enjoy the acquaintance of Miss Frances Rolleston, of Keswick, and to carry on a correspondence with her with respect to her work, Mazzaroth: or, the Constellations. She was the first to create an interest in this important subject. Since then Dr. Seiss, of Philadelphia, has endeavoured to popularize her work on the other side of the Atlantic; and brief references have been made to the subject in such books as Moses and Geology, by Dr. Kinns, and in Primeval Man; but it was felt, for many

reasons, that it was desirable to make another effort to set forth, in a more complete form, the witness of the stars to prophetic truth, so necessary in these last days. To the late Miss Rolleston, however, belongs the honour of collecting a mass of information bearing on this subject; but, published as it was, chiefly in the form of notes, unarranged and unindexed, it was suited only for, but was most valuable to, the student. She it was who performed the drudgery of collecting the facts presented by Albumazer, the Arab

Modern astronomers have preserved, and still have in common use, the ancient names of over a hundred of the principal stars which have been handed down; but now these names are used merely as a convenience, and without any reference to their significance. This work is an attempt to popularize this ancient

For the ancient astronomical facts and the names, with their signification, I am, from the very nature of the case, indebted, of course, to all who have preserved, collected, and handed them down; but for their interpretation I am alone responsible. It is for the readers to judge how far my conclusions are borne out by the evidence; and how far the foundation of our hopes of coming glory are strengthened by the prophecies which have been written in the

The basis for this book was a publication by Elsbeth Ebertin entitled *Sternenwandel und Weltgeschehen*. It contained cases of her own investigations and records. Her son, Reinhold Ebertin, and Georg Hoffman, Elsbeth's coworker, edited the text and added many new sources of information.

Like Ptolemy's astronomical handbook, *Almagest*, this is the basis for much of the current information on fixed stars. Modern astrologers recognized that fixed

governance. Investment governance, the central concern of this modest volume, refers to the effective employment of resources—people, policies, processes, and systems—by an individual or governing body (the fiduciary or agent) seeking to fulfil their fiduciary duty to a principal (or beneficiary) in addressing an underlying investment challenge. Effective investment governance is an enabler of good stewardship, and for this reason it should, in our view, be of interest to all fiduciaries, no matter the size of the pool of

assets or the nature of the beneficiaries. To emphasize the importance of effective investment governance and to demonstrate its flexibility across organization type, we consider our investment governance process within three contexts: defined contribution (DC) plans, defined benefit (DB) plans, and endowments and foundations (E&Fs). Since the financial crisis of 2007 – 2008, the financial sector 's place in the economy and its methods and ethics have (rightly, in many cases) been under scrutiny. Coupled with this theme, the task of

investment governance is of increasing importance due to the sheer weight of money, the retirement savings gap, demographic trends, regulation and activism, and rising standards of behavior based on higher expectations from those fiduciaries serve. These trends are at the same time related and self-reinforcing. Having explored the why of investment governance, we dedicate the remainder of the book to the question of how to bring it to bear as an essential component of good fiduciary practice. At this point, the

reader might expect investment professionals to launch into a discussion about an investment process focused on the best way to capture returns. We resist this temptation. Instead, we contend that achieving outcomes on behalf of beneficiaries is as much about managing risks as it is about capturing returns—and we mean “risks” broadly construed, not just fluctuations in asset values.

These lost constellations are described in great detail using historical references, enabling observers to rediscover them on their own surveys of the sky. Treatment of the obsolete constellations as extant features of the night sky adds a new dimension to stargazing that merges history with the accessibility and immediacy of the night sky.***

### ***A New General Biographical Dictionary The Secret Astrology of the Bible***

The Dogon believed that the alien Nummo would one day return to Earth. It was the duty of the Hogan, their spiritual leader, to safe guard the Earth until that time. The day of the Nummos' return was known to the Dogon as the "Day of the Fish." Day of the Fish reveals that the amphibious Nummo, who came to Earth from the stars, were the goddesses known to the peoples of the Neolithic and Paleolithic ages. Many of the Dogon symbols identified with the Nummo were the same symbols that Marija Gimbutas associated with the goddesses of Old Europe. Dorey also compares the

Dogon religion with what is known of the Jomon people of Japan, who were Mesolithic-Neolithic hunters and gatherers from around 14,000 to 300 BCE. Dorey's research reveals that this is the oldest religion known to humanity and that understanding it is critical to our survival. She believes that knowing the truth about our past, will provide us with an understanding of the present and give us renewed hope for the future.

The Secret Astrology of the Bible by Michael Ledo is a landmark book that will change the way the scholarly community and the general public views the Bible, history and myth. Epic in scope, this provocative book explores the connections between religious belief and

cosmic theory, even as it attempts to explain contradictions and irregularities in the text. The Bible, states Ledo, was constructed as a living document, with much of its text expanded as time went on. If readers stripped away this added material, they could actually be left with an Early Bronze Age text, over a thousand years older than what is currently accepted by scholars. This text, suggests Ledo, would be a veritable cosmic myth which follows the constellations with stories in a contiguous fashion that combine both history and myth. Originally sold as "On Earth as it is in Heaven, The Cosmic Roots of the Bible."

Her empowering words not only lift children up, but show them how to lift themselves up and seize their potential.*

*Dorey's research shows the African Dogon religion to be the oldest mythology in the world. It existed in Africa long before humans migrated to other areas. Dorey has found fragments of the Dogon religion all over the world. The Nummo, the title of the book, refers to alien beings who were considered immortal by the Dogon people. According to the Dogon, these fish and serpent like beings came to Earth from the stars. When they died and were reborn they could remember their previous existence. The Dogon elder Ogotemméli described life and death for the amphibious Nummo as being like a snake shedding its skin. According to the Dogon, in the beginning of human existence immortality was the norm and time, as we know it, was irrelevant. This book is vital in the search for the truth*
