AT&T 3G MicroCell™ User Manual

And well over a million devices were sold. But the MicroCell hadn't been updated in some time - and it relied on older 3G technology, rather than providing newer LTE service. Cisco was the main manufacturer of AT&T's MicroCell, and they announced that they were discontinuing their line of femtocells in mid-2017. It's not clear which came first: AT&T's decision to discontinue or Cisco's.

AT&T MicroCell Discontinued: The 5 Best Replacements in 2020
Network light - Restart your MicroCell by unplugging the power cord from the wall outlet for at least 10 seconds. It may take another 30 minutes for the network light to turn solid green.
Network and GPS lights - Move your MicroCell to the place where it originally got a solid GPS light. Smartphone doesn't display AT&T M-Cell

Identify and Fix AT&T MicroCell Issues - Wireless Support
Unplug the MicroCell from the router and the power source. Go to AT&T MicroCell Online Management. Select your account type. Enter your ID and password. Choose the number linked to your MicroCell and select Continue. Follow the prompts to disconnect your device. Good to know: If you don't use your MicroCell for more than 1 year, we may deactivate it. You can reactivate it at any time.

Manage Your AT&T MicroCell - Wireless Support

I have been using a Microcell for over 10 years, about 1 year ago my 3g Microcell died and I switched to a 4g. I was on Xfinity and everything worked fine. A few weeks ago I switched to AT&T internet and now I am only getting cellular service. In other words, I can no longer get the internet or MMS messages.
