***This book presents a number of fundamentally challenging perspectives that have been brought to the fore by the national tests on religious education (RE) in Sweden. It particularly focuses on the content under the heading Ethics. It is common knowledge that many teachers find these parts difficult to handle within RE. Further, ethics is a field that addresses a range of moral and existential issues that are not easily treated. Many of these issues may be said to belong to the philosophical context, in which "eternal questions" are gathered and reflected upon. The first chapters highlight the concepts of ethical competence and critical thinking. In the following chapters the concept of ethical competence is analyzed with regard to teachers' objectives and to students' texts, respectively. These chapters pursue a more practice-related approach and highlight specific challenges identified from both teacher and student perspectives. Next, the book raises the issue of global responsibility. What kind of critical issues arise when handling such matters at school? Further, can contemporary moral philosophers contribute to such a discussion? In turn, the book discusses the role of statistical analyses with regard to national tests, while the closing chapters present international perspectives on the book's main themes and concluding remarks. The book's critical yet constructive approach to issues regarding assessment in ethics education makes a valuable contribution to an ongoing debate among researchers as well as to the everyday communication on testing in schools and classrooms. As such, it will appeal to scholars in ethics education and researchers in the field of assessment, as well as educators and teachers interested and engaged in the task of testing ethics in school contexts where curricular demands for valid and authoritative evaluation may provide important guidelines, but may also pose challenges of their own.***

***Projects and programmes should achieve a return on the investment made by the owner or sponsor. This return is now thought of as the benefits that accrue from the investment: some financial, others perhaps harder to define, but nonetheless just as important in justifying the investment. Making sure that they are realised, and that unanticipated benefits are maximised, is as important as the initial justification, and without that many projects have earned a bad name for project management. This publication provides comprehensive guidance on how to manage delivery of the benefits used to justify investment in change. It provides guidance for all involved in successful change delivery from senior responsible owners and directors through to portfolio, programme and project managers. **Vidal Sassoon's extraordinary life has taken him from an impoverished East End childhood to global fame. The father of modern hairdressing, his slick sharp cutting took the fashion world by storm and reinvented the hairdressers' art. Before Vidal Sassoon, a trip to the hairdressers meant a shampoo and set or a stiffly lacquered up-do that would last a week - or more. After Vidal Sassoon, hair was sleek, smooth and very, very stylish. Along with his lifelong friend and partner in style, Mary Quant, who he first met in 1957 and who to this day sports a Sassoon-style geometric bob, he styled the 1960s. As memorable as the mini - be it car or skirt - he is one of the few people who can genuinely be described as iconic. His memoirs are as rich in anecdote as one might hope and full of surprising and often moving stories of his early life - his time at the Spanish & Portuguese Jewish Orphanage in Maida Vale, fighting Fascists in London's East End and fighting in the army of the fledgling state of Israel in the late Forties. And then there's the extraordinary career, during which he cut the hair of everyone who was anyone, launched salons all over the world, founded the hairdressing school that still bears his name and became a global brand, with Vidal Sassoon products on all our bathroom shelves.**

**This book explores student-staff partnerships through a breadth of co-authored research projects. There is a significant gap in current literature regarding student-staff partnerships, both in the sharing of examples as well as in the examination of partnership working and its impact. Organised into four thematic sections, the editors and contributors highlight the diversity of routes students and staff can take to work in partnership, as well as how research, learning and teaching can be co-created. Written by both university staff and student researchers, the chapters consider the benefits of student-staff partnerships as an antidote to consumerist visions of higher education, and a way of celebrating the potential of students and their voices. This book will be of interest and value to scholars of student-staff partnerships.**
