Pakistan was once only an inspired vision. In 1947, through great sacrifice, a miraculous new nation was born. With its people energised and free, it seemed there was no height Pakistan would not scale. Now, many decades later, as we look back on years of strife, division and poverty cultivated by generations of misguided leaders, we find ourselves wondering how this glorious inheritance became so spoiled. Atif F Qureshi examines the

causes of the calamity, in particular the explanation that trumps all others - the import of Western political, legal and economic systems. Detailing why these methods are wholly unworkable for an independent Muslim nation, he examines how Western concepts such as socialism and English Civil Law have led to crises ranging from economic stagnation to terrorist insurgencies. Yet the decline is not irreversible. Qureshi outlines policies that by returning to core Islamic values will revive, rejuvenate and revitalise this beautiful nation. From defence and the environment to education and banking, every

aspect of national planning is explored. He shows how in spite of all the travails, Pakistan is well-placed for a glorious future. After all, a manifest destiny awaits...

Introduces readers to the dramatic events, notable people, and special customs and traditions that have shaped many of the world's countries, with each volume covering a specific country and offering a concise history of the struggles and triumphs of the peoples and cultures that have called that country home.

Bangladesh. It presents a scholarly explanation of why the policies of the Pakistani ruling elites, especially the policies and institutional innovations of the Ayub regime (1958 - 1968), which often seemed so promising to observers abroad, were in fact the prelude to the break up of Pakistan. The study shows that by emphasizing state building and economic growth and de-emphasizing nation building and development of political institutions, the Ayub regime created a crisis in political management. The Pakistani ruling elites' persistent refusal to allow democratic political institutions to function resulted

in the exclusion of Bengalis from the national decision making process. The denial of their just claims led Bengalis to fight for autonomy initially and ultimately for independence." "The book, first published in 1972 by Columbia University Press, is being reprinted as part of UPL's Road to Bangladesh series. It will be of use to the new generation of readers to refresh memories about the failed policies and politics of the Pakistani ruling elites and the vision of democratic and secular politics for which the nationalist struggle was waged in Bangladesh."--BOOK JACKET.Title Summary field

expands to the domains of health, economy, education, military and science. However, at its core, the field is focused on the study of culture, criminality and punishment, economy, family, gender and sexuality, health and illness, peace, war and conflict, etc. Sociological study and research is vital for educators, policy makers, legislators, non-profit organizations and non-governmental organizations, social workers and anyone with the inclination to resolve or address social issues. The central problems of sociological theory are concerned with the way to transcend, link or cope with the dichotomies of structure and agency, subjectivity

This book contributes to the on-going debates on climate change by focusing on the SDGs and exploring linkages between environmental change and food security as well as the relevance and need to consider the management of natural resources, especially water, soil and forest. Compared to relevant existing publications, this book covers case studies that capture the everyday realities of the local people and how they react and adapt to similar situations in different geographical settings. Each case study presented in this book gives a particular message. The strength of this book lies in the fact that it covers the most neglected topics in climate negotiations in spite of the fact that these decide the fate of millions of people around the world, especially the developing countries. presenting a collection of case studies from Africa, Asia and Europe, this book encourages cross-continental knowledge sharing. The scope of the book ranges from impacts to mitigation and from in-field experiments to policy implementation. It contributes to the existing knowledge on climate-food nexus and connects climate change to sectors it could impact directly. All chapters in this book emphasise local ownership of strategy processes, effective participation from all levels, and high-level commitment. Besides being relevant for the academicians and scholars working in the field of climate change, forest and agriculture, it aims to catch interest of the policy makers and practitioners to understand ground realities for appropriate action. It is also bound to make an impact on the Non-

George S. Counts was a major figure in American education for almost fifty years. Republication of this early (1932) work draws special attention to Counts's role as a social and political activist. Three particular themes make the book noteworthy because of their importance in Counts's plan for change as well as for their continuing contemporary importance: (1) Counts's criticism of child-centered progressives; (2) the role Counts

This book presents the state-of-the-art in plant ecophysiology. With a particular focus on adaptation to a changing environment, it discusses ecophysiology and adaptive mechanisms of plants under climate change. Over the centuries, the incidence of

various abiotic stresses such as salinity, drought, extreme temperatures, atmospheric pollution, metal toxicity due to climate change have regularly affected plants and, and some estimates suggest that environmental stresses may reduce the crop yield by up to 70%. This in turn adversely affects the food security. As sessile organisms, plants are frequently exposed to various environmental adversities. As such, both plant physiology and plant ecophysiology begin with the study of responses to

the environment. Provides essential insights, this book can be used for courses such as Plant Physiology, Environmental Science, Crop Production and Agricultural Botany.

Volume 1 provides up-to-date information on the impact of climate change on plants, the general consequences and plant responses to various environmental stresses.

Deryn Watson and David Tinsley The topic of the conference, integrating information technology into education, is both broad and multi-faceted. In order

to help focus the papers and discussion we identified 7 themes: • Current developments in society and education influencing integration; • Teachers, their roles and concerns; • Learners, their expectations of and behaviour in an integrated environment; • Developments and concerns in the curriculum; • Successes and failures in existing practice; • Organisation and management of integrated environments; • Identification of social and political influences. Each

author was invited to focus on one theme, and these remained strands throughout as can be seen from the short papers and focus group reports. The first and most significant concern therefore was to be clear about our notions of integration; what do we mean and how is this relevant? Our keynote paper from Cornu clearly marked out this debate by examining the notion of integration and alerting us to the fact that as long as the use of IT is still added to the curriculum, then integration has not yet

With its focus on the application of theory to actual classroom practice, this book' s treatment of the full spectrum of curriculum design and practice has set the standard for completeness for nearly two decades. Part I explores the historical roots of current curriculum issues and practices, emphasizing the assessment of leading efforts at reform. Part II offers a critique of changing concepts of curriculum, conflicting curriculum and educational

rationales, and influences for and against change. In Part III, major crosscurrents in reform and reconstruction are discussed, including social crises, the " knowledge explosion" , curriculum articulation, and emerging designs. Part IV focuses on curriculum research and improvement, paying particular attention to the roles of teachers, supervisors, administrators, and curriculum specialists in the process. investigating problems, the book introduces the basic rules and principles of statistics. Challenging the notion that statistics are often incomprehensible and complex to use, the authors begin by presenting a 'how to' section explaining how specific statistical tests can be performed. They also help readers to understand the language of statistics, which is often a stumbling block for those coming to the subject for the first time. The reader is taught how to calculate

statistics by hand as well as being introduced to computer packages to make life easier, and then how to analyse these results. As the results of health care research are so integral to decision-making and developing new practice within the profession, the book encourages the reader to think critically about data analysis and research design, and how these can impact upon evidence based practice. This critical stance is also crucial in the assessment of the many reports and documents

of this traditional Islamic branding to the modern branding and marketing theories. Modern branding and marketing techniques focus on creating a demand among the target population, which is then met by supplying adequately. Halal, Islam and Muslims will always cause brand academics and practitioners problems. The understanding of what is Halal and Islamic brands is very crucial and if Muslim consumers are not encourage and nurture, the Islamic brands will be may remain as cultural products and the status of being Halal is

temporal. Islamic Branding and Marketing brings together up-to-date information on the impact of Islamic marketing and branding on consumer perception. This book investigates the promising, new subject matter of Islamic branding, which is yet to receive the academic and researchers attention it deserves. It provides a better understanding of Islamic branding, through conceptualizing the terms relevant to the brand-Islamization efforts of non-Muslim brands, by identifying the necessary 'branding to Muslims' practices. It

differentiates between Islamic products and Islamic brands, identifies and explains the various types of Islamic branding and links them to the Islamization of originally non-Muslim brands, that is, international brands, and it discusses various halal-related issues that an Islamizing firm needs to adhere to in order to improve its chances of success in the Islamic market. This book is intended to explore the reasons underlying the recent interest on Islamic marketing, discusses past research on the topic and offers a future research perspective.
