responsible for supplying the voltage needed to fire the spark plugs. Ignition timing was controlled by vacuum and mechanical advance systems.

~~Introduction to Automotive Electrical and Electronic Systems~~

A car's electrical system is a bit like your body's circulatory system in that it has a battery (the heart) from which electricity (blood) flows along the wires (the blood vessels) to the parts that require it, before returning to the battery. In fact, the analogy is closer still when you consider that like blood, the electrical current flows in only one
