

## Baram Maz Za Sex

While fat sexual bodies are highly visible as vehicles for stigma, there has been a lack of scholarly research addressing this facet of contemporary body politics. Fat Sex: New Directions in Theory and Activism seeks to rectify this, bringing debates about fat sex into the academic arena and providing a much-needed critical space for voices from across the spectrum of theory and activism. It examines the intersection of fat, sex and sexuality within a contemporary cultural landscape that is openly hostile towards fat people and their perceived social and aesthetic transgressions. Acknowledging and engaging with some of the innovative work being done by artists, activists, and academics around the issue of fat sex, this collection both challenges preconceptions regarding fatness and sexuality, but also critiques and debates various aspects of the fat activist approach. It draws on a wide range of disciplinary perspectives, bringing together work from the UK, US, Europe, and Australia to offer a wide-ranging examination of the issues of size, sex, and sexuality. A cutting-edge exploration not only of fat sex, but of identity politics, neoliberalism and contemporary body activism in general, Fat Sex: New Directions in Theory and Activism will be of interest to scholars of sociology, cultural studies, geography, porn studies and literary studies working on questions of gender, sexuality and the body.

Shortlisted for the Saltire Society Non Fiction Book of the Year Award Almost every adult and child is familiar with his Treasure Island, but few know that Robert Louis Stevenson lived out his last years on an equally remote island, which was squabbled over by colonial powers much as Captain Flint's treasure was contested by the mongrel crew of the Hispaniola. In 1890 Stevenson settled in Upolu, an island in Samoa, after two years sailing round the South Pacific. He was given a Samoan name and became a fierce critic of the interference of Germany, Britain and the U.S.A. in Samoan affairs - a stance that earned him Oscar Wilde's sneers, and brought him into conflict with the Colonial Office, who regarded him as a menace and even threatened him with expulsion from the island. Joseph Farrell's pioneering study of Stevenson's twilight years stands apart from previous biographies by giving as much weight to the Samoa and the Samoans - their culture, their manners, their history - as to the life and work of the man himself. For it is only by examining the full complexity of Samoa and the political situation it faced as the nineteenth century gave way to the twentieth, that Stevenson's lasting and generous contribution to its cause can be appreciated.

Vols. for 1964- have guides and journal lists.

Emergency and Clinical Ultrasound Board Review is a comprehensive guide for preparing for the Advanced Emergency Medicine Ultrasonography or Critical Care Echocardiography board exams, and for residents preparing for in-training examinations in ultrasound. The text consists of over 500 multiple-choice questions, organized into 18 chapters covering ultrasound topics such as physics, eFAST, echocardiography, thoracic, aorta, hepatobiliary, renal, pregnancy, soft tissue, ocular, procedural, airway, ENT, DVT, testicular, abdominal, and musculoskeletal applications. This is a multi-specialty work, with contributors representing the fields of emergency medicine, internal medicine, cardiology, critical care, and radiology. Chapters include questions, answers with detailed explanations and references to primary or landmark articles to help better navigate a standardized exam. Questions are written in a case-based format that emulates the ABEM and NBE board exams, and are supplemented by over 800 figures, tables, boxes, and online videos.

Treating and Preventing Adolescent Mental Health Disorders

The 'Abbasid Caliphate in Equilibrium: The Caliphates of Musa al-Hadi and Harun al-Rashid A.D. 785-809/A.H. 169-193

A Grammar of Modern Indo-European

English-Arabic, Arabic-English

Triggers and Treatments

*This book discusses novel research on and practices in the field of physics teaching and learning. It gathers selected high-quality studies that were presented at the GIREP-ICPE-EPEC 2017 conference, which was jointly organised by the International Research Group on Physics Teaching (GIREP); European Physical Society – Physics Education Division, and the Physics Education Commission of the International Union of Pure and Applied Physics (IUPAP). The respective chapters address a wide variety of topics and approaches, pursued in various contexts and settings, all of which represent valuable contributions to the field of physics education research. Examples include the design of curricula and strategies to develop student competencies—including knowledge, skills, attitudes and values; workshop approaches to teacher education; and pedagogical strategies used to engage and motivate students. This book shares essential insights into current research on physics education and will be of interest to physics teachers, teacher educators and physics education researchers around the world who are working to combine research and practice in physics teaching and learning.*

*Shri Mataji writes that “India is a very ancient country and it has been blessed by many seers and saints who wrote treatises about reality and guidelines on how to achieve it.” This is just such a book. This book is both an introduction to Sahaja Yoga, describing the nature of the subtle reality within each of us, and a step-by-step handbook on how to be a good Sahaja Yogi, the nature of Sahaj culture, how to be a leader and how to raise children. “The knowledge of Sahaja Yoga cannot be described in a few sentences or one small book, but one should understand that all this great work of creation and evolution is done by some great subtle organization, which is in the great divine form.”*

*Perioperative fluid therapy requires the correct selection, amount, and composition of fluids based on the patient’s underlying pathology, state of hydration, and type and duration of surgical stress. Filling a gap in the literature, this source provides a solid foundation to practical perioperative fluid management, fluid solutions, and the utiliz*

*Latvian: An Essential Grammar is a concise, user-friendly guide to the basic grammatical structures of Latvian. Presenting a fresh and accessible description of the language, this engaging grammar uses clear, jargon-free explanations to set out the complexities of Latvian in short, readable sections. Key features include: clear grammar explanations frequent use of authentic examples pronunciation guide, bibliography and subject index. This is the ideal reference source both for those studying Latvian independently and for students in schools, colleges, universities and adult classes of all types to back up their studies.*

The Comorbidities of Epilepsy

Introduction to Epilepsy

Chagas Disease One Hundred Years of Research

A Genealogical History

Sahaja Yoga

Hausa Superstitions and Customs

*This book presents an innovative approach to clinical assessment in psychiatry based on a number of psychopathological dimensions with a presumed underlying pathophysiology, that are related to fundamental phenomenological aspects and lie on a continuum from normality to pathology. It is described how the evaluation of these dimensions with a specific, validated rapid assessment instrument could easily integrate and enrich the classical diagnostic DSM-5 or ICD-10 assessment. The supplemental use of this dimensional approach can better capture the complexity underlying current categories of mental illness. The findings from a large patient sample suggest how this assessment could give a first glance at how variable and multifaceted the psychopathological components within a single diagnostic category can be, and thereby optimise diagnosis and treatment choices. Being short and easy to complete, this dimensional assessment can be done in a busy clinical setting, during an ordinary psychiatric visit, and in an acute clinical context, with limited effort by a minimally trained clinician. Therefore, it provides interesting and useful information without additional costs, and allows research work to be performed even in difficult settings.*

*Some thirty years have passed since the original publication of M. M. Ahsan's Social Life Under the Abbasids, but it remains an invaluable resource for the study of the material culture of Abbasid life in the ninth and tenth centuries. Ahsan arranges his material thematically-costume, food, housing, hunting, indoor and outdoor games, and festivities and festivals. Moreover, that arrangement together with the eclectic mix of citations, also give readers a taste of what it is like to browse through the many kinds of adab works that are Ahsan's main sources, including, among numerous others, anecdotal, biographical, culinary, geographical, and literary texts.*

*A clear, accessible guide to women’s health, providing evidence-based information relevant to the primary care setting Women’s Health in General Practice, 2nd Edition has been written for General Practitioners, family physicians and doctors undertaking general practice training programs. This comprehensive women’s health textbook will also assist health practitioners working in rural and remote areas, and nurse practitioners working in primary care settings. This new edition of Women’s Health in General Practice textbook incorporates a fresh style and format focused on the needs of busy doctors and nurses. Of particular benefit are the textbook’s practice tips and examples of useful approaches to take when dealing with women’s sexual health issues and reproductive health issues. Key point summaries, pullout boxes and tables highlighting pertinent points, tips for practitioners, case scenarios and a Q&A format all make Women’s Health in General Practice, 2nd Edition an essential addition to any general practice. Addresses common issues seen by GPs in their practice and addresses the questions and quandaries they face on a day to day basis Gives practical information and advice to GPs that where possible is based on up to date guidelines or research evidence Tips and example of useful approaches when undertaking histories, examining, and managing women’s health problems Discussion of current controversies in women’s health This second edition has been fully revised to include recent developments in women’s health such as: • the quick-start method for commencement of contraception, better ‘missed pill’ rules, developments in the provision of emergency contraception and an overview of new contraceptive devices such as the NuvaRing • the epidemiology of HPV infection, its relationship to cervical cancer and HPV vaccination • better characterisation of the risk inherent in a family history of breast and/or ovarian cancer • greater awareness of the importance of preconception care, the breadth of issues that need to be addressed and the effect of lifestyle factors on fertility • developments in the understanding of the aetiology and management of polycystic ovary syndrome (PCOS) • evidence-based guidelines to support diagnosis and management of common conditions such as menorrhagia, endometriosis, miscarriage and postnatal care, and support of evidence-based counselling regarding ovarian cancer screening, sexual problems and intimate partner violence*

*"From historical writings, ship manifests, wills, land grants, DNA testing, genealogies, and settler lists, and the widespread presence of Jews and Muslims in prominent positions in all of the original colonies, this work looks freshly at the early American experience, postulating that many initial US colonists were of Sephardic Jewish and Muslim Moorish ancestry" --Provided by publisher.*

*A Grammar of Modern Indo-European is a complete reference guide to a living Indo-European language. It contains a comprehensive description of Proto-Indo-European grammar, and offers an analysis of the complexities of the prehistoric language and its reconstruction from its descendant languages. Written in a fresh and accessible style, and illustrated with maps, figures and tables, this book focusses on the real patterns of use of Late Indo-European. The book is well organised and is filled with full, clear explanations of areas of confusion and difficulty. It also contains an extensive English - Indo-European, Indo-European - English vocabulary, as well as detailed etymological notes, designed to provide readers with an easy access to the information they require. An essential reference source for the student of Indo-European as a learned and living language, this work will appeal to students of languages, classics, and the ancient world, as well as to general readers interested in the history of language, and in speaking the direct ancestor of the world's largest language family.*

*Epilepsy is one of most frequent neurological disorders affecting about 50 million people worldwide and 50% of them have at least another medical problem in comorbidity; sometimes this is a the cause of the epilepsy itself or it is due to shared neurobiological links between epilepsy and other medical conditions; other times it is a long-term consequence of the antiepileptic drug treatment. The Comorbidities of Epilepsy offers an up-to-date, comprehensive overview of all comorbidities of epilepsy (somatic, neurological and behavioral), by international authorities in the field of clinical epileptology, with an emphasis on epidemiology, pathophysiology, diagnosis and management. This book includes also a critical appraisal of the methodological aspects and limitations of current research on this field. Pharmacological issues in the management of comorbidities are discussed, providing information on drug dosages, side effects and interactions, in order to enable the reader to manage these patients safely. The Comorbidities of Epilepsy is aimed at all health professionals dealing with people with epilepsy including neurologists, epileptologists, psychiatrists, clinical psychologists, epilepsy specialist nurses and clinical researchers. Provides a comprehensive overview of somatic, neurological and behavioral co-morbidities of epilepsy Discusses up-to-date management of comorbidities of epilepsy Written by a group of international experts in the field*

*During the past years there has been rapid progress in the understanding of how early life stress impacts psychopathology in children. The first two parts of this book present the basic principles of brain development and describe the most important neuronal systems. This includes systems involved in emotion processing, cognitive control, and social processes. These first two general sections are followed by an overview about recent research on various neuronal and psychiatric disorders, where environmental exposures and altered brain development play an important role: sleep, autism, ADHD and other developmental forms of psychopathology.*

*Complete Atlas of the World is the ultimate insight into our planet and the clearest, most concise overview of the world's geography. This incredible guide showcases locations from Boston to Bangkok and beyond with over 330 maps, including over 100 city plans, to truly bring these landscapes to life. Complete Atlas of the World is the definitive look at the world we live in. Detailed terrain models and colour schemes offer accessible mapping of unsurpassed quality. Complete Atlas of the World is now fully revised and updated to reflect recent geopolitical changes such as the new nation of South Sudan and the annexation of Crimea. Understand the fascinating world in which we live with this fantastic resource. Previous edition ISBN 9781405394413*

Perioperative Fluid Therapy

Neurobiology of Sensation and Reward

**Von Kremer sC** ulturgeaehichte des Orients will be welcome to all English-knowing lovers of Islamic history and culture. Von Kremer still stands unsurpassed. He has had no competitors; he alone occupies the field. His researches patient, laborious, thorough have illumined every aspect of Muslim life. He is the most trustworthy interpreter of the social, political, economic, literary, and legal problems of I slam. The volume before us opens with an account of the death of the Prophet, and the trouble that arose over the question of succession. Paction fought faction. Heavy banks of cloud loomed up menacingly on the political horizon of A rabia. The spirit of tribal faction theretofore checked and kept in restraint asserted itself; and, in its very infancy, I slam was threatened with division, disunion, ruin and disruption. Omar saw the danger, and felt the need of prompt and vigorous action. He did as a practical and sagacious statesman would do. He settled the question of succession at a stroke ;and with that the clouds rolled away, and the danger which had confronted I slam was at once averted. -- From **https://www.amazon.co.uk** (Sep. 21, 2016).

**This is a series of texts that introduces the reader to some of the more recent advances in schizophrenia research. It is concerned with questioning the role of the immune system in the aetiology and course of the disorder, as well as investigating the efficacy of some of the available treatments for schizophrenia. Edited by a leading scholar in the field, and written by researchers at the cutting edge of these developments, each chapter provides details of original works and their theoretical and empirical impact. The theme of cognition is prevalent throughout the book. As a core deficit in schizophrenia, cognition proves to be fundamental to both the mechanisms underlying the disorder, and the treatments used to alleviate symptomatology. It is evident in all subpopulations of schizophrenia patients explored in this collection -- from those with early onset schizophrenia, to those being treated in forensic mental health services -- and its importance throughout the lifespan of individuals with schizophrenia is highlighted. With a focus on a practical understanding of schizophrenia, this book will be of value to all researchers, psychiatrists and therapists with a clinical or research interest in this subject.**

*Synthesizing coverage of sensation and reward into a comprehensive systems overview, Neurobiology of Sensation and Reward presents a cutting-edge and multidisciplinary approach to the interplay of sensory and reward processing in the brain. While over the past 70 years these areas have drifted apart, this book makes a case for reuniting sensation and reward by highlighting the important links and interface between the two. Emphasizing the role of reward in reinforcing behaviors, the book begins with an exploration of the history, ecology, and evolution of sensation and reward. Progressing through the five senses, contributors explore how the brain extracts information from sensory cues. The chapter authors examine how different animal species predict rewards, thereby integrating sensation and reward in learning, focusing on effects in anatomy, physiology, and behavior. Drawing on empirical research, contributors build on the themes of the book to present insights into the human sensory rewards of perfume, art, and music, setting the scene for further cross-disciplinary collaborations that bridge the neurobiological interface between sensation and reward.*

*This volume of al-Tabari's History covers nearly a quarter of a century, and after covering the very brief caliphate of al-Hadi, concentrates on that of Harun al-Rashid. During these years, the caliphate was in a state of balance with its external foes; the great enemy, Christian Byzantium, was regarded with respect by the Muslims, and the two great powers of the Near East treated each other essentially as equals, while the Caucasian and Central Asian frontiers were held against pressure from the Turkish peoples of Inner Eurasia. The main stresses were internal, including Shi'ite risings on behalf of the excluded house of 'Ali, and revolts by the radical equalitarian Kharijites; but none of these was serious enough to affect the basic stability of the caliphate. Harun al-Rashid's caliphate has acquired in the West, under the influence of a misleading picture from the Arabian Nights, a glowing image as a golden age of Islamic culture and letters stemming from the Caliph's patronage of the exponents of these arts and sciences. In light of the picture of the Caliph which emerges from al-Tabari's pages, however, this image seems to be distinctly exaggerated. Al-Rashid himself does not exhibit any notable signs of administrative competence, military leadership or intellectual interests beyond those which convention demanded of a ruler. For much of his reign, he left the business of government to the capable viziers of the Barmakid family--the account of whose spectacular fall from power forms one of the most dramatic features of al-Tabari's narratives here--and his decision to divide the Islamic empire after his death between his sons was to lead subsequently to a disastrous civil war. Nevertheless, al-Tabari's story is full of interesting sidelights on the lives of those involved in the court circle of the time and on the motivations which impelled medieval Muslims to seek precarious careers there. A discounted price is available when purchasing the entire 39-volume History of al-Tabari set. Contact SUNY Press for more information.*

*Presents numismatics from the ancient harbor town of Dor/Dora in modern Israel with a history that spanned from the Bronze Age until the Late Roman Era.*

*This book addresses the phenomenology, demographics, and neurobehavioral aspects of suicidal behavior and its risk factors, underscoring common neurobehavioral threads among different approaches which may underlie such extreme behavior. It additionally provides an overview of new approaches, such as imaging techniques to identify at-risk individuals or in response to drug treatment associated with suicidal behavior, neurodevelopmental approaches, genetic and epigenetic linkages to suicidal behavior, animal models of specific risk factors, as well as potential biomarkers being employed to help assess risk.*

*Covers all aspects of epilepsy, from basic mechanisms to diagnosis and management, as well as legal and social considerations.*

*This important reissue, enhanced with free downloadable MP3 files to supplement the first chapter of the text (sounds), is another addition to Georgetown's world-renowned Arabic language-learning materials and is considered to be one of the most outstanding descriptions of any Arabic dialect written for the English-speaking world. It is comprehensive in its coverage--ranging from phonology (how sounds are organized and used) to morphology (sound, syllable, and word structure), with an analysis that is insightful and original. It contains hints on how to master nuances in dialectical pronunciation, as well as the differences of meaning in their various forms. Based on the dialect of Damascus, the language covered here is part of what has variously been called "Syrian Arabic," "Eastern Arabic," and "Levantine Arabic," encompassing the dialects of Beirut, Amman, and Jerusalem--as well as Damascus--with references made to regional variants. In a world drawn ever closer to events in the Middle East, this comprehensive grammar reference is yet another extraordinary addition to the growing library of Arabic language-learning materials published by Georgetown University Press. Accompanying MP3 files are available for download from the book's webpage at [press.georgetown.edu](http://press.georgetown.edu).*

*This work is a guidebook for clinicians who are involved in treating depressive patients and also serves the research scientists who are working on the psychopharmacological mechanisms of antidepressant actions and psychopathological mechanisms underlying mood disorders. Mood disorders such as major depressive disorder (MDD), bipolar disorder (BPD) and seasonal affective disorder (SAD) are the most disabling disorders that are among the most expensive of all medical illnesses. The pathophysiology of mood disorders is very complex and involves many mechanisms like circadian rhythm disruption, sleep abnormalities, melatonin rhythm abnormalities and alterations in melatonin receptor mechanisms, abnormalities in monoaminergic neurotransmitter mechanisms, glutamatergic release mechanisms, hippocampal neurogenesis, and abnormal immune and cytokine release mechanisms. Many antidepressants that are in clinical use today including the recently introduced novel agents like agomelatine or other antidepressants cause clinical remission by resynchronizing disrupted circadian rhythms and melatonin receptor functions, enhancing monoaminergic neurotransmission, promoting hippocampal neurogenesis, and regulating immune mechanisms. This book explains various etiological factors that are involved in the pathogenesis of mood disorders and the mechanisms of therapeutic actions of antidepressants including the recently introduced agomelatine and other antidepressants that exhibit rapid onset of action with greater efficacy and fewer side effects. .*

This book is an up-to-date, comprehensive review of the neuropsychiatry of epilepsy, by active authorities in the field, with an emphasis on clinical and management issues. A critical appraisal of the methodology and limitations of current research on the neuropsychiatry of epilepsy is provided, and unanswered questions and controversies are addressed. Pharmacological aspects of management are also discussed in order to enable the reader to manage these patients more safely. Neuropsychiatric Symptoms of Epilepsy is aimed at neurologists, epileptologists, psychiatrists and neuropsychiatrists, and will also be of interest to psychologists and neuropsychologists, research and specialist nurses, clinical researchers and methodologists.

This practically oriented book provides an up-to-date overview of all significant aspects of the pathogenesis of sepsis and its management, including within the intensive care unit. Readers will find information on the involvement of the coagulation and endocrine systems during sepsis and on the use of biomarkers to diagnose sepsis and allow early intervention. International clinical practice guidelines for the management of sepsis are presented, and individual chapters focus on aspects such as fluid resuscitation, vasopressor therapy, response to multiorgan failure, antimicrobial therapy, and adjunctive immunotherapy. The closing section looks forward to the coming decade, discussing novel trial designs, sepsis in low- and middle-income countries, and emerging management approaches. The book is international in scope, with contributions from leading experts worldwide. It will be of value to residents and professionals/practitioners in the fields of infectious diseases and internal medicine, as well as to GPs and medical students.

Sponsored by the Adolescent Mental Health Initiative of the Annenberg Public Policy Center (APPC) of the University of Pennsylvania and the Annenberg Foundation Trust at Sunnyslads Trust, Treating and Preventing Adolescent Mental Health Disorders, Second Edition, provides a major update since the first edition in 2005. It addresses the current state of knowledge about the major mental health disorders that emerge during adolescence, including updated DSM-5 diagnostic criteria. Here, six commissions established by the APPC and the Sunnyslads Trust pool their expertise on adolescent anxiety, schizophrenia, substance use disorders, depression and bipolar disorders, eating disorders, and suicidal behavior in sections that thoroughly define each disorder, outline and assess available treatments, discuss prevention strategies, and suggest a research agenda based on what we know and don't yet know about these various conditions. Two additional behavioral disorders--gambling and internet addiction--are covered in this second edition. As a meaningful counterpoint to its primary focus on mental illness, the volume also incorporates the latest research from a seventh commission--on positive youth development--which addresses how we can fully prepare young people to be happy and successful throughout their lives. Concluding chapters discuss overarching issues regarding the behavioral and mental health of adolescents: overcoming the stigma of mental illness, the research, policy, and practice context for the delivery of evidence-based treatments, and the development of a more robust agenda to advance adolescent health. Integrating the work of eminent scholars in both psychology and psychiatry, this work will be an essential volume for academics and practicing clinicians and will serve as a wake-up call to mental health professionals and policy makers alike about the state of our nation's response to the needs of adolescents with mental disorders.

Annotation Originally offered in two separate volumes, this staple of Georgetown University Press's world-renowned Arabic language program now handily provides both the English to Arabic and Arabic to English texts in one volume.

The Orient Under the Caliphs

Dimensional Psychopathology

An Introduction to the Folk-Lore and the Folk

Handbook of Implicit Cognition and Addiction

Loud and Clear

A Reference Grammar of Syrian Arabic

Everything in Klara's life seems perfect. She runs a successful cosmetic clinic with her best friend Tomas, she has a beautiful house near the beach in Melbourne, and she and her adoring husband Dante are trying for a baby. Then one day she receives a call that punctures her perfect life. Dante has had an accident. He was found unconscious in a gay sauna and now lies in a coma. What Klara discovers about her husband will disrupt everything she thought she knew about love, marriage and family. From Australia's most exciting new author, Modern Marriage will cause you to question what lies beneath the appearance of perfection.

Most research on cognitive processes and drug abuse has focused on theories and methods of explicit cognition, asking people directly to introspect about the causes of their behavior. However, it may be questioned to what extent such methods reflect fundamental aspects of human cognition and motivation. Therefore, basic cognition researchers have started to assess implicit cognitions, defined as "introspectively unidentified (or inaccurately identified) traces of past experience that mediate feeling, thought, or action." Such approaches are less sensitive to self-justification and social desirability and offer other advantages over traditional approaches underscored by explicit cognition. This handbook is the first to bring together developments in basic research on implicit cognition with recent developments in addiction research, thus providing an opportunity to move the field forward by integrating research from previously independent fields that are relevant for a better understanding of the etiology, prevention, and treatment of addictive behaviors.

In Ordinary Jerusalem, 1840-1940, Angelos Dalachanis, Vincent Lemire and thirty-five scholars, mostly young academics, utilize new archives to revisit the global, extraordinary city of Jerusalem in the late Ottoman and Mandate periods.

Here, Comrie (linguistics, U. of Southern Cal.) is particularly concerned with syntactico-semantic universals, devoting chapters to word order, case marking, relative clauses, and causative constructions. This second edition takes full account of new research into generative grammatical theory. Acidic paper. Annotation copyrighted by Book News, Inc., Portland, OR

The History of Thought from Ancient Times to Today

Ordinary Jerusalem, 1840-1940

An English-Persian Dictionary

Concepts, Strategies and Models to Enhance Physics Teaching and Learning

A recently retired Israeli Air Force general and its second-highest-scoring fighter ace, Iftach Spector is one of Israel's living legends. He was the leader of the flight that attacked the USS Liberty in 1967. After the 1967 and 1973 wars, in which he commanded a squadron of fighter-bombers, he rose to head the IAF's Training and War Lessons. He is one of the eight Israeli pilots who attacked Saddam Hussein's nuclear reactor at Osirik in 1981. In 2003, his career took an even more dramatic turn: he was the senior signatory of the famous "Pilots' Letter," in which Spector and 27 other Israeli pilots stated their refusal to bomb targets in Palestine where collateral damage would likely be inflicted on civilians. Spector's artfully written memoir, which is currently a 10-week-and-counting bestseller in Israel and has been licensed in Brazil as well. The son of a family that immigrated to Palestine at the turn of the 20th century, whose father and mother served in the Palmach, Israel's early clandestine commando force, Spector has written a rich and reflective memoir that is a testament to his dedication to the idea and reality of the state of Israel. The Pilots' Letter ended Spector's military career, but also made him one of the most compelling and celebrated defenders of the conscience of the Jewish state. In that battle, as in his previous battles against Nasser's MiGs, his mother's constant lesson to him sustained him: "All is possible." Spector's memoir, AND AZURE (1992; never translated into English), won the Sade Literary Award, given to him personally by Prime Minister Yitzhak Rabin. He has a B.A. in history and Middle East Studies from Tel Aviv University and a masters in political science from UCLA, both with honors.

Chagas disease causes severe socioeconomic impact and a high medical cost in Latin America. WHO and the World Bank consider Chagas disease as the fourth most transmittable disease to have a major impact on public health in Latin America: 120 million persons are potentially exposed, 16 to 18 million of whom are presently infected, causing an estimated 10 million potential working years are lost because of incapacity and mortality due to the disease, for an annual cost estimated at 20 billion Euros. American Trypanosomiasis provides a comprehensive overview of Chagas disease and discusses the latest discoveries concerning the three elements that compose the transmission cycle: the insect vectors: domestic and sylvatic vectors The causative parasite: Trypanosoma cruzi Informs and updates on all the latest developments in the field Contributions from leading authorities and industry experts
