it offers and the number of simultaneous connections (40). It also enables support for call recording, text-to-speech (TTS) and a range of other features.

### Voicemail Pro - IP Office Knowledgebase

The Windows-based version of Voicemail Pro is not supported in IP Office™ Platform 11.1 Release 11.1. Existing customers want to upgrade to Release 11.1, need to migrate their systems to a IP Office Application Server or Unified Communications Module. oThe above means that the following features are no longer available:

## IP Office - Avaya

- Using Voicemail Pro, queued callers can customize the actions available to them as well as the greeting messages.
- Voicemail Pro does not control the queuing of calls. Queuing is controlled by the IP Office switch that presents queued and still queued calls at the appropriate times and provides the queue position and ETA data.
- Messaging

If Voicemail Pro detects that the incoming call is a fax and if a system fax number has been specified, Voicemail Pro checks to determine whether the target destination is a user defined fax number. If it is, the system fax number is overridden and the incoming call is redirected to the user defined fax number.
