Don't Dread Monday is a pragmatic and powerful guide to a lifetime of career success. Studies have shown that the majority of adults are in the midst of a mediocre career. It is the under-reported dilemma and challenge of our generation. In Don't Dread Monday, you will apply proven principles surfaced by the relatively few who have -cracked-the-code- and built a fantastic career. The book exposes common career myths and corresponding truths, surfaces the reader's unique passionate core needs, and outlines the path forward in the CARE Cycle for career success. Don't Dread Monday can change your career, and even your life.

The Law of Contract expounds the fundamental principles of the law clearly, concisely and, where appropriate, critically. It provides an introduction for the beginner and a means of revision towards the end of a course. By the author of Smith & Thomas: A Casebook on Contract, it is comprehensively cross-referenced to the 11th edition (2000) of that work. This edition has been fully updated and includes an account of the Contracts (Rights of Third Parties) Act 1999 and important recent case law, particularly in the fields of implied terms and damages.

When a Tibetan Buddhist leader dies, he leave clues as to where he will next incarnate so that he can be found and trained to take up his duties again. When the Sixteenth Karmapa, head of the Karma Kagyu lineage, died in 1981, the search for his successor soon began. This is the story of the politics and intrigue involved in finding him, not a simple task as it turned out, as told by a Western observer.

When the Ottomans commenced their modernizing reforms in the 1830s, they still ruled over a vast empire. In addition to today's Turkey, including Anatolia and Thrace, their power reached over Mesopotamia, North Africa, the Levant, the Balkans, and the Caucasus. The Sultanate was at the apex of a truly multi-ethnic society. Modernization not only brought market principles to the economy and more complex administrative controls as part of state power, but also new educational institutions as well as new ideologies. Thus new ideologies developed and nationalism emerged, which became a political reality when the Empire reached its end. This book compares the different intellectual atmospheres between the pre-republican and the republican periods and identifies the roots of republican authoritarianism in the intellectual heritage of the earlier period.

In The Perfect Leadership Triad, Eric Turbiville educates executives about the importance of putting employees before the business, coaching employees to improve competencies and performance, and holding employees accountable to perform at a high level. Great leaders focus on people, coaching and performance. Turbiville combines his experience as a former Fortune 500 executive, a credentialed executive coach, and a leader of many high-performing teams, to help readers grow into more impactful leaders.Drawing on his own experience as an executive and coach, combined with many examples from the business world, Turbiville provides the formula to excel as a business leader. He shows that the most effective executives are people-focused, coaching-centered, and performance-driven.Great organizations and leaders put their employees before the customers. Data confirms that happy, engaged employees result in happy customers. In fact, when employees know you care about and respect them, they will buy into your vision and work harder for you.Coaching employees is the most important thing a leader can do to heighten performance, increase revenue, and guarantee employee engagement. The act of coaching employees engenders trust between the leader and employee, resulting in a relationship that is transparent, candid, and productive.If a leader cares about her people, she will hold them accountable for performance. Great leaders set clear, high expectations and focus on the process of accomplishing goals. When performance expectations are combined with effective coaching, employees and leaders will exceed expectations. No leader, organization, or culture is perfect. What executives strive for is excellence! Excellence follows when leaders put people first, coach their employees, and expect high performance.The business world needs your leadership. Come on this journey as Eric Turbiville shows you how to drive and sustain high performance!

The third volume of Advances in Nutritional Research continues the precedent set in previous volumes of providing authoritative reviews on the current state of knowledge with respect to major topics of ongoing nutritional research. This series is designed to be of value to investigators engaged in fundamental research as well as to those involved in its application to problems in human and animal nutrition. This volume contains three chapters on recent developments in research on inorganic elements, including a review, by F. H. Nielsen, of the evidence for a requirement for additional trace elements; a conspectus, by C. E. Casey and K. M. Hambidge, on the occurrence of trace element deficiencies in man; and a description, by M. Janghorbani and V. R. Young, of new methods of assessing the bioavailability of minerals in the diet. There are also three chapters on current topics of lipid research. One (by F. D. Sauer) is devoted to the cardiopathic effects of certain dietary monoenoic fatty acids, another (by C. Galli) to the influence of diet on prostaglandin synthesis, and the third (by H. O. Bang and J. Dyerberg) to an analysis of the role of the unusual polyunsaturated fatty acids found in marine oils in the prevention of ischemic heart disease.

After critiquing—and infuriating—the art world with The Painted Word, award-winning author Tom Wolfe shared his less than favorable thoughts about modern architecture in From Bauhaus to Our Haus. In this examination of the strange saga of twentieth century architecture, Wolfe takes such European architects as Ludwig Mies van der Rohe, Le Corbusier, and Bauhaus art school founder Walter Gropius to task for their glass and steel box designed buildings that have influenced—and infected—America’s cities.

The Inside Story

Late Ottoman Society

There are instances of unresolved differences of opinion , as in the case of underlying biochemical mechanisms of action. It has been particularly challenging to interpret the diversity of effects induced by several trichothecenes when studied in various cells, tissues, and concentrations, and at dissimilar intervals. In the hope of shortening the time needed to overcome these difficulties, the authors have sought to discuss a range of observations delineating both areas of agreement and aspects remaining to be clarified. The final chapter of the volumes is comprised of an effort to integrate the various observations detailed throughout the book. With the continued efforts of not only the many dedicated scientists who served as contributors to these volumes, but from the many other authors cited herein and those to follow, our understanding of these interesting compounds will continue to expand. We have already learned enough to greatly reduce the adverse effects of the trichothecene mycotoxins on humans and other animals.

This first comprehensive study on Ottoman educational reform is based on archival material and providing new information on curricular policies applied in the provinces and toward different ethnic groups.

Presents a collection of short stories featuring noir and crime fiction about the Twin Cities, by such mystery writers as Pete Hautman, Mary Sharratt, Quinton Skinner, and Brad Zellar.

Eliot H. Dunsky, MD, is a retired physician who since his diagnosis in 2009 has been living with ALS, the complex, progressively debilitating disorder commonly known as Lou Gehrig's disease. Determined to maintain the best quality of life possible-for as long as possible-he extensively researched the condition and its management. As he immersed himself, talking to ALS patients and exploring emerging assistive technologies and aids, he realized that misunderstanding of this complicated disease was rife, preventing many from making the most of the precious years left. The result is this compilation of not only his personal experiences as his own condition advanced but also current research and links to additional specialized resources. Its aim is to help other patients learn to live with their diagnosis and navigate the day-to-day struggles associated with it. Appropriate symptom management can help fend off the devastating effects of the disease for a longer period of time. ALS: An Orientation offers a practical guide for patients and their families on maximizing quality of life through strategic care and, importantly, coping with the emotional toll the disease can take. A terminal diagnosis simply means savoring to the fullest the life that is still possible.

The perfect match of content and format: Craft supplies, a full-color how-to book and nobody-else-but-Klutz creativity, all packed in a sturdy, re-usable plastic jar with a screw-top lid and a rope handle. The whole package is incredibly bright, cheerful, easy to stack and display, and completely shopwear-proof.Start with an empty Klutz Bucket. Fill with wooden animal shapes. Add eight acrylic craft paints, one brush, a fine point black marker and a 40-page Klutz book of full-color, paint-this-critter inspiration. And then, right at the end, toss in a good supply of wiggle eyes. End result? A zoo in a bucket. With it you can paint 24 wooden die-cut blanks into things like Technicolor tigers or polka-dotted pandas, paying absolutely no attention whatsoever to the way they're actually supposed to look.

"In October 2005, some 1,200 people from fifty-nations gathered in Anchorage, Alaska, to attend the 8th World Wilderness Congress (WWC). The WWC first convened in 1977 and is now the worlds longest-running international environmental forum." "The 8th WWC continued to build on a proud tradition of setting practical conservation objectives. As these pages will reveal, scientists, Native people, politicians, corporate leaders, artists, educators, and others reviewed the first wilderness area in Latin America, which was made possible by Mexico's pioneering wilderness law. The delegates also expanded the list of private-sector wilderness areas, convened the first Native Lands and Wilderness Council, created the International League of Conservation Photographers, critiqued new wilderness inventories and maps, and much more. Wilderness, Wildlands, and People details the many accomplishments of the 8th WWC and its vision for a better future."--BOOK JACKET.

How Top Executives Maximize Productivity Through People, Coaching, and Performance

Known for its unique “Special Topic” chapters and emphasis on everyday health concerns, theFifth Edition of Biology of Humans: Concepts, Applications, and Issuescontinues to personalize the study of human biology with a conversational writing style, stunning art, abundant applications, and tools to help you develop critical-thinking skills. The authors give you a practical understanding how their bodies work and for preparing them to navigate today’s world of rapidly expanding—and shifting—health information. Each chapter now opens with new “Did You Know?” questions that pique your interest with intriguing and little-known facts about the topic that follows. The Fifth Edition also features a new “Special Topic” chapter (1A) “Decision,” which discusses how to select a doctor and/or a hospital, how to research health conditions, and more.

This encyclopedic work on Islam comprises English translations of all canonical ?ad?ths, complete with their respective chains of transmission (isn?ds). By conflating the variant versions of the same ?ad?th, the repetitiveness of its literature has been kept wherever possible to a minimum. The latest methods of isn?d analysis, described in the general introduction, have been used to identify the person(s) responsible for each ?ad?th. The book is organized in the alphabetical order of those persons. These are the so-called ‘common links’. Each of them is listed with the tradition(s) for the wording of which he can be held accountable, or with which he can at least be associated.

Arabic Rhetoric explores the history, disciplines, order and pragmatic functions of Arabic speech acts. It offers a new understanding of Arabic rhetoric and employs examples from modern standard Arabic as well as providing a glossary of over 448 rhetorical expressions listed in English with their translations, which make the book more accessible to the modern day student. Arabic rhetoric bridges the gap between learning and research, whilst also meeting the academic needs of our present time. This up-to-date text provides a valuable source for undergraduate students learning Arabic as a foreign language, and is also an essential text for researchers in Arabic, Islamic studies, and students of linguistics and academics.

This book attempts to demonstrate that only a genuine democratic dispensation can ensure its survival as a viable federation. Sartaj Aziz argues that the vitality of a nation comes primarily from the value system, cultural heritage, and social energy of its people.

Since the eighteenth century, adherence to Sufism, the mystical tradition of Islam, has been associated with membership in one of the Sufi brotherhoods. These brotherhoods constitute distinct religious communities within the general community of Islam. Jamil M. Abun-Nasr describes them as "communities of grace" because his readings in Sufi hagiographies have convinced him that divine grace is the central element of their system of beliefs. In his reconstruction of the development of the Sufi tradition, Abun-Nasr examines the emergence of Sufism's central tenets and the factors that account for their appeal to Muslims in different lands. Drawing on original Sufi sources, he contends that, in their formative period, Sufi tenets were shaped by the caliphs' inability to live up to the ideal the Prophet represented in the Muslim community: that political leadership was a subordinate function of religious guidance. He also contends that the Sufi brotherhoods' form of religious communalism emerged from the adaptation of the spiritual authority that Sufis ascribed to their leaders to the Muslims' major pious concerns. In the last two chapters Abun-Nasr examines the reaction of the Sufi brotherhoods' shaykhs to European colonial rule, the campaign directed against them by Muslim reformers of the Salafiyya school, and the reliance of the independent Muslim states' rulers on their support in counteracting the hostility of the Muslim reformers, as well as, since the 1970s, the Islamists, to their secular development plans.

Will help health professionals diagnose an individual's signs and symptoms that could be related to an indoor air pollution problem. Arranged according to pollutant group: environmental tobacco smoke, other combustion products, animal dander, molds, dust mites, other biologicals, volatile organic compounds, heavy metals (lead and mercury), sick building syndrome, and asbestos and radon.

Provides diagnostic leads to help determine causes of each health problem. Answers common questions patients may have. Resources for health professionals and patients.

The Substance Abuse and Mental Health Services Administration funded the multisite Young Adults in the Workplace (YIW) initiative to study the effectiveness of diverse approaches to workplace-based prevention of substance abuse. Six teams adapted evidence-based programs to target young employees and then implemented the programs in retail, restaurant, health care, construction, skilled trade, and transportation industry workplaces. This book describes the programs, the adaptation and implementation processes, and the YIW cross-site evaluation.

When a bad day at work culminates in losing out on a promotion, Jim Sanders shifts into his animal form to let off steam. Then his bad day turns into a bad night-while prowling his Atlantic City neighborhood as a large gray house cat, he's caught in a torrential downpour. What little luck he has washes down the gutter when his new boss, Andrew Wright, catches him taking shelter on his porch,

brings him inside, and starts calling him Mr. Frosty. As a feline, Jim becomes the inadvertent confessor for his boss's lonely son, Tony, a victim of schoolyard bullying. As a human, he feels drawn to Andrew, a man he wanted to resent. Finding love was never part of Jim's plan for the future-not with his bizarre secret-yet suddenly he finds himself navigating that minefield anyway. But not everything is easy, especially for an interracial gay couple dealing with prejudice in the workplace, at Tony's school, and even within their own families.

The Painted Zoo

"Intercorrelations among ratings on 35 personality traits, selected as representative of the personality domain, were obtained for eight samples. These samples differed in length of acquaintanceship from three days to more than a year; in kind of acquaintanceship from assessment programs in a military training course to a fraternity house situation; in type of subject from airmen with only a high school education to male and female undergraduate students to first-year graduate students; and in type of rater from very naive persons to clinical psychologists and psychiatrists with years of experience in the evaluation of personality. Centroid or multiple-group factors were extracted and rotated orthogonally to simple structure. For one study, an independent solution was obtained in which analytic rotations were accomplished on an IBM 650 computer using Kaiser's normal varimax criterion. Five fairly strong and recurrent factors emerged from each analysis, labeled as (1) Surgency, (2) Agreeableness, (3) Dependability, (4) Emotional Stability, and (5) Culture. -- page iii.
