Flourishing in Emerging Adulthood highlights the third decade of life as a time in which individuals have diverse opportunities for positive development. There is mounting evidence that this time period, at least for a significant majority, is a unique developmental period in which positive development is fostered. Dr. Lene Arnett Jensen highlights the importance of this work in an engaging foreword, and chapters are written by leading scholars in diverse disciplines who address various aspects of flourishing. They discuss multiple aspects of positive development including how young people flourish in key areas of emerging adulthood (e.g., identity, love, work, worldviews), the various unique opportunities afforded to young people to flourish, how flourishing might look different around the world, and how flourishing can occur in the face of challenge. Most chapters are accompanied by first-person essays written by a range of emerging adults who exemplify the aspect of flourishing denoted in that chapter and make note of how choices and experiences have helped them transition to adulthood. Taken together, this innovative collection provides rich evidence and examples of how young people are flourishing as a group and as individuals in a variety of settings and circumstances. This unique resource will be useful to students, faculty, professionals, clinicians, and university personnel who work with young adults or who study development during emerging adulthood.

Offers a guide on how to teach the rules of the APA style manual to students, including a series of multiple-choice tests, answer keys, and advice on how to integrate the topic into the curriculum.

In the 21st century, digital tools enable information to be generated faster and in greater profusion than ever before, to the point where its extent and value are literally beyond imagining. Such quantities can only be meaningfully addressed using more digital tools, and thus our relationship to information is fundamentally changed. This situation presents a particular challenge to processes of learning and teaching, and demands a response from both information professionals and educators. Enabling education in a digital environment means not only changing the form in which learning opportunities are offered, but also enabling students to survive and prosper in digitally based learning environments. This collection brings together a global community of educators, educational researchers, librarians and IT strategists, to consider how learners need to be equipped in an educational environment that is increasingly suffused with digital technology. Traditional notions of literacy need to be challenged, and new literacies, including information literacy and IT literacy, need to be considered as foundation elements for digitally involved learners. Leading international experts from the USA, Canada, Australia, New Zealand, South Africa, Mexico and throughout Europe contribute to the debate, and Hannelore Rader, Librarian and Dean of the University Libraries, University of Louisville, Kentucky, provides the foreword. The book is in two parts: In Part 1, Literacies in the Digital Age, the contributors analyse how digital technologies have enabled transformative change in the ways in which learning can be constructed, and discuss the nature of the new literacies that have emerged in this new virtual and e-learning environment. In Part 2, Enabling and Supporting Digital Literacies, the contributors go on to consider the ways in which digital literacies can be made available to learners, and how these literacies are being relocated in a more student-centred environment within the broader perspective of learning.

Readership: This book takes the issues raised in the successful Information and IT Literacy, also co-edited by Allan Martin, into a broader context. It is essential reading for all information professionals and educators involved in developing strategies and practices for learning in a digital age.

Introduction to Research Methods and Statistics in Psychology is a new type of textbook. It is almost entirely student-centred, eminently practical and brings together a wealth of experience in the teaching of undergraduate research. This book is not just a guide to the conduct of psychological research, it is also an effective support system for the particular problems, concerns and fears encountered by most students at some point in their research lives. In structure, the book is divided into a number of well-defined parts, each dealing with a major element of the research process and combining to produce a step-by-step guide for the student embarking on a major piece of undergraduate research.

This edited volume lays the groundwork for Social Data Science, addressing epistemological issues, methods, technologies, software and applications of data science in the social sciences. It presents data science techniques for the collection, analysis and use of both online and offline new (big) data in social research and related applications. Among others, the individual contributions cover topics like social media, learning analytics, clustering, statistical literacy, recurrence analysis and network analysis. Data science is a multidisciplinary approach based mainly on the methods of statistics and computer science, and its aim is to develop appropriate methodologies for forecasting and decision-making in response to an increasingly complex reality often characterized by large amounts of data (big data) of various types (numeric, ordinal and nominal variables, symbolic data, texts, images, data streams, multi-way data, social networks etc.) and from diverse sources. This book presents selected papers from the international conference on Data Science & Social Research, held in Naples, Italy in February 2016, and will appeal to researchers in the social sciences working in academia as well as in statistical institutes and offices.

This volume presents authoritative and up-to-date research in colour studies by specialists across a wide range of academic disciplines, including vision science, psychology, psycholinguistics, linguistics, anthropology, onomastics, philosophy, archaeology and design. The chapters have been developed from papers and posters presented at the Progress in Colour Studies (PICS2016) conference held at University College London in September 2016. The book continues the series from the earlier PICS conferences, which have become renowned for their insights into colour in language and cognition. In the present book all chapters have been rigorously peer-reviewed and revised to ensure the highest standards throughout. The chapters are grouped into three sections: Colour Perception and Cognition; The Language of Colour; and The Diversity of Colour. Each section is preceded by a short introduction drawing together the themes of its chapters. There are over 120 colour illustrations.

The author recalls his childhood growing up on a farm in Wisconsin

On the day of her father's funeral, twenty-eight-year-old Clarissa Iverton discovers that he wasn't her biological father after all. Her mother disappeared fourteen years earlier, and her fiancé has just revealed a life-changing secret to her. Alone and adrift, Clarissa travels to mystical Lapland, where she believes she'll meet her real father. There, at a hotel made of ice, Clarissa is confronted with the truth about her mother's history, and must make a decision about how—and where—to live the rest of her life.

Canadian Maternity and Pediatric Nursing prepares your students for safe and effective maternity and pediatric nursing practice. The content provides the student with essential information to care for women and their families, to assist them to make the right choices safely, intelligently, and with confidence.

Armagh the smallest county in Northern Ireland, has a rich, colourful and even tempestuous history. War, famine and emigration over the last four centuries have all contributed to forming the distinctive character of its people. The constant struggle between Planter and Gael that has characterised the county since the Plantation in the early 17th century may be seen in, for example, the almost equal division of the most popular surnames. The county town, the city of Armagh, is the ecclesiastical capital of both the

Catholic and Protestant religions on the island. By the end of the 18th century the county became one of the most prosperous and the most densely populated in Ireland. Its turbulent history has taken its toll on the evidence that remains. Many records were lost, including those in the destruction of the Public Record Office in Dublin in 1922; much has, however, survived to aid the dedicated family or local historian and is accessible in the detailed catalogues and user-friendly searching aids in the Public Record Office of Northern Ireland. Ian Maxwell writes both as an historian and an archivist eager to encourage researchers to use the fullest range of sources available. An exceptional feature of this book are the reference appendices. These include a breakdown of administrative divisions listing some 1,400 townlands and also unofficial placenames which disappeared from official use after the standardisation of placenames in the 1830s. Also provided for each townland are the civil parish, barony and poor law union plus the vital district electoral division details that greatly facilitates the researcher using sources such as census returns and property valuation records. Other appendices provide crucial archival references to tithe and valuation records and civil and Catholic parish maps are included. Such reference appendices will be a feature of further books in this series of county guides for the family and local historian.

Traditionally, nursing is acknowledged as a caring profession and is associated with advocating for others. However, incivility is increasingly occurring amongst nurses, both in the clinical and academic environments, and is causing affected nurses both psychological and physical harm. Incivility Among Nursing Professionals in Clinical and Academic Environments: Emerging Research and Opportunities provides emerging views and consequences surrounding workplace bullying in the healthcare profession including recognizing the signs and symptoms of incivility in the workplace, identifying ways in which affected nurses can seek help, and examining healthy methods of coping with the incivility. Featuring coverage on a broad range of topics such as human resources, therapy, and clinical nursing, this book is ideally designed for nurses, managers, healthcare workers and consumers, hospital and clinical staff, researchers, students, and policymakers. A simple guide to APA writing style that discusses the mechanics of APA format and internal text citations, and includes guidelines for actual reference page entries and a sample paper.

Most students struggle with learning how to find references, use them effectively, and cite them appropriately in a required format. One of the most common formats is that of APA. The authors all have vast experience teaching writing courses to various levels of students from undergraduates to graduates in other countries. However, there was lacking a book that could explain the basics of APA in simple, easy-to-understand language for non-native speakers of English, who are often unfamiliar with using references and formatting an essay in a particular method. In order to offer English Learner student writers a source of information that is appropriate for their level, and is cost-effective, this updated APA 7th edition guidebook provides students with important information in clear, concise, user-friendly language, as well as to offer practical examples that will help them grasp the concept of secondary research writing. Much of the published materials on the market targets native speakers of English. The problem with this is that they present the nitpicky details of APA in ways that do not make sense to native speakers of English, let alone to those for whom English is not their first language, because the information is presented in very technical terms that are not easy to understand. This handbook presents the same information in simplified terms with images and step-by-step instructions in ways that make sense to both native and non-native English speaking student writers. Additionally, student writers often struggle with understanding the concept of plagiarism, as well as how to find sources, evaluate the appropriateness of sources, and use sources in effective ways (e.g., how to integrate quotes, when to paraphrase, among others). This book provides this important information that is concise and easy to understand. NOTE: This is a REVISED edition of our original The Concise APA Handbook, which has been updated for APA 7th edition, which was issued in the fall, 2019.

This manual provides laboratory-based learning experiences in perceptually and psychosocially linked exercise assessment, prescription, and programming. The primary pedagogic outcome is the ability to use applied theory and practice in perceptual and psychosocial exercise assessment and program design to promote the adoption and maintenance of a physically active lifestyle, enhancing overall health fitness. Perceptual and psychosocial variables are presented in individual, stand-alone laboratory modules that can supplement existing curricula such as exercise and sport psychology, exercise physiology, exercise testing and prescription, and exercise training and conditioning. In addition, the complete modular set has a conceptual flow that allows its presentation as an entire, laboratory-based course. The laboratory modules are divided into three primary units: assessment (theoretical constructs, scales and procedures, tests), prescription (self-regulation, performance), and program evaluation. The manual uses a unique format in which case studies are embedded in the conceptual flow of each lab module facilitating translation of laboratory results to real-world application. The manual concludes with a discussion of perceptually and psychosocially linked exercise prescription and programming applications in public health, such as program monitoring and adherence.

For America, the mid-nineteenth century was an era of vast expectation and expansion: the country dreamed big, craved new lands, developed new technologies, and after too long a delay, finally confronted its greatest moral failure: slavery. Award-winning historian and literary critic Brenda Wineapple explores these feverish, ecstatic, conflicted years when

Americans began to live within new and ever-widening borders, both spiritual and geographic; fought a devastating war over parallel ideals of freedom and justice; and transformed their country, at tragic cost, from a confederation into one nation, indivisible. Populated by idiosyncratic, unforgettable characters such as P. T. Barnum, Walt Whitman, George Armstrong Custer, Horace Greeley, and Jefferson Davis, *Ecstatic Nation* moves from the vehement debates about slavery through the devastations of the Civil War and its aftermath. It explores the terrible complexities of Reconstruction and the fledgling hope that women would share equally in a new definition of American citizenship, and it traces the lust for land and the lure of its beauty from a frenzied rush to riches to the displacement of Indians. And it looks forward—toward the promise of a more perfect Union for all. A masterful synthesis of political, cultural, and intellectual history, breathtaking in sweep and scope, *Ecstatic Nation* is a spellbinding tale of America—its glory and greed, its aspirations and humiliations—in this exhilarating and momentous period.

Introduces various types of animals that lay eggs or have young that are born alive, and discusses the early parts of the life cycles of rabbits, butterflies, frogs, kangaroos and koalas, sharks, chickens, bees, fish, horses, dogs, and birds.

Natural Bridges is a concise, practical, inexpensive, and student-friendly guide to interpersonal communication. This book explores the fundamental principles and skills necessary for effective communication. Building on the theme that our every word and behavior contributes to building a bridge or a barrier in our daily interactions with others, *Natural Bridges* provides students with concepts and real-world guidelines for productive communication with acquaintances, friends, family-members, romantic partners, and co-workers.
