything you need to know about the international education sector, with key information on associations and curricula, and latest news and initiatives. It is the perfect companion for families considering international education for their children, for educators looking for their next career move, or for those looking to invest in international schools.*

*Broken Promises is the third book in a trilogy spanning 18 years. Bruce Kushnick, author, senior telecom analyst and industry insider, lays out, in all of the gory details, how America paid over \$400 billion to be the first fully fiber optic-based nation yet ended up 27th in the world for high-speed Internet (40th in upload speeds). But this is only a part of this story. With over four million people filing with the FCC to 'Free the Net', one thing is abundantly clear -- customers know something is terribly wrong. Every time you pay your bills you notice that the price of your services keeps going up, you don't have a serious choice for Internet (ISP), broadband or cable service, much less competitors fighting for your business, or maybe you can't even get very fast broadband service. Worse, over the last few years, America's ISPs and cable companies have been rated "the most hated companies in America". While Net Neutrality concerns (detailed in Broken Promises) are important, the actions are only a first step and will most likely be tied up in court for the next few years. More importantly, it does not resolve most of the customer issues and there is nothing else on the horizon that will fix what's broken. Broken Promises documents the massive overcharging and failure to properly upgrade the networks, the deceptive billing practices, the harms caused from a lack of competition, the gaming and manipulating of the regulatory system, from the states to the FCC, and exposes the companies' primary strategy: How much can we get away with? There has been little, if any, regard for the customers they serve.--From <http://thenetworks.com/bookbrokenpromises/> --(viewed on June 12, 2015).*
