Fracture and Dislocation Classification Compendium—2018 ...

To maintain its relevance, both organizations review the compendium every 10 years. The 2018 revision of the AO/OTA Fracture and Dislocation Classification Compendium provides the user with a streamlined, concise, and clinically relevant tool for classifying the majority of fractures. This revision intends to extend the relevance of the Compendium to nontrauma orthopedic subspecialties by integrating existing standard classifications.

AO/OTA Fracture and Dislocation Classification Compendium. Frequently when you have a good CT, you have most of the anatomic information. Often unilateral or bilateral facet dislocation is seen in rotational fractures. Distraction is the result of displacement in the vertical plane. The facet joints are separated on both sides. What are the findings?

epidemic, orthopaedic surgeons everywhere are still taking call, treating fractures and dislocations, and otherwise urgent and emergent cases.

Because of sheer volume of COVID-19 cases, many facilities have severely minimized their surgical case volume. This coupled with supply issues, and unproven treatment and protection techniques has resulted in confusion in many situations.
