This up-to-date introduction to decision theory offers comprehensive and accessible discussions of decision-making under ignorance and risk, the foundations of utility theory, subjective and objective probability, Bayesianism, causal decision theory, game theory, and social choice theory. No mathematical skills are assumed, and all concepts are explained in a non-technical and intuitive as well as more formal ways.

Martin Peterson, An introduction to decision theory ...

(F1) A decision theory is falsified as a descriptive theory if a decision problem can be found in which most human subjects perform in contradiction to the theory.

(PDF) Decision Theory: A Brief Introduction

A decision theory is a formalised system for analysing possible decisions and picking from amongst them. Normative decision theory, which this sequence will focus on, is about how we should make decisions. Descriptive decision theory is about how we do make decisions. Decision theories involve looking at the possible outcomes of a decision.

An introduction to decision theory | Formalised Thinking

Now revised and updated, this introduction to decision theory is both accessible and comprehensive, covering topics including decision making under ignorance and risk, utility theory, and social choice theory.
